AUTHOR: Kim Wildman - Tourism Manager

2022 Outback Queensland Masters Golf Tournament

Executive Summary

This report tables a proposal by Luke Bates from Golf Australia seeking sponsorship to host the tee-off of the 2022 Outback Queensland Masters in St George.

Background

In late 2020 Luke Bates, State Manager, Golf Australia and Krista Hauritz, Outback Queensland Masters' Marketing Consultant, met with members of the Balonne Shire Council including the Mayor, CEO and Manager Tourism and representatives from the St George Golf Club including President Ross Brimblecombe to present a proposal for the tee-off of the 2022 Outback Queensland Masters Golf Tournament to be hosted in St George. Dates suggested from 18-19 June 2022 with sponsorship of \$20,000 in cash requested from the Balonne Shire to take part in the event.

Presented by Golf Australia in partnership with Tourism & Events Queensland and PGA Australia, the Outback Queensland Masters is Australia's most remote golf series with the world's largest amateur golfing prize pool, including a million-dollar hole-in-one, 5 x \$10,000 hole-in-ones. The event is staged across 6 towns in Queensland's Outback and in 2020 was awarded Australia's Best New Event.

In 2019 the event had a 24 million reach in national media with more than 1,200 attendees across the six locations and 323 people from interstate. Due to COVID-19 travel restrictions, the 2020 was rescheduled to 2021 which will see the OQM commence at Biloela and then travel to Charleville, Quilpie, Blackall, Hughenden concluding in Longreach for the Million Dollar Hole-in-One challenge.

The inaugural event was launched in 2019 and ran across six towns including Roma, Charleville, Longreach, Winton, Boulia, concluding in Mount Isa.

The aim of the OQM is to attract a new, higher yield market to Outback Queensland and provide local and remote communities an opportunity to experience a high-quality sporting event of national significance.

Benefits of the Event

- National Media Coverage for the inaugural tee-off in St George/Balonne Shire.
- St George/Balonne Shire will feature in a 12-month marketing campaign which includes Editorial and TV Advertising, Content and Social Media Marketing, Signage at the event, and Digital Marketing on Website and e-News as well as a Program/Pocket Guide.
- Legacy of professional film and drone footage, and high-resolution images available post the event worth \$4,800.
- financial injection directly through your local golf club and through the community.
- Delivery of approximately 200 unique out-of-region visitors to your town for a minimum of three nights which equates to \$78,000 based on Tourism Research Australia's estimated daily expenditure for the Balonne Shire (currently determined at \$130 per person).
- Junior Clinics occur at each location and are FREE to the local kids in the community.
- PGA Professional Darren Weatherall provides these clinics at each event.

Additionally, Council would be offered two (2) Outback Player Passes valued at \$300, eight (8) Outback Spectator Passes valued at \$800.

Community Concerns

Following the meeting the St George Golf Club raised some concerns, including:

- The high dollar cash investment isn't balanced out by the return on investment given:
 - (a) the low numbers and cap on participants in the event, and
 - (b) that outside vendors would be brought in to provide services, such as catering for the event, which could be provided locally.
- The dates of the event would clash with the club's current Dragon Country Sandgreen championship, which is growing at a rapid rate.

Golf Australia's Response

QLD State Manager of Golf Australia, Luke Bates, has subsequently sent a letter to Council's Tourism Manager dated 24 February 2020 stating that Golf Australia:

- are "happy to work with Council on the level of support they provide the event", and
- "will ensure that the scheduling of the event in 2022 will not result in any of the local golfing club open days being affected".

Cr Samantha O'Toole, Balonne Shire Council
Cr Richard Lomman, Balonne Shire Council
Kim Wildman, manager Tourism, Balonne Shire Council
Ross Brimblecombe, President, St George Golf Club

Legal Implications

NA

Risk Implications

Reputation - Inadequate engagement and assessment of the impact of external and internal stakeholders on our community, viability and productive capacity.

Policy Implications

NA

Financial and Resource Implications

The cost of sponsorship for the event is **\$20,000** in cash with the return on investment to the community valued at **\$127,100**. This includes \$78,000 of direct expenditure from the 200 participants based on Tourism Research Australia's estimated daily expenditure for the Balonne Shire (currently determined at \$130 per person), two (2) Outback Player Passes valued at \$300, eight (8) Outback Spectator Passes valued at \$800 and legacy footage worth \$4,800.

There is currently \$44,000 in the 2020/2021 Tourism Events Donations with only \$6,000 requested in Round 2 grant applications (to be presented to Council at the April meeting), leaving \$38,000 available. It is therefore possible to hold over the sponsorship amount until the 2021/2022 Budget.

Options or Alternatives

As the proposal stands, the direct economic value to the Balonne Shire community does not justify the \$20,000 investment.

Given the high-profile nature of the event and the value to the Shire in terms of media exposure and community access to professionally run golfing clinics, the recommendation is that Council submits a counter proposal to Golf Australia for sponsorship of a reduced cash investment combined with in-kind support along with assurances regarding the use of local vendors for services.

Attachments

1. 24-02-2021-2022 Outback Qld Masters Proposal - Balonne Shire Council.pdf  

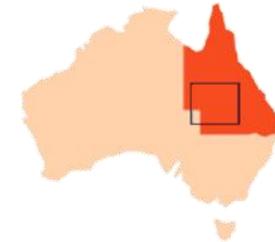

Recommendation/s

That Council resolves to present a counter proposal for sponsorship of a reduced cash investment combined with in-kind support to Golf Australia with assurances that local vendors will be utilised for all services for the event unless specialist and not available in the Shire.

AUSTRALIA'S MOST REMOTE GOLF SERIES

In 2019 the inaugural Outback Queensland Masters (OQM) was launched across six towns including Roma, Charleville, Longreach, Winton, Boulia, concluding in Mount Isa with the Million Dollar Hole-In-One.

The OQM is for amateur golfers, where even first-time golfers are encouraged to join the tournament.

In 2019 the event had a 24 million reach in national media with more than 1,200 attendees across the six locations and 323 people from interstate.

Due to COVID-19 travel restrictions, the 2020 was rescheduled to 2021 which will see the OQM commence at Biloela and then travel to Charleville, Quilpie, Blackall, Hughenden concluding in Longreach for the Million Dollar Hole-in-One challenge.

NATIONAL RECOGNITION

In 2020 Outback Queensland Masters was judged by the Australian Event Awards as the Best New Event in Australia

“innovative, ground-breaking, inclusive, fun and creative - this is an incredibly unique new event. The effort, creativity and resourcefulness of the event organisers is truly impressive,”

co-chair of the judging panel Peter Rix AM.

AUSTRALIAN
EVENT AWARDS
WINNER 2020

A NEW MARKET FOR OUTBACK QUEENSLAND

The aim of the OQM is to attract a new, higher yield market to Outback Queensland and provide local and remote communities an opportunity to experience a high-quality sporting event of national significance.

“We are not about attracting thousands of visitors or profitless volume. The Outback Queensland Masters is about bringing new, higher spending markets to Outback Queensland.”

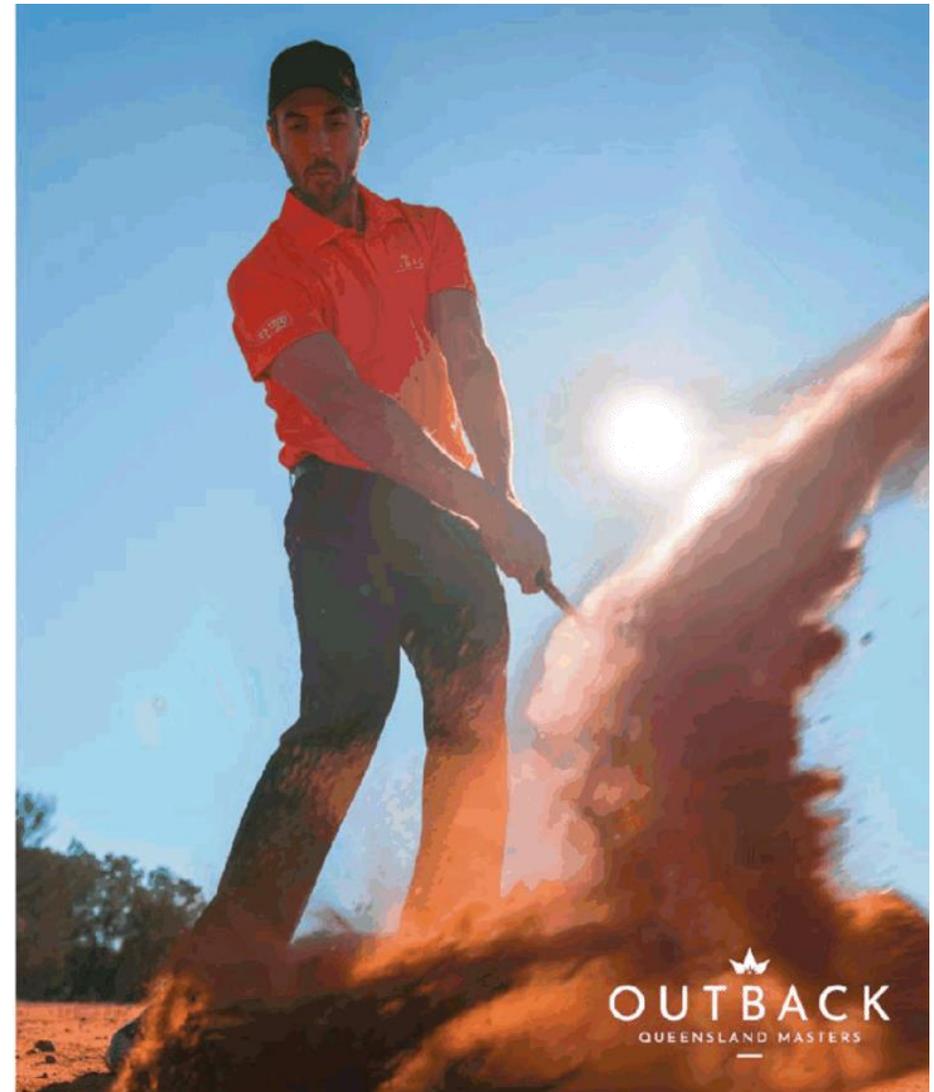

“We are already in negotiations with Golf New Zealand for promotional opportunities, and long-term to target international golfers.”

*Luke Bates, Golf Operations & State Senior Manager
Queensland, Golf Australia.*

2022 PROPOSED KEY DATES

18 - 19 June	OQM - Location 1
25 - 26 June	OQM - Location 2
2 - 3 July	OQM - Location 3
9 - 10 July	OQM - Location 4
16 - 17 July	OQM - Location 5
22 - 23 July	OQM - Location 6
24 July	OQM - Location 6 (Million Dollar Hole-In-One)

THE EVENT FORMAT

- Staged at local golf clubs in each town, the first 5 events are two-day, weekend events staged on Saturday and Sunday, each with a \$10,000 hole-in-one challenge.
- The event kicks off with breakfast on the Saturday morning at the local respective golf club, followed by the official tee off. A free Junior Golf Clinic for local children is staged on the Saturday morning with PGA Pro, Darren Weatherall.
- The competition at each event continues all day Saturday and Sunday (9 holes each day), with breakfast and lunch included on both days. Saturday evening is dinner under the stars with live entertainment.

OUTBACK
QUEENSLAND MASTERS

THE MILLION DOLLAR *Hole-in-One*

The tournament culminates in the sixth location for a three-day event over Friday, Saturday and Sunday. Tee off is on the Friday morning followed by Dinner Under the Stars. Saturday is another day of play on the sand green, and Sunday is the Million Dollar Hole-in-One challenge.

THE FEEDBACK PLAYERS

"A wonderful finale in Mount Isa for this magic event. We are still talking about it and sharing it with friends and family. Thinking seriously not to miss the 2021 opportunity - so much so we purchased two new 21st century drivers today!"

Leonie & Bruce Pratt

"Absolutely awesome Day One- organisation was excellent and the evenings entertainment absolutely outstanding"

Barbara Slater

"Our club (Roma) had the first leg of this great event. Being the first event we didn't know what to expect, golfers and non golfers enjoyed it so much they can't wait for the next leg. If you're not a golfer the entertainment package is well worth the money great entertainment and meal. Many thanks to the organising bodies for coming up with this awesome event for outback golf in Queensland, we are doing it pretty tough out here."

Jackie Lambert

"I enjoyed the course and the camaraderie of the players. Congratulations to all those who made it possible"

Martin Craig-McFeely

"I couldn't believe the setup you guys have done, I'm from a small town and I appreciate you guys doing this."

John Martin

"We like the country, we own a motorhome and liked the idea of playing the country courses and joining in some fun."

Derek and Sary Vanderkley

ROAD TRIP ITINERARY**

Make your way to the friendly town of Bieloela for the first leg of the 2021 Outback Queensland Masters. If you're arriving early to Bieloela, make the most of your time by exploring the Queensland Heritage Park, Lake Callide and the town's surrounding natural wonders.

BILOELA TO CARNARVON GORGE
(318 kilometres)

Begin your journey to Charleville, your next tee-off location, with an early start along the Leichhardt Way to the town of Banana. You won't find any yellow coloured fruit at this small farming town junction, instead meet the life-sized statue of Banana the Bullock who stands proudly in the town. Passing through Rolleston, follow the Carnarvon Highway taking you to Carnarvon National Park. In this Queensland central highland's oasis, experience towering sandstone cliffs, ancient rainforest, diverse flora and fauna, and ancient indigenous art galleries.

FORMAT
The event is a six part golf series across remote locations in Outback Queensland. Staged in Outback golf clubs in each town, the events are two days long.

stars of the Milky Way with live entertainment from Australia's finest.

The tournament culminates in Longreach for a three day event over Friday, Saturday and Sunday. Tee off on Friday and Friday, dine under the stars on Friday and Sunday, and if you are eligible you will be teeing off the Million Dollar Hole-In-One on Sunday.

To compete in the Million Dollar Hole-in-One, you must first have competed in two previous locations.

Fantastic prizes are up for grabs at each location, as well as prizes for those players that play three or more events!

2022 - COUNCIL PARTNERS

WHY PARTNER WITH AUSTRALIA'S BEST NEW EVENT THE OUTBACK QUEENSLAND MASTERS?

- Your town will feature in a 12 month marketing campaign
- Legacy of professional film and drone footage, and high resolution images available post the event
- OQM provides a financial injection directly through your local golf club and through the community
- Delivery of approximately 200 unique out-of-region visitors to your town for a minimum of three nights
- Delivery of a world class two day event
- Opportunity for your local club to be exposed to the operations of a World Class Golfing event where local staff and volunteers have the opportunity to gain experience and then use similar practices at events in the future.

2022 - COUNCIL PARTNER BENEFITS

BIRDIE SPIRIT PARTNER (>\$20,000 CASH)

Benefits

- Town inclusion on official OQM marketing collateral poster, program, website, advertising (TV, print and digital) and e-newsletter
- 5 Editorial based social media content
- Editorial in official pocket guide, including attractions, accommodation listings
- Self-drive itinerary promotion and town on OQM official touring map
- Dedicated Media Release announcing partnership with interview opportunities
- eDM to OQM database and Golf highlighting partnership and your local town
- 2 Outback Player Passes valued at \$300
- 8 Outback Spectator Passes valued at \$800
- Speaking opportunity at Player Presentation in your town
- Logo inclusion on Tee Signage displayed at various locations on the golf course
- Logo inclusion on Leaderboard displayed at each location
- Logo inclusion on Scorecard distributed to all players
- Logo inclusion on Partner page on OQM Website
- Professional photographer and videographer at each location
- Provision of event hi-res images and footage available post the event for each location worth \$4,800

OFFICER REPORT

TO: Council
SUBJECT: RADF Application for 'Landscapes with Lyn' workshop
DATE: 08.03.21
AGENDA REF: OCE02
AUTHOR: Mariella Perez - Community Development Officer

Sub-Heading

RADF Application for 'Landscapes with Lyn' workshop.

Executive Summary

The St George Arts Group requests \$1,450 from the Regional Arts Development Fund for the "Landscape with Lyn" workshop.

Background

The Regional Arts Development Fund (RADF) is a state and local government partnership that supports local artist and arts and cultural activities in Queensland Communities. Arts Queensland requires that the assessment process for RADF investment involve a diversity of community members including a diversity of demographics.

The 2020-21 RADF Grant Program Round 1 has been extended until 19 March 2021, however, this application was submitted before the decision for the extension. Council has received a completed application from the St George Arts Group for the "Landscapes with Lyn" workshop, a workshop that will teach participants how to create engaging landscapes with oils and pastels.

This show will provide an opportunity for members of the community to participate in an arts workshop, one of the very few art workshops that have been organised by community members after the ease of restrictions due to COVID-19. All members of the community are welcome to participate in this workshop.

This project aligns with two of the four local RADF priorities:

Priority	Objective
Place <input checked="" type="checkbox"/>	<ul style="list-style-type: none"> To create opportunities for the development of public expressions of community identity, heritage, local stories, or artistic expression
Accessibility to quality touring productions and exhibitions.	<ul style="list-style-type: none"> To engage touring productions and/or exhibitions to the region
Professional Development <input checked="" type="checkbox"/>	<ul style="list-style-type: none"> To nurture the creative and talented individuals in the Balonne Shire and encourage growth in their practice
Community Participation	<ul style="list-style-type: none"> <input checked="" type="checkbox"/> To foster personal, social and economic wellbeing and community connection by facilitating participation in arts and culture by all members of the community
	<ul style="list-style-type: none"> <input checked="" type="checkbox"/> Involve different, new or emerging art forms for the Balonne Shire.
	<ul style="list-style-type: none"> Target participants from demographics and segments of the community who have not historically participated in RADF funded programs or projects.

The total budget for the project is \$2,754 with the requested RADF investment of \$1,450.

The compliance assessment of the application has been completed by Mariella Perez - Community Development Officer. The application has been signed by appropriate parties and the applicant and venue have outlined how they will address any workplace health and safety issues, including a COVID-19 industry safe plan.

The application has been assessed by two (2) RADF Committee members in accordance with the Balonne Shire RADF program guidelines. The application has been determined to comply with the appropriate assessment criteria.

Key Foundation Area	Key Program Area
<u>Community</u>	Vibrant creative arts, music, local history and culture

Consultation (internal/external)

Internal

- Community Development & Cultural Services Manager – Elizabeth Jones
- Community Development Officer – Mariella Perez
- RADF Committee Chair – Cr R. Fuhrmeister
- RADF Committee Member
- St George Arts Group Treasurer – Kerry Hetherington

Legal Implications

Not applicable.

Risk Implications

Community Service - Inability to achieve Council's vision and mission to deliver community services and meet current and future needs.

Policy Implications

Balonne Shire Arts and Cultural Policy 2015-2018

Financial and Resource Implications

Each year, Council participates in an Arts and Cultural Development program. The program is funded by Arts Queensland, through a program called Regional Arts Development Fund, along with Council's contribution, this program is able to support these projects for the community.

In previous years (excluding 2020), through the RADF Community Program, Council has approved over thirteen applications, with over \$25,000 spent.

There are sufficient funds in the allocated RADF 20-21 Community Program Budget for Council to approve the full amount requested, the remaining funds for RADF 20-21 will be as follows:

RADF 2020-2021 (inc. 2019-2020 surplus)	\$52,676.00
Less Placemaking 20-21 allocated budget	<u>\$13,020.00</u>
TOTAL RADF Community Program 2020-2021	\$39,656.00
Less requested funding	<u>\$ 1,450.00</u>
RADF 2020-2021 Round 1 - Community Program remaining	\$ 38,206.00

The remaining RADF 2020-2021 Round 1 Community Program funds will be rolled over into the RADF 2020-2021 Round 2 Community Program, including the Placemaking 20-21 allocated budget.

Options or Alternatives

Not applicable.

4.2 Brief Project Description:	
Please use this section to describe the rationale and objectives of your project (maximum 200 words).	
<p>The objective of this workshop is for each participant to learn how to create an engaging landscape. The participants have the opportunity to create in both oils and pastels. The Art Group has been able to source Lyn Barnes who is an accomplished artist, tutor and owner of the Eagle gallery in Quilpie (http://www.lynbarnes.com/). The group was fortunate to do a pastel workshop with Lyn a few years ago and is a popular tutor for her generous sharing of knowledge and gifted teaching style. Lyn will use her knowledge and skill to simplify the process of creating beautiful landscapes. It will include passing on valuable principles of: observation and shape; importance of tonal values; using warm and cool colours to create mood in a landscape. Lyn will make this a fun as well as informative 2 day workshop. Having access to a professional tutor of Lyn's quality is a fantastic opportunity for the artist community particularly post Covid where a sense of normality and optimism can return in 2021. For our elderly members, who find it so difficult to travel it is an added bonus. Art is a wonderful way to keep the mind healthy and active. As this is a hands on workshop, tangible results will be achieved by the end of the weekend.</p>	
4.3 How will this project benefit you, your community or artists/cultural workers?	
Give a brief description about the results you expect from the project. Examples could be: skill development, community access, media coverage for your art form, professional development, innovation, new work, quality of life for the community.	
<p>The access to a professional tutor increases the knowledge and skills set of the participants. This is then transferred into art work for the Shire residents and travelling tourists to enjoy. There is a transfer of this knowledge on our monthly art days where artists get together and help each other fine tune their skills and produce paintings. These art works are then displayed for the community.</p> <p>The St. George Art Group currently supports several public outlets by regularly supplying paintings. The St. George Show, the Dirranbandi show, the Pop Up Gallery, Inland Legal Boardroom, Brushstrokes Exhibition, The Dragon Festival (when on), the Dirranbandi Art Show and the Anglican Art Show are all supported by our members. The Art Group also promotes these outlets through our Facebook page.</p> <p>We also hope to encourage new members from our community to join and we have been successful in this. We have continued to receive positive feedback from the Shire residents and travellers on the quality of the art work and with access to more professional help this will only improve.</p> <p>A weekend workshop is also a very sociable way to get interested artists together which can be difficult in such a large Shire. Our participants come from all over the Shire; St. George; Dirranbandi; Thallon; Nindigully; Mungindi; Bollon; Boolba and Begonia. Any post Covid event is a godsend to our Shire members. A weekend workshop with like-minded people is very beneficial to the wellbeing of the residents.</p>	
4.4 Please estimate the following	
Total number of activities involved (e.g. performance, workshop, etc.)	2
Total number of participants at event/activity	12-15

Regional Arts

Development Fund

2020 - 2021 Application Form

4.5 Please outline the steps you have taken to address the issues of workplace health and safety, public liability insurance, copyright and relevant licenses.

Our committee arrive early and together with the tutor arrange the work space to ensure that it is easily accessible and safe particularly for elderly members. All care is taken when applying art mediums.

There are no copyright or licence issues. We are unsure at this stage if the annex is available but will make every effort to ensure the safety of our members and participants.

4.6 How does your project adapt to current social and environmental issues?

Please use this section to describe how the project adapts to current issues that might be having a big impact in society and the way we live. (e.g. Climate change, pandemic, local protests)

We will ensure that proper safe Covid practices will be adhered to. There will be sanitiser provided and social distancing monitored. Art in its very nature keeps people well and truly distanced as you need considerable space to set up your easel and art supplies. The washing of brushes and your hands is something an artist must do regularly anyway to produce clean art work. Communal surfaces will be wiped down and santised after each use and we will put up signs to remind people of what is required as per the guidelines in a Covid safe event. It will not be difficult as this is not a large public gathering. Numbers are set by the tutor and are capped at 15.

Regional Arts Development Fund
2020 - 2021 Application Form

5. LIST THE ARTISTS AND ARTS WORKERS INVOLVED.

Please remember to attach the following four documents from each artist or arts worker receiving RADF funding:

- Resume or CV
- Eligibility Checklist for each Professional and Emerging Professional Artist
- Letter of confirmation and
- Schedule of fees

How many people in total will be employed (paid) through the project? 1

How many volunteers (unpaid workers) will be involved with the project? 4

Name	Role or position in project	Rate of pay (\$/hr, \$/day or \$/week)	Total fee whole \$	Amount to be funded by RADF
Lyn Barnes	Tutor	\$700/day	1400	1000
	Travel	\$299	299	150
	Accommodation	\$450	450	300
C. Carson	President volunteer	\$0	0	0
J. Hatch	Secretary volunteer	\$0	0	0
K. Hetherington	Treasurer volunteer	\$0	0	0
H. McKay	Publicity Officer volunteer	\$0	0	0
TOTAL (Transfer total salaries, fees and allowances to the expenditure column in the budget)			\$2149	
TOTAL (Transfer total RADF amount to the RADF expenditure column in the budget)				\$ 1450

Regional Arts Development Fund
2020 - 2021 Application Form

6. PROJECT BUDGET				
Please complete this budget template to account for all costs of your project. Round all amounts to whole dollars.				
The amounts requested in the third column (RADF) show how much RADF funding you are seeking for each expenditure item.				
Note: If you are GST registered Council will pay the grant plus GST. If you are registered for GST, your expenditure and income should be exclusive of GST. If you are not registered for GST, your expenditure should include the GST to be paid. <i>Please add the in-kind approximate value and consider in the Total.</i>				
EXPENDITURE	TOTAL COST of each expenditure item.	RADF	INCOME Income includes in-kind contributions and the total RADF grant you are seeking	TOTAL COST of each income item
Salaries, Fees and Allowances	\$	\$	Earned Income	\$
Lyn Barnes tutoring	1400	1000		
travel	299	150		
accommodation 3 nights	450	300		
Production/Program Costs ¹	\$	\$	Participant Contribution:	\$
				1000
Promotion, Documentation and Marketing	\$	\$	Contribution from Artists and Others (please note if this is in-kind)	\$
Administration ²	\$	\$	Other Cash Grants, Sponsorship, Fundraising & Donations	\$
Hire of annex or similar	285	N/A		
Catering based on 16 people @ \$20	320	N/A	In-Kind	304
		N/A		
RADF GRANT (total from column 3)		1450	RADF GRANT (total from column 3)	1450
TOTAL EXPENDITURE	2754	N/A	TOTAL INCOME	2754

Budget Notes

When you have completed your budget the Total Expenditure and Total Income must be equal. The RADF grant should be listed twice – once in the income column and once in the expenditure column.

PO Box 201 St George QLD 4487 or council@balonne.qld.gov.au**

Regional Arts Development Fund
2020 - 2021 Application Form

Eligibility Checklist: Professional / Emerging Professional Artists

A separate Eligibility Checklist must be completed by each artist who will be paid salaries, fees or allowances from the RADF grant. Please make copies of this Checklist as required.

The purpose of the RADF Program is to support professional and emerging professional artists and artworkers to practise excellent art for and with communities for mutual development.

This checklist has been developed to ensure that the status of artists as 'professional' and 'emerging professional' is clearly identified.

Your responses to the questions below determine your status as an artist in regard to the RADF Program.

You need to tick **three** or more of the artistic merits below to qualify as an artist with a professional or emerging professional status.

If you cannot select a minimum of **three** of the artistic merits, you do not meet the eligibility requirements as a professional or emerging artist who can be funded by the RADF program.

In this case please contact your local RADF Liaison Officer to discuss alternative funding sources to support your arts activity/project.

Artist, or Artworker NAME: MYN BARNES

Please tick the following artistic merits that apply to you

I have professional arts and/or cultural qualifications

I have an Australian Business Number (ABN)

7 4 7 2 4 0 6 3 7 7 9

I have devoted significant time to arts practice.

I have been recognised as a professional by peers.

I have held public exhibitions or given public performances (not as part of a competition).

I have work held in public collections.

I have won important national and/or international prizes or awards.

I have held public discussions and/or have had articles written about my work.

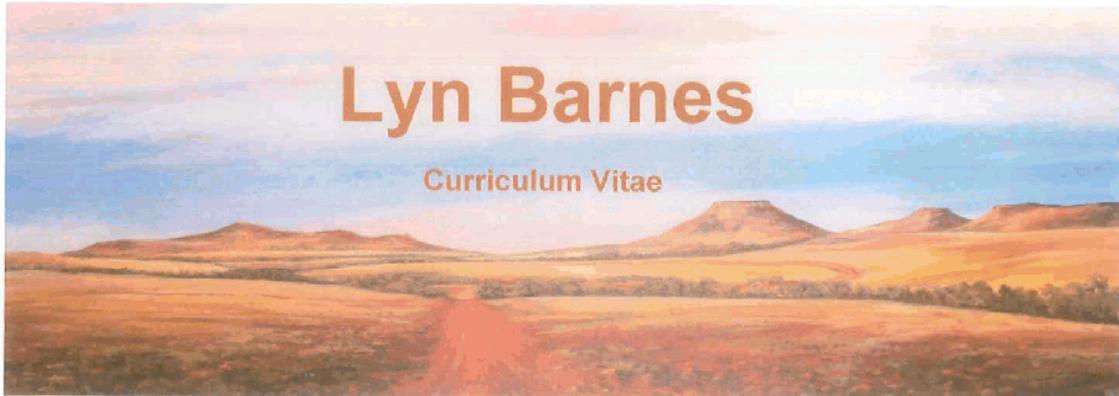

I have been commissioned or employed on the basis of art skills and/or earning income from sales of art work.

I am a member of a professional association (or associations) as a professional artist.

Name/s of association/s:

I am an artist whose artistic or cultural knowledge has been recognised as professional by peers or the cultural community.

I am an artist whose artistic or cultural knowledge has developed through oral traditions.

The arid landscape of outback Queensland has been inspiration for artist Lyn Barnes since she began painting over twenty-five years ago. Her work is recognised for its vivid depiction of not only the intense blue skies and red earth of her home, but also of the people of the area that is sometimes referred to as Heartbreak Corner.

Since opening her first gallery in Quilpie in 1993, Lyn's work has become popular with outback travellers as they collect her pictures to remind them of their experiences. Successful annual exhibitions in Brisbane have proved to Lyn that Australians who live in cities still have a love of outback landscapes and lifestyle.

The paintings Lyn produces in her studio at in Quilpie are held in both private and corporate collections throughout Australia and overseas. She is regularly engaged by art groups as a tutor.

Exhibitions

1993/96 Robbo's Opals, Quilpie

OFFICER REPORT

TO: Council

SUBJECT: Audit & Risk Committee Minutes 25 February 2021

DATE: 08.03.21

AGENDA REF: FCS2

AUTHOR: Michelle Clarke - Director Finance & Corporate Services

Sub-Heading

Audit & Risk Committee minutes 25 February 2021

Executive Summary

The Audit & Risk Committee met on 25 February 2021 and the purpose of this report is to receive and note the minutes.

Background

The Audit & Risk Committee met on 25 February 2021 and the meeting considered the following items:

- Interim Audit Report 2020/21
- QAO Briefing Paper for February 2021
- External Audits Conducted 2020/21
- Non-Current Asset Accounting Policies, Guidelines and Standards
- Internal Audit – Service Requests and Complaints Management
- Internal Audit Progress Reports

The milestones to be met for external audit are shown over page.

<u>Governance</u>	High levels of accountability and compliance

Consultation (internal/external)

Arabon Audit & Assurance Services, Internal Auditors
 Prosperity Advisors, External Auditors
 Queensland Audit Office
 Senior Leadership Group

Legal Implications

Section 105 of the Local Government Act 2009 requires Council to have an internal audit function. Council has established its Audit & Risk Committee in accordance with Section 211 of the Local Government Regulations 2012.

Risk Implications

Financial Impact - Inability to achieve financial sustainability and meet current and future needs of the community.

Policy Implications

Nil

Financial and Resource Implications

The timeframes to meet external audit requirements are shown below:

6. Key milestones

We have engaged with management and Ms Michelle Clark, Director Finance & Corporate Services to establish the following key financial and audit reporting deadlines. Strong collaboration will ensure that these deliverables are mutually achievable by management and audit.

	Planning	
	External audit plan	19 February 2021
	Interim	
	Interim testing visit	6 April 2021
	Draft proforma financial statements	30 April 2021
	Asset valuations completed	30 April 2021
	Accounting papers on known accounting issues	
	- New Accounting Standard (AASB 1059)	30 April 2021
	- Accounting for provision of Landfill	30 April 2021
	Feedback on accounting papers	
	- New Accounting Standard (AASB 1059)	31 May 2021
	- Accounting for provision of Landfill	31 May 2021
	Feedback on proforma financial statements	31 May 2021
	Interim report	31 May 2021
	Asset valuations reviewed by audit	31 May 2021
	Final	
	Complete draft financial statements to audit	6 September 2021
	Year-end visit	15 September 2021
	Feedback on draft financial statements to client	10 September 2021
	QAO closing report issued to client	1 October 2021
	Audit committee clearance	8 October 2021
	Management signs financial statements	8 October 2021
	QAO signs independent audit report	11 October 2021
	Final management report	11 October 2021

Note: Audit visit | Council deadline | QAO deadline

Recommendation/s

That Council resolves to:

- a) receive and note the Audit & Risk Committee minutes of 25 February 2021; and
- b) adopt the Non-Current Asset Accounting Policy together with the following guidelines
- c) and standards:
 - Guideline A - Accounting for Non-Current Assets on Initial Acquisition
 - Guideline B - Accounting for Expenditure after Acquisition
 - Guideline C - Accounting for Depreciation and Amortisation
 - Guideline D – Accounting for Revaluation of Non-Current Assets
 - Guideline E - Accounting for Impairment of Non-Current Assets
 - Financial Asset Data Standards

Michelle Clarke

Director Finance & Corporate Services

Non-Current Asset Accounting Policy

1. POLICY STATEMENT

The Non-Current Asset Accounting Policy dictates the required accounting treatment of non-current assets that provide future economic benefits to Balonne Shire Council and the community.

2. PRINCIPLES

To ensure that there is a standardised approach adopted when accounting for non-current assets, in accordance with relevant Australian Accounting Standards and other State Government requirements.

3. SCOPE

The Non-Current Asset Accounting Policy, which encompasses the associated Guidelines and Appendices listed under the related documents section in this policy, applies to the line items of property, plant and equipment and assets held for resale as disclosed within Council's Statement of Financial Position.

This policy generally impacts upon all Council employees and contractors. Specifically, the policy is directly applicable to Asset Custodians and Council officers who have asset management and asset accounting responsibilities.

This policy will be applicable when performing the following functions:

- Acquiring, constructing or developing a non-current asset;
- Accounting for costs incurred in maintaining a non-current asset;
- Renewing, replacing or enhancing the service potential of a non-current asset;
- Revaluing non-current assets;
- Disposal of non-current assets;
- Accounting for the depreciation or amortisation of non-current assets;
- Establishing the useful life and residual value of non-current assets;
- Testing non-current assets for impairment.

This policy does not apply to receivables, inventory or investments.

4. RESPONSIBILITY

Director Finance and Corporate Services

Non-Current Asset Accounting Policy

5. POLICY

Asset Classes

An asset class is a grouping of non-current assets in the financial asset register of a similar nature and the lowest level of information on non-current assets included within Council's financial statements.

The following asset classes are reported by Council:

- Land
- Buildings and Other Structures
- Plant and Equipment
- Transport Infrastructure
- Water Supply Network
- Urban Waste Water Network

(Refer Financial Asset Data Standards for comprehensive list of all items within each Asset Class)

Asset Recognition Criteria

For an item to be recognised as a non-current asset in Council's financial asset register it must meet all of the following criteria:

- Council has control over the asset;
- It is probable that future economic benefits associated with the item will flow to Council;
- The cost or fair value of the asset can be measured reliably;
- The cost or fair value exceeds Council's asset recognition threshold.

(Refer to Guideline A for further details and guidance)

Asset Recognition Thresholds

Recognition thresholds to be applied on initial recognition of an asset are as follows:

Asset Type	Threshold
Land	No threshold
Plant & Equipment	\$5,000
Buildings & Other Structures	\$10,000
Transport Infrastructure	\$10,000
Water Supply Network	\$10,000
Urban Waste Water Network	\$10,000
Intangible Asset	\$10,000

For infrastructure assets that have been componentised, the above asset recognition thresholds apply to the individual asset components and not the aggregate asset value (i.e. the financial asset as a whole).

Non-Current Asset Accounting Policy

Any asset acquisition/construction costs that fall below the recognition threshold should be expensed and, as such, not recognised within the financial asset register. Similarly, any contributed or donated asset valued on acquisition below the recognition threshold should not be financially recognised.

Asset Componentisation

AASB 116 requires each component with a cost that is significant in relation to the total cost of the item of property, plant and equipment to be separately identified and depreciated. This results in more accurate costs being allocated to the financial period to which they relate.

This asset componentisation approach is applied to complex assets, which are defined as “*physical assets that are capable of disaggregation into separate and identifiable **significant** components*”.

For the purposes of this policy, Balonne Shire Council’s complex assets are deemed to include:

- special purpose buildings,
- roads,
- water distribution network
- urban waste water network

A special purpose building is defined as one that has been designed for a specific function and has a unique design or layout which cannot be readily converted to other uses without significant capital investment. According to Queensland Treasury, examples of specialised buildings would include hospitals and correctional facilities, whereas residential dwellings and general office buildings would not be considered as special purpose¹.

Materiality

According to AASB 1031 *Materiality*, the notion of materiality guides the margin of error that is acceptable in the amount attributed to an item or an aggregate of items and the degree of precision required in estimating the amount of an item or an aggregate of items.

AASB 1031 suggests that an amount of less than 5% would be considered immaterial, whilst an amount of 10% or greater would be considered to be material. The range in-between 5% and 10% is a matter of professional judgement, and is at the discretion of the entity to adopt an approved approach.

Balonne Shire Council has elected to adopt a materiality threshold of 5% for the purposes of its Non-Current Assets. Any movement that is greater than 5% but less than 10% will be considered on a case by case basis.

Costs incurred after Initial Recognition

Costs on assets incurred after initial recognition are to be capitalised whenever the associated work improves the condition of the asset beyond its originally assessed standard of performance or capacity. This occurs when the costs either renews, extends or upgrades the asset’s underlying service potential.

¹ Queensland Treasury – Non Current Asset Policies for Queensland Public Sector – December 2014

Non-Current Asset Accounting Policy

Outlays that do not meet the criteria for recognition as an asset must be expensed as incurred. For example, expenditure that merely repairs damage or wear and tear that would have prevented the asset reaching its original estimated useful life, must be expensed as repairs and maintenance.

(Refer to Guideline B for further details and guidance)

Asset Valuation Method

All Council assets that qualify for recognition are to be initially measured at cost. However, where an asset is acquired at no cost (contributed/donated) or for nominal cost, the value is deemed to be its fair value at the date of acquisition.

Fair Value is deemed to be either:

- Market Value if there is market evidence; or
- Depreciated Current Replacement Cost if there is no market evidence.

Where an asset was acquired in prior financial years and has yet to be recorded in Council's financial asset register, the asset is to be brought to account at the fair value as at the date of recognition.

The valuation method(s) applicable to each Asset Class subsequent to initial recognition is as follows:

Asset Class	Valuation Method
Land	Market Value
Plant & Equipment	Cost
Buildings & Other Structures	Depreciated Replacement Cost / Market Value
Transport Infrastructure	Depreciated Replacement Cost
Water Supply Network	Depreciated Replacement Cost
Urban Waste Water Network	Depreciated Replacement Cost
Intangible Asset	Cost

Depreciation or Amortisation Method

The straight-line depreciation or amortisation method is adopted by Council to reflect patterns of consumption for all non-current assets other than road earthworks and parcels of land, which are not subject to depreciation.

(Refer to Guideline C for further details and guidance)

Review of Depreciation and Amortisation Parameters

Asset depreciation and amortisation parameters, including useful lives, asset condition (used to assess remaining useful lives) and residual values are to be reviewed with sufficient regularity to ensure that they are representative of current conditions and expectations at the end of each financial year.

Remaining useful life of an asset should be reassessed whenever a major addition or any significant partial disposal occurs.

(Refer to Guideline C for further details and guidance)

Non-Current Asset Accounting Policy

Asset Revaluations

AASB 116 *Property Plant and Equipment* requires regular comprehensive revaluations be performed to ensure the carrying amount of the financial asset class does not differ materially from its fair value at the end of each reporting period. Such comprehensive "full" revaluations should incorporate all underlying assets within the asset class.

The frequency with which comprehensive revaluations are to be performed can be no more than once every five years. However, the guiding principle for determining the appropriate revaluation frequency is ensuring that the carrying amount does not differ materially from the fair value of that class of assets at that same date.

In between comprehensive revaluations, an annual interim desktop review of Council's non-current asset classes is to be conducted in order to validate that there has not been a material movement in the values of the underlying assets since the last full revaluation.

In alignment with Council's approach to materiality, an overall cumulative movement (either positive or negative) of greater than 5% since the last comprehensive revaluation would be considered as material. This would be determined by undertaking a comparison of the cumulative increment/decrement from interim reviews against the value of the financial asset class as a whole.

A material cumulative movement for a financial asset class would trigger the need for an interim indexation to be applied to all assets within that class.

(Refer to Guideline D for further details and guidance)

Asset Impairment

AASB 136 *Impairment of Assets* requires a review to be undertaken each financial year of Council's non-current assets to determine whether there have been any indicators of asset impairment.

Indicators of asset impairment relevant to Council would generally fit into one of the following categories:

- Sudden natural event such as a flood, earthquake, major bush fire, tsunami or severe storm
- Prolonged natural event such as drought or rain
- Major damage to an asset caused through an accident, arson or inappropriate use
- Change to the extent or manner in which an asset can be used
- Change to an asset's technological, market, economic or legal environment

Whenever it is determined that there have been indicators of asset impairment, impacted assets should be identified and an impairment test should be undertaken on those assets.

Exceptions to undertaking an impairment test are as follows:

- Whenever an impacted asset has been destroyed or subsequently removed from service following an irregular event or catastrophe. In such circumstances the asset should be accounted for as a disposal.
- Whenever an impacted asset requires treatments that are not of a capital nature following an irregular event or catastrophe. Examples from a flood event would include treatments such as road formation grading, pothole repairs and desilting of structures.
- Whenever an impacted asset has had capital works undertaken following an irregular event or catastrophe to restore it back to its pre-event level of service prior to financial year end.

Non-Current Asset Accounting Policy

In alignment with Council's approach to materiality, Council adopts a materiality threshold for asset impairment of 5%. This would be determined by undertaking a comparison of total assessed impairment loss for the impacted assets for the financial year against the value of the financial asset class as a whole.

Where this total assessed impairment loss is more than Council's adopted materiality threshold, AASB 136 requires the impairment loss to be treated as follows:

- Firstly offset the impairment loss against any asset revaluation surplus for the applicable financial asset class;
- Any balance should then be recognised as an expense within the Statement of Comprehensive Income.

(Refer to Guideline E for further details and guidance)

Non-Current Asset De-recognition

A financial asset is to be derecognised in the financial asset register whenever:

- The asset is destroyed, abandoned or decommissioned with no future economic benefit expected to be generated from its use;
- The asset is scrapped, sold or traded;
- The asset is lost or stolen; or
- Control of the asset is transferred to another entity.

All assets derecognised from the financial asset register require authorisation by the Asset Custodian.

Partial de-recognition of an infrastructure asset is to occur whenever:

- A significant component or section of an infrastructure asset is destroyed, abandoned or decommissioned with no future economic benefit expected to be generated from its use; or
- Major renewal works have been undertaken resulting in a significant component or section of an infrastructure asset being replaced.

Asset Stocktakes / Reconciliations

Stocktake of assets (also known as asset verifications) are to be undertaken on a regular basis.

The nature of some asset classes, such as buildings, land and infrastructure assets, is such that the asset cannot be physically removed. Such assets are subject to regular physical inspection for Asset Management Planning purposes and a sample are inspected for revaluation purposes. As such they do not require a separate physical stocktake.

For these asset classes the financial asset register is to be reconciled to asset management component register(s) at a minimum at the point of full revaluation of the financial asset class, or more regularly where possible. For the remaining asset classes it is necessary to verify the existence of assets on a regular basis. In undertaking the asset verification process, it is expected that the assets are sighted. Assets not located during this process are to be written off in that year.

Non-Current Asset Accounting Policy

Stocktake frequency is as per the following schedule:

Asset Class	Stocktake Frequency
Plant & Equipment	Annual Basis
Intangible Assets	Annual Basis

Portable and Attractive Items

Certain items that have values below the asset recognition threshold are, by their nature, susceptible to theft or loss. Such items, termed "portable and attractive", may include personal computers, cameras, power tools, etc. Such items are not reported in the Council's Balance Sheet as they are expensed in the year of purchase.

Department Managers are responsible for determining the need to create and maintain a separate portable and attractive items register for the assets under recognition threshold that are managed within their area.

Work In Progress

Work in progress costs for each project/job are to be monitored on a monthly basis.

When the project reaches practical completion and the asset(s) are in operation, Council will strive to ensure that any costs for those assets are cleared from the work in progress balances and capitalised to the financial asset register in a timely manner.

6. LEGISLATION

State Government Legislation

- Local Government Act 2009
- Local Government Regulation 2012
- Land Act 1994 (revised November 2014)

Australian Accounting Standards

- AASB 5 – Non-current Assets held for Sale and Discontinued Operations
- AASB 13 – Fair Value Measurement
- AASB 101 – Presentation of Financial Statements
- AASB 116 – Property, Plant and Equipment
- AASB 117 – Leases
- AASB 136 – Impairment of Assets (Encompassing Pronouncement AASB2016-4)
- AASB 138 – Intangible Assets
- AASB 1031 – Materiality

Non-Current Asset Accounting Policy

7. POLICY REVIEW

Review of this policy will incorporate relevant legislation, documentation released from relevant state agencies and best practice guidelines.

The standard review period will be every two years from the effective date, however may occur sooner if there is a change in legislation, accounting standards or other relevant guidelines.

8. ASSOCIATED DOCUMENTS

Guidelines to the policy

Guideline A - Accounting for Non-Current Assets on Initial Acquisition

Guideline B - Accounting for Expenditure after Acquisition

Guideline C - Accounting for Depreciation and Amortisation

Guideline D – Accounting for Revaluation of Non-Current Assets

Guideline E - Accounting for Impairment of Non-Current Assets

Other supporting documents

Financial Asset Data Standards

Non-Current Asset Accounting Policy

DEFINITIONS

Amortisation – The systematic allocation of the cost of an intangible asset (less any residual value) over its useful life to reflect patterns of periodic consumption of the asset.

Asset – Future economic benefits controlled by Council as a result of past transactions or other past events.

Asset Class – Grouping of non-current assets of a similar nature and the lowest level of information on non-current assets included within Council's financial statements.

Asset Componentisation – Some types of assets need to be componentised into the parts that make up that asset to allow for condition assessment and determination of depreciation expense. Each component should be significant in cost, and have a different useful life or depreciation pattern (E.g. Road Surface, Pavement and Formation).

Asset Custodian – The Officer in Council who has day-to-day responsibility for managing an asset.

Asset Lifecycle – The total period from when an asset is initially created till its final disposal. It includes all activities such as acquisition, maintenance, renewal, upgrade and disposal.

Asset Management Register – A repository of component level asset information used primarily for asset management purposes.

Asset Impairment – Decrease in service potential of an asset as a consequence of an irregular event or catastrophe, resulting in its recoverable amount being less than its carrying amount.

Asset Recognition – The process whereby a non-current asset is included in the financial asset register and therefore recognised in Council's Statement of Financial Position.

Capital Expenditure (CAPEX) – Expenditure on a non-current asset which meets the adopted recognition criteria for the Asset Class or Asset Component. Capital expenditure includes expenditure on new assets as well as upgrade/expansion or renewal expenditure on existing assets.

(Capital) New Expenditure - Expenditure which creates a new asset that did not exist beforehand. As it increases service potential it may impact revenue and will increase future operating and maintenance expenditure because of the increase in the Council's asset base.

(Capital) Upgrade/Expansion Expenditure - Expenditure that enhances an existing asset to provide additional service capability or a higher level of service or which extends the life of the asset beyond that which it had originally. Upgrade expenditure will increase operating and maintenance expenditure in the future because of the increase in the Council's asset base (e.g. widening the sealed area of an existing road, replacing drainage pipes with pipes of a greater capacity, enlarging a grandstand at a sporting facility, building extension etc.).

(Capital) Renewal Expenditure - Includes replacement expenditure. Expenditure on an existing asset, which restores the original service potential or which extends the life of the asset beyond that which it had originally. Renewal expenditure reinstates existing service potential and has no impact on revenue. Renewal expenditure may reduce future operating and maintenance expenditure if completed at the optimum time (e.g. resurfacing or re-sheeting part of a road network, replacing a section of a drainage network with pipes of the same capacity, resurfacing an oval, etc.).

Carrying Amount – The amount at which an asset is recorded (either at cost or fair value) within the financial asset register after deducting any accumulated depreciation and accumulated impairment losses. This is the same as an asset's written down value or net book value.

Complex Asset - A physical asset that is capable of disaggregation into separate and identifiable **significant** components.

Non-Current Asset Accounting Policy

Comprehensive Revaluation – The process whereby the fair value of all assets within an asset class are updated to reflect current market value or current replacement cost as well as reassessing remaining useful life and residual value.

Contributed Asset – An asset that is acquired by Council at nominal or no cost, usually by way of an agreement with property developers, through State Government arrangements or bequeathed to Council.

Cost – Amount of cash or cash equivalent paid or the fair value of any other consideration given to acquire an asset at the time of its acquisition or construction.

Control – Ability for Council to obtain benefits flowing from the asset and to restrict the access of others to those benefits.

Council – Balonne Shire Council

Decommissioning – Removal, demolition, or elimination of an asset's service potential, resulting from a specific management decision.

Depreciable Amount – The cost of an asset, or other amount substituted for cost, less its' residual or salvage value.

Depreciated Replacement Cost – The Gross Replacement Cost less any accumulated Depreciation. It reflects the level of remaining service potential embodied in an asset based on the current replacement cost.

Depreciation – The systematic allocation of the depreciable amount of an asset over its useful life which reflects the pattern in which the asset's future economic benefits are expected to be consumed by the entity

Design Life – Expected period of time an asset can be used based on its design characteristics. Can be greater than the period of time Council intends to use an asset.

Economic Life – The period over which an asset is expected to be economically useful to Council. For example, a vehicle may be replaced after 2 years for economic reasons even though its design life may exceed 15 years.

Fair Value – Equates to market value if a readily available market exists or depreciated current replacement cost where no market exists.

Financial Asset Register – the repository of financially recognised non-current assets and related information used primarily for financial accounting purposes.

Future Economic Benefits – In respect to not-for-profit entities such as Council, future economic benefits refer to the ability of an asset to provide goods or services in accordance with the organisation's objectives.

Intangible Asset – An identifiable non-monetary asset without physical substance.

Interim Revaluation Review – Desktop review of movements in unit rate elements and industry indices, with a determination being made as to whether a material movement has occurred whereby all asset values within the asset class would be adjusted by an indexation factor.

Infrastructure Assets – Typically large, interconnected networks or programs of composite assets. The components of these assets may be separately maintained, renewed, replaced or disposed of, so that the required level and standard of service from the network of assets is continuously sustained. Generally, the components and hence the assets, have long lives. They are fixed in place and rarely have any market value.

Maintenance Expenditure – Recurrent expenditure, which is periodically required to ensure that the asset achieves its useful life and provides the required level of service. It includes regular preventative maintenance as well as unscheduled emergency response for minor repairs. Maintenance expenditure is often referred to as routine maintenance

Non-Current Asset Accounting Policy

Market Value – The price that would be received to sell an asset in an orderly transaction between market participants, excluding transaction costs but inclusive of any transport costs.

Materiality – The margin of error acceptable and the extent of disclosure required when preparing general purpose financial reports. Information is considered material if its omission, misstatement or non-disclosure has the potential to influence the economic decisions of the users of these reports.

Net Book Value – The amount at which an asset is recorded (either at cost or fair value) within the financial asset register after deducting any accumulated depreciation and accumulated impairment losses. This is the same as an asset's carrying amount or written down value.

Non-Current Asset – An asset held by Council for use rather than exchange and which provides an economic benefit for a period greater than one year.

Operating Expenditure – Recurrent expenditure such as power, fuel, staff, materials, cleaning, minor equipment, on-costs, overheads, maintenance and depreciation. These costs are the day to day expenses associated with providing the service during a year of operations.

Recognition Threshold - The minimum amount whereby the value of a non-current asset must be capitalised. Amounts below the recognition threshold are to be treated as an expense.

Recoverable Amount – The higher of an asset's fair value less cost to sell and its value in use.

Remaining Useful Life – The time remaining until an asset ceases to provide the required level of service or reaches the end of its economic usefulness, irrespective of the period an asset has been in use or its design life or initial useful life when first recognised.

Gross Replacement Cost – The current cost of replacing the total potential future economic benefit of the existing asset using either reproduction or modern equivalents after taking into account any differences in the utility of the existing asset and the modern equivalent.

Residual Value (Salvage Value or Scrap Value) - The estimated amount that would be obtained today by Council from the disposal of an asset, after deducting the estimated costs of disposal (where applicable), if the asset were already of the age and in condition expected at the end of its useful life.

Service Potential – The capacity to provide goods and services in accordance with Council's objectives.

Useful Life – The period of time over which an asset is intended to be used by Council, which is estimated when the asset is initially put into service.

Whole of Lifecycle Cost – all of the costs associated with control of an asset. They include the costs of acquisition, operation, maintenance, renewal, upgrade and disposal.

Work in Progress (WIP) – refers to the accumulated costs for materials, labour, and overheads that have been incurred for the acquisition and/or construction of an asset that is yet to reach completion and be placed into service.

Written Down Value – The amount at which an asset is recorded (either at cost or fair value) within the financial asset register after deducting any accumulated depreciation and accumulated impairment losses. This is the same as an asset's carrying amount or net book value.

CHAIR

Balonne Shire Council

2021 External audit plan

05 March 2021

Your ref:
Our ref: BSC-2021
LM/MC 2-506

SENSITIVE

05 March 2021

Mr M Magin
Chief Executive Officer
Balonne Shire Council
PO Box 201
ST GEORGE QLD 4487

Dear Mr Magin

2021 External audit plan

We present to you our external audit plan for Balonne Shire Council for the financial year ending 30 June 2021. It includes an analysis of key audit risks, our planned audit response, the financial reporting and audit deliverables timetable and other matters.

The purpose of the audit is to express opinions on the 2021 financial statements. Our audit of the financial report does not relieve management from its responsibilities to:

- prepare financial statements in accordance with the applicable reporting framework
- develop internal controls to prepare financial statements free from material misstatement
- comply with prescribed legislative requirements
- provide our auditors full and free access to all documents and property of your entity.

We formulated this audit plan based on our understanding of Balonne Shire Council's business and the sector it operates in. Our plan focuses on the material components of your financial report. It targets those areas that have, in our view, the highest risks of material misstatement due to fraud or error. We reassess our audit program throughout the year to address any emerging risks and to ensure our audit effort remains focused.

If you have any questions or would like to discuss the audit plan, please contact me or Alex Hardy on 3007 1900.

Yours sincerely

Luke Malone
Partner, Prosperity Audit Services

Enc.

cc. Councillor Samatha O'Toole, Mayor, Balonne Shire Council
Mr James Hetherington, Audit Committee Chair, Balonne Shire Council

1. Summary

This audit plan documents our assessment of Balonne Shire Council's business and financial reporting risks and our audit responses to these risks. Our audit does not guarantee that every amount and disclosure in the financial statements is free from error. Our aim is to identify material errors and omissions, which might adversely affect the needs of users of your financial statements.

Our audit may also consider your accountability for the use of public moneys, which includes our assessment of:

- compliance with relevant acts, regulations, government policies and prescribed requirements
- acts or omissions that result in a waste of public resources
- and the probity and propriety of matters associated with the management of Balonne Shire Council.

SENSITIVE

2. Your business environment

In developing this audit plan, we met with management, reviewed internal reports, considered previously identified issues and analysed financial and other relevant information. Key observations informing our audit responses to significant risk areas are highlighted below.

Business developments

- Wild Dog Exclusion Fence Project Progress. Round 2 of the special rate scheme will commence on 1 July 2020 with approved applicants at an estimated cost of up to \$4.6m. The projects in Round 1 are valued at \$3.2m and are progressing with a number of properties now complete.
- The Digital Connectivity Project that Council has partnered with the Federal Government funding and Field Solutions Group is gaining momentum and will result in an investment of more than \$2m to improve the digital connectivity across the Shire.

Strategic objectives

- Connected, innovative communities, where economies are strong and opportunities are abundant.
- To invest in people, ignite ideas, meet our challenges and grow prosperity.

Revenue/expense drivers

- Federal Roads to Recovery funding has been brought forward and will increase in the short to medium term. This funding in the larger term is dependent on the Federal Government's commitment to continue this program.
- Capital works have been reviewed against proposed forward plans and budgets and are in line with recent grant funding approvals.
- Council has successfully increased the value and number of grants from State and Federal Government with over \$30m in current funding.

Balance sheet drivers

- Council maintains a strong cash position.
- The February 2020 flood event has impacted significantly on roads and a claim is currently awaiting approval with the Queensland Reconstruction Authority for an amount of \$20m.

Impact of COVID19

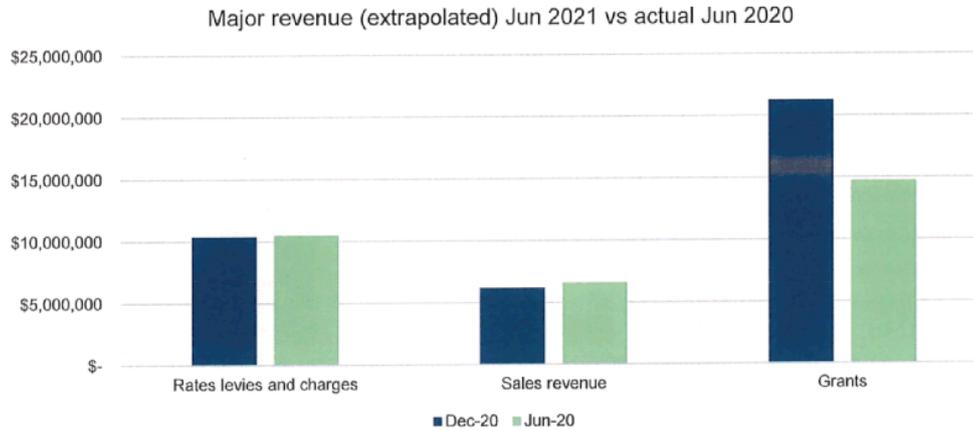

From discussions with management, there is no material impact on "everyday" internal controls on the Balonne Shire Council due to COVID-19. All the control procedures in place are consistent with the prior year and the staff had no issues working remotely. We also confirmed with Council management that the overall information technology risks remained the same during the current year. There was no impact on the Council due to COVID-19 with respect to cyber security.

2. Your business environment (cont.)

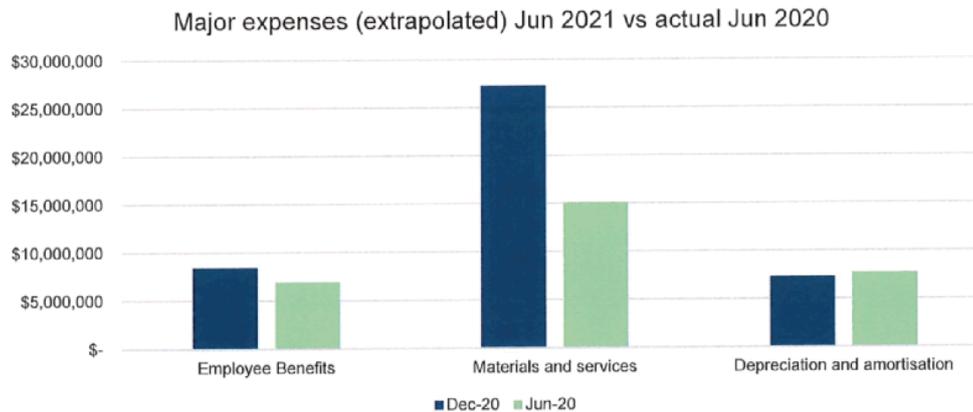

Major revenue comparison (extrapolated) June 2021 and actual June 2020

The increase in revenue from extrapolated Dec 2020 compared to 2020 is mainly driven by an increase of grants and subsidies. The increase in grants revenue is mainly attributable to additional funding received for the Local Roads Community Infrastructure project, COVID-19 Works for Queensland funding, and Disaster Recovery funding.

Major expenses comparison (extrapolated) June 2021 and actual June 2020

The increase in expenses are significantly attributable to increase in materials costs and services and this is due to several capital projects commencing in the 2021 year. They include St George General Aviation Projects, Drought community projects, Wild Dog Exclusion Fence Project and Asset management strategy project.

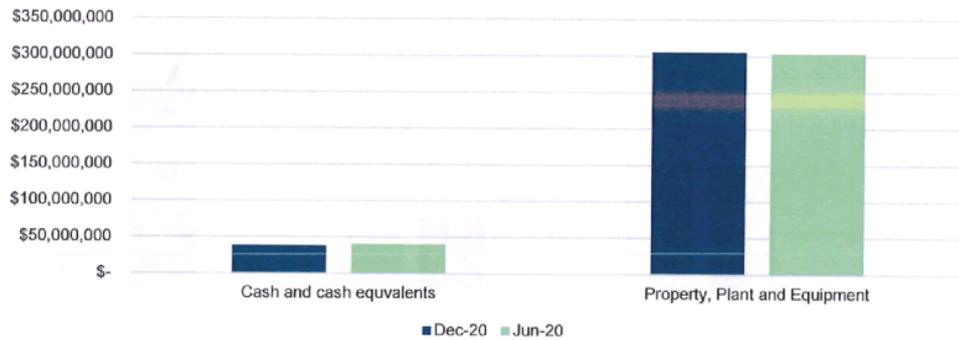

2. Your business environment (cont)

Major assets comparison Dec 2020 and Jun 2020

Major assets Dec 2020 vs Jun 2020

The total assets balance is materially consistent between December 2020 and June 2020. The slight decrease in cash is driven by the significant additional cost incurred in material and services, as well as employee costs of those capital projects commenced in the 2021 financial year. The increase in PPE was driven by fixed assets additions in the period.

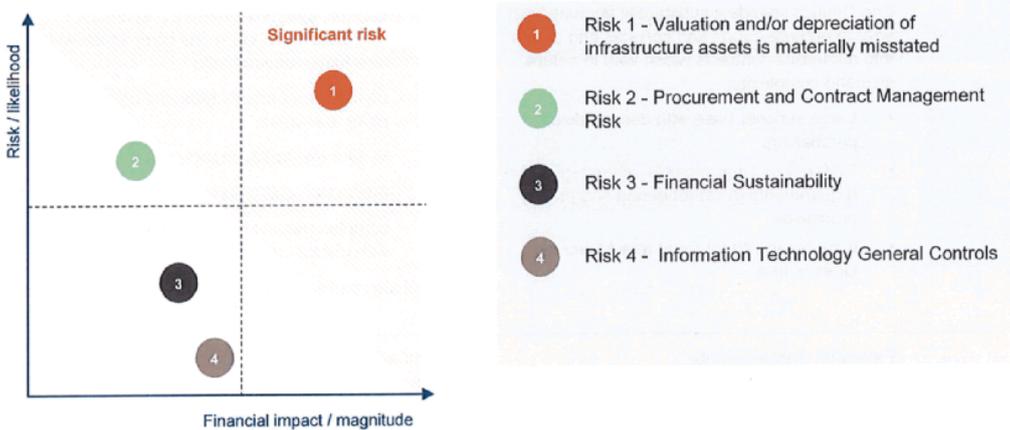

3. Areas of audit focus

We have identified items that present the greatest risk of material error to the financial statements. Risk is assessed in terms of the level of inherent risk (likelihood of occurring), and the financial impact (magnitude).

The chart below displays our risk assessments for the identified areas of audit focus. The table that follows outlines a description of the risk and the planned audit responses.

Risk	Description of risk	Audit response
1	<p>Valuation/depreciation of infrastructure assets is materially misstated</p> <p>The valuation of complex physical assets is inherently complex and susceptible to material misstatement. Misstatements can arise from:</p> <ul style="list-style-type: none"> providing the valuer with incorrect and/or incomplete instructions the valuer or the management not correctly applying the fair value principles in Australian Accounting Standards the valuer or the management applying inappropriate rates to determine current replacement cost the valuer or the management making incorrect assumptions about the remaining useful lives or not considering the condition of assets management incorrectly applying the revaluation increment/decrement in the asset register. <p>Management have indicated that no comprehensive valuation will be conducted for infrastructure assets in 2020–21 and that an index valuation assessment will be performed for all infrastructure assets prior to 30 April 2021.</p>	<p>We will assess:</p> <ul style="list-style-type: none"> the appropriateness of valuation techniques and assumptions adopted in determining fair value; and the appropriateness of useful life assumptions used in the calculation of depreciation.

3. Areas of audit focus (cont.)

Risk	Description of risk	Audit response
2	<p>Procurement and Contract Management Risk</p> <p>The Council spends a substantial amount each year to procure goods and services and enters into numerous contracts which vary in nature, size and complexity:</p> <ul style="list-style-type: none"> • Large supplier base with decentralised purchasing. • Undertakes large projects where legislative requirements guide tendering and probity processes. • Increase in vendor fraud attacks across Queensland. 	<p>We will assess:</p> <ul style="list-style-type: none"> • controls over procurement and contract management and assess compliance with legislative requirements • controls over credit cards and councillor reimbursements • vendor masterfile change controls • automated authorisation workflows • completeness of related parties and compliance with disclosure requirements. <p>We will also perform targeted analytics over expenditure.</p>
3	<p>Financial Sustainability</p> <p>Due to a limited rate base, Council has traditionally relied on external grants and subsidies to ensure ongoing financial sustainability. The following items also heighten the audit risk in relation to financial sustainability:</p> <ul style="list-style-type: none"> • Separate audit opinion issued on the current year financial sustainability statement. • Key inputs dependent on management judgement. • Public interest in financial sustainability of Councils. 	<p>We will assess:</p> <ul style="list-style-type: none"> • the appropriateness of assumptions used in determining the relevant financial information for these calculations, including renewals, depreciation and operating and capital classifications.
4	<p>Information Technology General Controls</p> <p>Australian Auditing Standards require the auditor to understand the Council's control activities and obtain an understanding of how it has responded to risks arising from Information Technology (IT).</p> <p>Weaknesses in the IT control environment may lead to:</p> <ul style="list-style-type: none"> • weakened segregation of duties where staff gain access privileges beyond those required for their role • unauthorised access • inaccurate and/or invalid transactions and data produced by systems • inappropriate/unauthorised changes to programs • inability to recover from incident or disaster impacting IT operation • inability of the audit team to place reliance on system controls and/or data/reports 	<p>For all systems relevant to financial reporting, we will:</p> <ul style="list-style-type: none"> • update our understanding of the IT general controls and IT dependencies and identify related risks relevant to our audit approach • understand, evaluate and where appropriate validate the IT general controls management has implemented to address these risks. <p>For example: access security, monitoring of privileged user accounts' activities, system software acquisition, change and maintenance, data processing recovery.</p>

3. Areas of audit focus (cont.)

Management override of controls and risk of fraud in revenue recognition

Management override of controls and risk of fraud in revenue recognition are always pervasive risks to the financial statements. Our assessment of the risk of management override of controls includes how those charged with governance (including elected officials) exercise oversight of management's processes for identifying and responding to risk of fraud and the internal control that management has established to mitigate these risks.

We will obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through implementing appropriate responses.

Our audit response will be a combination of controls and substantive-based testing and include:

- evaluating key controls over manual journals and the extent of segregation of duties
- evaluating IT general controls
- assessing material accounting estimates and one-off items for management bias
- evaluating and testing effectiveness of key controls over revenue recognition
- testing a sample of revenue transactions during the year
- performing analytical procedures over revenue recognition.

We will also build an element of unpredictability into our work program meaning management will not be aware of all procedures prior to their execution.

3. Areas of audit focus (cont.)

Materiality

We use materiality to determine the nature, timing and extent of audit procedures for our audit and evaluate misstatements. We design our procedures to detect misstatements using the performance materiality level and report items above the clearly trivial threshold to the Audit Committee. Some items may be reported based on their nature (qualitative reasons). These thresholds are assessed throughout the audit and may change should the underlying benchmark or our risk assessments change significantly.

Our planning materiality thresholds are disclosed below.

Overall materiality	Performance materiality	Clearly trivial threshold
\$430,000 (2020 - \$294,400)	\$322,500 (2020 - \$220,800)	\$32,500 (2020 - \$24,400)
Specific – Property, Plant & Equipment		
\$4,500,000 (2020 - \$4,400,000)		

Benchmarks

We have assessed materiality considering a range of benchmarks. Based on our preliminary assessment of the risks, consistent with the prior period, we have used **1% of total expenses** as our benchmark for overall materiality. The materiality number above is calculated based on the December 2020 Council Management Accounts.

Financial sustainability

For the current year financial sustainability statement, we assess materiality on a mix of qualitative and quantitative factors, including the percentage deviation from the target range.

4. Other audit considerations

Commonwealth certificates

Each year, we are required under Part 8 of the *National Land Transport Act 2014* and sub section 6.2(b) of the *Roads To Recovery Funding Conditions 2014* agreement to provide an audit opinion on the Roads to Recovery grant acquittal.

Financial sustainability reports

We audit the sustainability ratios that are included in your current year financial sustainability statement to determine whether they are accurately calculated based on the council's general purpose financial report and the requirements set out in the *Financial Management (Sustainability) Guideline 2013*.

Our responsibility does not extend to forming an opinion on the appropriateness or relevance of the reported ratios nor on the council's future sustainability.

Note: Over the last few years QAO have made several recommendations to the Department of Local Government, through our various Reports to Parliament, about reviewing the financial sustainability ratios and target ranges. The department has indicated publicly that such a review will take place, but as yet we do not know when this will occur.

5. Prior year issues

Deficiencies in Internal control, financial reporting issues and other matters

Our risk ratings are as follows—refer to [Appendix A](#) for our rating definitions for more detail.

Internal control issues

Financial reporting issues

Significant deficiency	Deficiency	Other matters	High	Medium	Low

Reference	Rating	Issue	Status / Comment Action date
Internal control issues			
20CR-1		2020 Final Management letter – Issue 1 Council does not have a policy to determine how indexation results are considered and reflected in the fixed asset register and general ledger.	Work in progress. Draft Policy will be presented to audit & risk committee on 25 February 2021 and it is expected to be adopted by Council on 18 March 2021. Action date: 18 March 2021
19IR-2		2019 Interim Management letter – Issue 2 No formal IT incident & problem management policy in place.	Work in progress. The policy has been drafted by and is expected to be adopted by Council on 18 March 2021. Action date: 18 March 2021
19IR-4		2019 Interim Management letter – Issue 4 Lack of formal IT Disaster Recovery Plan.	Work in progress. Council is currently preparing the updated IT Disaster Recovery Plan and it is expected to be completed in Q2 2021. Action date: 30 June 2021
19IR-5		2019 Interim Management letter – Issue 5 Detailed contract registers to be developed	Work in progress. Council is currently reviewing contracts and preparing a detailed contract register that is expected to be completed in early 2021. A meeting is scheduled on 24 February 2021 to discuss with Vendor Panel of the options available to Council to improve contract administration. Action date: 30 April 2021
Financial reporting issues			
20CR-2		2020 Final Management letter – Issue 2 Classification of current and non-current borrowings is not correct.	Resolved pending audit clearance. The issue is now resolved. We will review this matter during our interim audit.

5. Prior year issues (cont)

Other matters

18-FML-9

2018 Final Management letter – Other matter
Excessive Leave Balances

Work in progress
Management is continuing to work with staff to reduce leave balances within operational requirements. As at 30 June 2020, there were 7 employees with leave balances that are deemed to be excessive.

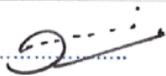

6. Key milestones

We have engaged with management and Ms Michelle Clark, Director Finance & Corporate Services to establish the following key financial and audit reporting deadlines. Strong collaboration will ensure that these deliverables are mutually achievable by management and audit.

	Planning	
	External audit plan	19 February 2021
	Interim	
	Interim testing visit	6 April 2021
	Draft proforma financial statements	30 April 2021
	Asset valuations completed	30 April 2021
	Accounting papers on known accounting issues	
	- New Accounting Standard (AASB 1059)	30 April 2021
	- Accounting for provision of Landfill	30 April 2021
	Feedback on accounting papers	
	- New Accounting Standard (AASB 1059)	31 May 2021
	- Accounting for provision of Landfill	31 May 2021
	Feedback on proforma financial statements	31 May 2021
	Interim report	31 May 2021
	Asset valuations reviewed by audit	31 May 2021
	Final	
	Complete draft financial statements to audit	6 September 2021
	Year-end visit	15 September 2021
	Feedback on draft financial statements to client	10 September 2021
	QAO closing report issued to client	1 October 2021
	Audit committee clearance	8 October 2021
	Management signs financial statements	8 October 2021
	QAO signs independent audit report	11 October 2021
	Final management report	11 October 2021

Note: **Audit visit** | **Council deadline** | **QAO deadline**

We recommend that you monitor these agreed timeframes and report to us any slippages that might result in a change as soon as possible. Please review, sign and return this page to Luke Malone by 12 March 2021 This will allow us to schedule our resources for your audit.

Name Matthew Magin Chief Executive Officer	Signed 	Date 05/03/2021
---	--	-----------------

7. Audit fees

Our proposed audit fee (exclusive of GST) is **\$43,600** (2020: \$38,300) for Balonne Shire Council. This is based on our planned audit program. We will bill our fee progressively as we complete each stage of our work.

The audit fee includes the following components.

Balonne Shire Council	
Financial audit	\$38,165
Travel	\$5,435
Total	\$43,600

Our fee estimate can be affected by:

- the effectiveness of your internal control environment
- the quality of draft financial statements and supporting workpapers
- significant accounting issues not raised with the audit team during planning
- whether the milestones are achieved within the agreed timeframes
- the availability of your management and staff, and the timeliness of their responses to audit issues.

We will discuss any anticipated variations to our fee with you during the audit.

8. Financial reporting maturity assessment

QAO has developed a financial statement preparation maturity model. This model replaces our previous assessment processes. The model brings scalability, responding to the client specific factors that influence reporting practices across the public sector. It aims to bring focus to areas of development to allow clients to reach their targeted positioning. The model also facilitates the sharing of better practices across the public sector.

The model outlines the key components that result in high-quality and timely financial reports, providing a maturity assessment for each of the components.

		Level of maturity			
		Developing	Established	Integrated	Optimised
Component	Quality month end processes and reporting	<p><i>Entities should set the level of maturity that is reflective of their size, complexity, age and structure.</i></p> <p><i>QAO does not expect that all entities will sit in the integrated and optimised categories, nor always aim to be in those categories. The cost of moving categories should always be considered in the context of the benefits that will be provided.</i></p>			
	Early financial statement close processes				
	Skilled financial statement preparation processes and use of appropriate technology				
	Timely identification and resolution of financial reporting matters				

Entities should establish an expectation of maturity that is commensurate with their business. The desired positioning of maturity will differ depending on the size and complexity, and available resources of each entity.

We encourage your entity to use our [self-assessment tool](#) to determine your expected level of maturity and benchmark actual level of maturity to expectation.

We will continue to report the outcomes of our assessments to those charged with governance. Any themes emerging across the public sector may be included in our reports to parliament.

We have included further details in our fact sheet. We welcome any feedback on our new financial reporting assessment tool.

Appendix A—our rating definitions

Internal control maturity assessments

We are developing a new approach to assessing internal controls, with a focus on the maturity of processes that are common across government entities—governance, risk management, information systems, asset management, procurement, grants management, change management and monitoring. This is intended to help entities assess their processes and highlight areas for improvement that are relevant to them.

As we develop maturity models, we will share them with you, and seek your feedback.

Over time our new maturity assessments will replace the current 'traffic light' assessments of internal controls. We will however continue to use our 'traffic light' assessment of internal controls for 2020–21—resulting in green, amber or red, depending on the number of deficiencies or significant deficiencies we raise.

Internal control 'traffic light' assessments for 2020–21

Our rating of internal control deficiencies allows management to gauge their relative importance and prioritise remedial actions. Based on the nature, type and assessment of internal control deficiencies we identify, we will then assess the effectiveness of your internal controls in line with the table below. This is unchanged from prior years.

Rating	Description
● Effective	No significant deficiencies identified
● Generally effective	One significant deficiency identified
● Ineffective	More than one significant deficiency identified

Appendix A—our rating definitions (cont.)

Internal control rating definitions

	Definition	Prioritisation of remedial action
Significant deficiency 	<p>A significant deficiency is a deficiency, or combination of deficiencies, in internal control that requires immediate remedial action.</p> <p>Also, we increase the rating from a deficiency to a significant deficiency based on:</p> <ul style="list-style-type: none"> the risk of material misstatement in the financial statements the risk to reputation the significance of non-compliance with policies and applicable laws and regulations the potential to cause financial loss including fraud, or where management has not taken appropriate timely action to resolve the deficiency. 	<p>This requires immediate management action to resolve.</p>
Deficiency 	<p>A deficiency arises when internal controls are ineffective or missing, and are unable to prevent, or detect and correct, misstatements in the financial statements. A deficiency may also result in non-compliance with policies and applicable laws and regulations and/or inappropriate use of public resources.</p>	<p>We expect management action will be taken in a timely manner to resolve deficiencies.</p>
Other matter 	<p>An other matter is expected to improve the efficiency and/or effectiveness of internal controls but does not constitute a deficiency in internal controls. If an other matter is not resolved, we do not consider that it will result in a misstatement in the financial statements or non-compliance with legislative requirements.</p>	<p>Our recommendation may be implemented at management's discretion.</p>

Financial reporting issues

	Potential effect on the financial statements	Prioritisation of remedial action
High 	<p>We assess that there is a high likelihood of this causing a material misstatement in one or more components (transactions, balances and disclosures) of the financial statements, or there is the potential for financial loss including fraud.</p>	<p>This requires immediate management action to resolve.</p>
Medium 	<p>We assess that there is a medium likelihood of this causing a material misstatement in one or more components of the financial statements.</p>	<p>We expect management action will be taken in a timely manner.</p>
Low 	<p>We assess that there is a low likelihood of this causing a material misstatement in one or more components of the financial statements.</p>	<p>We recommend management action to resolve; however, a decision on whether any action is taken is at management's discretion.</p>

Asset Accounting Guidelines

GUIDELINE A – Accounting for Non-Current Assets on Initial Acquisition

PURPOSE

The purpose of this guideline is to provide guidance for the initial recognition of non-current assets into Council's financial asset register.

Guidance is provided for the following:

- Types of Asset Acquisition
- Asset Recognition Criteria
 - Control Over an Asset
 - Probability of Future Economic Benefit
 - Measurement at Recognition
 - Asset Recognition Thresholds
- Assets Held for Sale

TYPES OF ASSET ACQUISITION

Circumstances resulting in a non-current asset being acquired by Council include:

- Acquisition involving consideration – such as purchased or constructed/developed assets
- Acquisition at no cost or for nominal consideration – such as contributed or donated assets
- Assets not previously recognised but subsequently identified through revaluation, stocktakes or other processes. These assets may have been originally purchased, constructed, contributed or donated

ASSET RECOGNITION CRITERIA

For an asset to be financially recognised in Council's books it must meet all of the following criteria:

1. Council has control over the asset
2. It is probable that future economic benefits associated with the asset will flow to Council
3. Cost or fair value can be measured reliably
4. Cost or fair value of the asset exceeds Council's asset recognition threshold

Asset Accounting Guidelines

1. Control over an asset

Council controls an asset if it has the power to obtain benefits flowing from the resource and to restrict the access of others to those benefits. Legal ownership is not mandatory for control to exist. The following questions provide assistance in circumstances where the determination of control is not straight forward:

- Does Council have the ability to use the asset to achieve its objectives?
- Does Council have the ability to restrict or charge access to the asset?
- Does Council have the authority to decide how the asset will be used?
- Is Council responsible for managing the asset's wear and tear?
- Does Council bear the risks associated with holding the asset?

Control over Council owned land and buildings leased to third parties

In respect of Council owned land and buildings leased to third parties, Council is deemed to have control where it retains substantially all the risks and rewards associated with the property. The status of leased assets is to be reviewed annually by Asset Custodians with any additional assets or exclusion of existing assets to be communicated to the Asset Accountant for appropriate recognition/de-recognition within Council's financial asset register.

Control over Contributed or Donated Assets

Council takes ownership of contributed land and buildings when the property is titled to Council.

For assets such as donated plant or equipment, control is deemed to occur when the item is formally handed over to Council.

Council gains control over contributed infrastructure assets upon commencement of the "On Maintenance" period. During the "On Maintenance" period, the assets are covered by a warranty and the developer is required to cover all costs to maintain the asset. Once Council completes the asset's final inspection, the asset will become "Off Maintenance" and all costs associated with managing and maintaining the asset are covered by Council.

2. Probability that Future Economic Benefits will flow to Council

The term future economic benefits refers not only to the potential of an asset to contribute directly or indirectly to the flow of cash or cash equivalents, but to the potential of the asset to contribute directly or indirectly to the ability to provide goods or services in accordance with Council's objectives.

Benefits can therefore arise from:

- Use of the asset
- Cash inflow
- Revenue from future sale
- Provision of goods and services
- Cost savings

Next Review Date>> ####

Asset Accounting Guidelines

In accordance with the relevant accounting standard (AASB 116), a benefit is deemed to be probable if it is more rather than less likely that it will eventuate.

For the majority of Council's non-current assets, particularly its infrastructure assets, future economic benefits effectively relate to the service potential inherent in the assets.

3. Reliable Measurement of Cost or Fair Value

All Council assets that qualify for recognition are to be initially measured at cost. However, where an asset is acquired at no cost such as contributed/donated assets or for nominal consideration, the cost is deemed to be its fair value at the date of acquisition.

Fair value is obtained via either:

- Market Value if there is a readily available market, or
- Depreciated Current Replacement Cost if there is no readily available market

Where an asset was acquired in prior financial years and has yet to be recorded in Council's financial asset register, the asset is to be brought to account at the fair value as at the date of recognition.

Section 206 (4) of the Local Government Regulation 2012 states that the following assets controlled by Council have no value for financial accounting purposes:

- (a) Reserves defined under the Land Act such as land parcels held in Trust (Crown/State land); and
- (b) Land under a road

In circumstances where reliable measurement of an asset cannot be obtained the asset is not to be recognised within the financial asset register.

Additional information on what constitutes cost, market value and depreciated current replacement cost is detailed below.

Measurement at Cost

The value of assets initially recognised at cost should include:

- Purchase price, including duties and taxes (excluding GST), after deducting discounts and rebates
- Any other cost directly attributable to bringing the asset to its location and condition

Costs capitalised into the financial asset register typically include:

- Contract costs for construction or development of an asset
- Labour costs for employees directly involved in the construction, development or acquisition of an asset. This includes any directly attributable labour oncosts
- Project management costs
- Costs of site preparation
- Design costs

Document No. >> (Insert Magiq Doc ID ###) Version No.###
Authorised by >> Director ###

Initial Date of Adoption >> ###
Latest Version Adopted: ###
Next Review Date>> ###

Asset Accounting Guidelines

- Initial delivery and handling costs
- Installation and assembly costs
- Interest on a loan directly funding a specific project, which is incurred during construction or development, where the interest is deemed material to the overall cost of the project
- Costs of commissioning the asset
- Directly attributable real estate fees, legal costs and associated professional fees
- Tender costs
- Costs for relocating or reinstating existing assets controlled by Council where:-
 - They are material in value; and
 - The asset being relocated is replaced, upgraded or subject to major renewal works as part of the relocation and reinstatement process

Costs not directly attributable to the cost of an asset and therefore not capitalised into the financial asset register include:

- Costs associated with feasibility studies, research studies, master plans, concept plans and investigations up to the point when Council formally decides that a capital project will be undertaken
- Costs of opening a new facility
- Costs associated with operating an existing asset
- Costs associated with decommissioning an existing asset when it is removed from service
- Costs of introducing a new product or service (including advertising and publicity)
- Periodic software maintenance and licence agreement charges
- Costs for relocating or reinstating existing assets controlled by Council where:-
 - They are not material in value; or
 - The asset being relocated is not being replaced, upgraded or subject to major renewal works as part of the relocation and reinstatement process
- Costs for relocating existing assets controlled by a third party. Relocation may be temporary or permanent. For example, costs to relocate Energex cabling during a road replacement project.
- Costs associated with the reinstatement of assets not controlled by Council. For example, reinstating the surface and pavement of State controlled roads as part of stormwater works.
- Inspection costs where no physical upgrade, refurbishment or replacement of an asset is undertaken. This includes any outlay associated with the assessment of asset condition.
- General administration costs

In some instances the capitalised cost of an asset should include an initial estimate of the cost of dismantling and removing the asset, and restoring the site on which it is located. The costs of dismantling and removing an asset should only be capitalised when:

- They can be reliably estimated
- Are material in amount or nature
- A clear obligation exists (predominantly through a legislative or environmental obligation) at the time an asset is first put into use

Asset Accounting Guidelines

Measurement at Market Value

Assets acquired at no cost or for nominal consideration are to be recognised in the financial asset register at the market value at acquisition date whenever a readily available market for the asset exists.

Preference is to be given to assessing market value in an active market for identical assets that Council can access at acquisition date (i.e. a **Level 1** fair value as prescribed within AASB 13). Identical markets would only apply to as new items of plant or equipment contributed or donated to Council.

Other asset types with a market value commonly contributed or donated to Council include land, buildings and second hand plant or equipment. Such assets would be valued with reference to other observable inputs, such as second hand markets for similar/identical assets or real estate markets. These valuations are considered to be **Level 2** fair values as prescribed within AASB 13.

As per AASB 13, **Level 2** fair values should also take into account:

- The condition and location of the asset acquired; and
- The asset's highest and best use.

As such, a market value should be obtained for assets in similar condition to the asset acquired by Council and, depending on its physical location, an adjustment may be required for transportation costs.

Any other type of transaction cost such as real estate or legal fees are specifically excluded as being part of market value by AASB 13.

Measurement at Depreciated Replacement Cost

Where assets are acquired by Council at no cost or for nominal consideration and a market value cannot be reliably obtained, the assets are to be recognised within the financial asset register at depreciated current replacement cost. Depreciated current replacement cost of an asset is the current replacement or reproduction cost less any accumulated depreciation.

Current replacement or reproduction cost of an asset is the minimum that it would cost Council in the normal course of business to replace an existing asset with a technologically modern equivalent (as opposed to a second hand asset) that provides commensurate economic benefits.

Reliable sources of information for determining current replacement cost are:

- Appropriately qualified and knowledgeable expert valuers
- Reference to industry standards such as Rawlinsons Construction Handbook
- Costs incurred by Council in the acquisition/construction of similar assets
- Expected costs of materials, services and labour sourced from appropriate suppliers and applied by appropriately qualified and knowledgeable Asset Custodians within Council

Valuations undertaken via these methods are deemed **Level 3** fair values under the provisions of AASB 13.

Asset Accounting Guidelines

Unit rates underlying current replacement cost are to reflect a ‘valuation’ methodology, whereby components included for financial accounting purposes comply with financial accounting principles and avoid the potential for double counting.

This can necessitate exclusion of some cost components that would be required for project costing and asset management purposes. Examples may include, but are not limited to the following:

- Demolition and disposal costs
- Relocation and reinstatement costs for other impacted Council assets

Accumulated depreciation can be determined via either a formal condition assessment (needed in circumstances where an asset has been in use for a significant period prior to financial recognition) or derived mathematically from the standard useful lives of relevant “as new” assets.

4. Asset Recognition Thresholds

To avoid insignificant non-current assets being recognised in the financial asset register Council applies the following recognition thresholds:

Asset Type	Threshold
Land	No threshold
Plant & Equipment	\$5,000
Buildings & Other Structures	\$10,000
Transport Infrastructure	\$10,000
Water Supply Network	\$10,000
Urban Waste Water Network	\$10,000
Intangible Asset	\$10,000

For infrastructure assets that have been componentised, the above asset recognition thresholds apply to the individual asset components and not the aggregate asset value (i.e., the financial asset as a whole).

Any asset acquisition/construction costs that fall below the recognition threshold should be expensed and, as such, the asset is not recognised within the financial asset register. Similarly, any contributed or donated asset valued on acquisition below the recognition threshold should not be financially recognised.

Asset Accounting Guidelines

ASSETS HELD FOR SALE

Items are to be classified as 'Held for Sale' in the Current Assets section of the Statement of Financial Position in situations where they are acquired for the purpose of resale. The item must be immediately available for resale in its present condition.

The sale must be highly probable, indicators of which are:

- A commitment to a sale plan has been adopted by Council
- Council has actively undertaken marketing of the asset at a price commensurate with its fair value
- Sale is expected to occur within 12 months of the asset being classified as Held for Sale. Classification period can be extended where Council demonstrates that it remains committed to the sale and the sale has not occurred due to circumstances beyond Council's control
- It is unlikely that Council's commitment to sell the asset will change significantly or will be withdrawn

In circumstances where an item has been acquired for the purpose of continuing operations but subsequently meets the above criteria, then it should be reclassified as Held for Sale.

Items that are classified as Held for Sale are to be assessed on an annual basis by the Asset Accountant at the end of the reporting period. If circumstances change resulting in the abovementioned conditions no longer being met, the asset must be reclassified as Non-Current and included within the relevant asset class of Property, Plant and Equipment.

Asset Accounting Guidelines

GUIDELINE B – Accounting for Expenditure after Acquisition

PURPOSE

The purpose of this guideline is to provide guidance for accounting for expenditure on non-current assets following their initial recognition into Council's financial asset register.

CAPITAL vs OPERATIONAL EXPENDITURE

Expenditure on an asset incurred after it comes into service falls into one of two categories:

- Capital Expenditure – these costs are added to the carrying amount of the existing asset and, as such, are capitalised into the financial asset register
- Operational Expenditure – these costs are expensed when incurred and do not get capitalised into the financial asset register

Details on the type of costs that are considered either capital or operational in nature are presented below.

Capital Expenditure

Certain costs incurred over the life of an asset are of the nature that either renew, extend or upgrade the asset's underlying service potential. Such costs are required to be capitalised into the financial asset register as an addition to the carrying value of existing assets.

These costs are attributable to at least one of the following:

- Extension of an existing asset – as a result of the expenditure being incurred the service potential of an asset is provided to a wider geographical area or to greater number of potential users (e.g. extending the floor area of a building,)
- Renewal of an existing asset – reinstates some or all of the original service potential of an asset (e.g. major reseal of a road or relining a stormwater pipeline)
- Upgrade of an existing asset – enhances an existing asset to provide a higher level of service or increases the useful life beyond that originally expected (e.g. widening of a road to include additional lanes)

Asset Accounting Guidelines

Operational Expenditure

Operational expenditure encompasses all costs associated with general maintenance and operations of an asset. These costs should be expensed when incurred.

The useful life of an asset used for depreciation purposes is determined assuming appropriate levels of general maintenance at appropriate intervals. Cleaning carpets, pothole maintenance on roads and clearing drains are all examples of general maintenance. A similar principle applies to minor repairs such as treating cracking in road seals or replacing an oil filter in a motor vehicle.

As such, general maintenance and repair work, which is comparatively minor in nature does not significantly renew service potential, expand service potential or extend life expectancy beyond that originally intended.

Similarly, the cost of operating an asset is not capitalised but expensed when it is incurred. The cost of staff to run a facility, fuel and power, corporate overheads and any asset inspection costs are additional examples of operational expenditure.

Asset Accounting Guidelines

GUIDELINE C – Accounting for Depreciation and Amortisation

PURPOSE

The purpose of this guideline is to provide guidance on accounting for the periodic consumption of all depreciable assets recorded in the financial asset register. Guidance is provided for the following:

- Depreciation and Amortisation Methods
- Straight Line Formula
- Useful Life
- Remaining Useful Life
- Residual Value
- Periodic Review of Depreciation/Amortisation Rates, Remaining Useful Lives and Residual Values

Depreciation and Amortisation Methods

Australian accounting standard AASB 116 requires the depreciable amount of an asset to be systematically expensed over the asset's useful life based on its pattern of consumption. Depreciable amount equates to the cost or fair value of an asset less its estimated residual value. Similarly, AASB 138 requires the depreciable amount of an intangible asset to be systematically expensed over its useful life based on the pattern of consumption.

In accordance with the applicable accounting standards, depreciation or amortisation of an asset begins when it is available for use, that is, when it is in the location and condition necessary for it to be capable of operating in the manner intended by Council.

The depreciation or amortisation method utilised should be the one that best reflects the respective asset's pattern of consumption. Methods allowable under both AASB 116 and AASB 138 are:

- Straight Line - depreciation or amortisation is charged evenly to each accounting period over an asset's useful life.
- Reducing Balance - amount of depreciation or amortisation recognised for an asset each period progressively reduces over its useful life.
- Percentage of Use - amount of depreciation or amortisation recognised each accounting period can differ and is dependent on an asset's actual or deemed usage.

Document No. >> (Insert Magiq Doc ID ###) Version No.###
Authorised by >> Director ###

Initial Date of Adoption >> ###
Latest Version Adopted: ###
Next Review Date>> ###

Asset Accounting Guidelines

The straight-line depreciation/amortisation method is used by Council to reflect patterns of consumption for all non-current assets other than parcels of land and road earthworks, which are not subject to depreciation. Of the three depreciation methods, straight line is considered the most appropriate for Council's assets. Justifying the logic of applying a reducing balance method to Council's asset types, particularly infrastructure assets, would prove problematic.

Theoretically, the percentage of use method could apply to plant and infrastructure assets such as road and sewerage networks however a current lack of available data would result in difficulties satisfying external audit scrutiny. Future use of the method is possible but would come at a cost due to resources required to collect the necessary data.

Straight Line Formula

The straight-line formula is applied as follows:

$$(\text{Net Book Value} - \text{Residual Value}) / \text{Remaining Useful Life}$$

Useful Life

The useful life of an asset or asset component is determined by its expected use by Council and provides the basis for systematically allocating straight-line depreciation or amortisation. Useful life must be based on the physical asset or component in service and not the useful life of any modern equivalent.

Useful life may be less than an asset's design life or economic life. For example, a bridge may be replaced when it reaches a certain condition rating, notwithstanding that the bridge could continue to be used for a further period of time.

Given the direct correlation to depreciation and amortisation, useful lives must be carefully considered to ensure Council's financial statements provide relevant information consistent with financial reporting requirements.

The following should be considered when establishing the useful life of an asset:

- Design Life – period of time over which the asset can be expected to last physically, assuming adequate maintenance
- Technical Life – period of time over which the asset can be expected to remain effective due to obsolescence
- Economic Life – period of time Council intends to use the asset before disposal or decommissioning based of optimal economic factors. For example, trade a vehicle prior to being two years old
- Legal Life – period of time an asset can be used based on restrictions imposed by legal agreement, legislation or government decree

Asset Accounting Guidelines

Remaining Useful Life

The remaining useful life of an asset represents the period of time expected to elapse until the asset is removed from service. At the time the asset is placed in service, the useful life and remaining useful life will be the same. Remaining useful will subsequently decrease over time as the asset is used and depreciated/amortised.

The remaining useful life of an asset should be reassessed by the relevant Asset Custodian whenever:

- Significant value is added to an asset following initial recognition
- A major component, section or part of an asset is derecognised
- There has been a significant change to an asset's condition
- Council decides to remove an asset from service at a stipulated future date
- Technical or commercial obsolescence factors become known
- There have been indicators of impairment impacting on the asset
- Imposition of legal obligations or environmental factors impacting on the asset

As is the case for useful life, the remaining useful life of aggregated financial assets is deemed to be the weighted average of all underlying components.

Residual Value

Residual value is defined within AASB 116 as the estimated amount that would be obtained today from the disposal of an asset, after deducting the estimated costs of disposal, if the asset were already of the age and condition expected at the end of its useful life. For assets expected to be sold or traded at the end of their useful life, Asset Custodians are required to estimate residual value by giving consideration to salvage or scrap values as well as to second-hand market values.

A residual value based on salvage or scrap principles should only be allocated to an asset whenever there is some certainty on its condition at the end of its useful life. In general, this precludes the allocation of residual value to most of Council's depreciable asset types due to their long life nature. Common exceptions are certain items of plant and equipment, which Council may retain for a stipulated short term period before being traded or sold.

In addition to the difficulties in ascertaining the condition of infrastructure assets at the end of their useful life, any allocation of residual value to most infrastructure asset types is considered illogical. Infrastructure assets by their very nature do not have a resale or trade-in value and when decommissioned they are generally left in place or removed at considerable cost. The cost of decommissioning most infrastructure assets will ultimately outweigh any potential scrap value.

Asset Accounting Guidelines

Periodic Review

Asset depreciation and amortisation parameters, including useful lives, asset condition (used to assess remaining useful lives) and residual values are to be reviewed with sufficient regularity to ensure that they are representative of current conditions and expectations at the end of each financial year.

- The depreciation or amortisation method applied to an asset shall be reviewed with sufficient regularity to ensure that its pattern of consumption is accurately reflected in the annual financial statements.
- The useful lives and condition ratings (and hence, remaining useful lives) of assets shall be reviewed with sufficient regularity to ensure that they accurately reflect the rate of depreciation/amortisation reported by Council in the annual financial statements.

In addition, remaining useful life of an asset should be reassessed whenever a major addition or any significant partial disposal is processed.

Asset Accounting Guidelines

GUIDELINE D – Accounting for Revaluation of Non-Current Assets

PURPOSE

The purpose of this guideline is to provide guidance on revaluing non-current assets. Guidance is provided for the following:

- Non-Current Assets Required to be Revalued
- Asset Valuation Methodologies
- Fair Value of Assets for Revaluation Purposes
- Full Revaluation Process
- Interim Reviews

NON-CURRENT ASSETS REQUIRED TO BE REVALUED

All non-current assets controlled by Council are to be revalued using the fair value basis. The only exceptions to this rule are the following assets that remain valued at cost:

- Plant and equipment
- Intangible assets

AASB 116 *Property Plant and Equipment* requires regular comprehensive revaluations be performed to ensure the carrying amount of the financial asset class does not differ materially from its fair value at the end of each reporting period.

As per the requirements of AASB 116, if an item of property, plant and equipment is revalued, all assets within the asset class to which it belongs should also be revalued. Items within an asset class are revalued simultaneously to avoid selective revaluation of assets and the reporting of amounts in the financial statements that are a mixture of costs and values as at different dates.

However, an asset class may be revalued on a rolling basis provided revaluation of that class is completed within a short period and revaluations are kept up to date.

Asset Accounting Guidelines

ASSET VALUATION METHODOLOGIES

Australian accounting standards permit assets to be revalued at fair value through adoption of the following methodologies:

- **Market Approach** – revalue an asset based on prices and other relevant information generated by market transactions involving identical or comparable assets. This valuation method can only apply to the valuation of Council’s assets where there is an active market, such as land and any non-specialised buildings. It therefore excludes most long-life assets, including infrastructure assets.
- **Income Approach** – revalue an asset or a group of assets known as a cash generating unit based on the discounted cash flows it is expected to generate. This valuation methodology should only be adopted in circumstances where the prime purpose of the asset (or cash generating unit) is for profit generation rather than the provision of goods or services. For not-for-profit entities such as Council the income approach for asset valuation has limitations as non-current assets (including infrastructure assets) primarily exist to provide services to ratepayers and residents of the city rather than to generate profits.
- **Current Replacement Cost Approach** – revalue an asset based on the current cost to replace or reproduce. This valuation approach would apply to most of Council’s long-life assets with the exception of land and non-specialised buildings where a readily available market exists.

FAIR VALUE OF ASSETS FOR REVALUATION PURPOSES

Council does not control any asset or group of assets where it is appropriate for the income approach to be adopted for asset revaluation purposes. As such, all assets subject to a revaluation are to be revalued at fair value based on the following criteria:

- Market Value if there is a readily available market; or
- Depreciated Current Replacement Cost if there is no readily available market.

For asset types subject to a revaluation by Council, a readily available market only exists for land and nonspecialised buildings. All other asset types will therefore be revalued at depreciated replacement cost.

Asset Accounting Guidelines

Market Value

Issues to consider when revaluing assets under a market approach are no different to those detailed within Guideline A for the initial recognition of assets at market value.

Theoretically, preference is to be given to assessing market value in an active market for identical assets that Council can access at acquisition date (i.e. a **Level 1** fair value as prescribed within AASB 13). In reality, identical markets will not exist for the asset types Council will be revaluing at market value, being land and non-specialised buildings. Such assets are revalued with reference to other observable inputs with the most reliable inputs coming from real estate markets. These valuations are considered to be **Level 2** fair values as prescribed within AASB 13.

As per AASB 13, Level 2 fair values should also take into account:

- The condition and location of the asset being revalued; and
- The asset's highest and best use.

As such, a market value should be obtained for assets in similar condition to the asset acquired by Council and, depending on its physical location, an adjustment may be required for transportation costs.

Any other type of transaction cost such as real estate or legal fees are specifically excluded as being part of market value by AASB 13.

Depreciated Current Replacement Cost

Depreciated current replacement cost of an asset is the current replacement or reproduction cost less any accumulated depreciation.

Current replacement or reproduction cost of an asset is the minimum that it would cost Council in the normal course of business to replace an existing asset with a technologically modern equivalent (as opposed to a second hand asset) that provides commensurate economic benefits.

Reliable sources of information for determining current replacement cost are:

- Appropriately qualified and knowledgeable expert valuers
- Reference to industry standards such as Rawlinsons Construction Handbook
- Costs incurred by Council in the acquisition/construction of similar assets
- Expected costs of materials, services and labour sourced from appropriate suppliers and applied by appropriately qualified and knowledgeable Asset Custodians within Council

Asset Accounting Guidelines

Revaluations undertaken via these methods are deemed **Level 3** fair values under the provisions of AASB 13.

Unit rates are to reflect a 'valuation' methodology, whereby components included for financial accounting purposes comply with financial accounting principles and avoid the potential for double counting. This can necessitate exclusion of some cost components that would be required for project costing and asset management purposes. Examples may include, but are not limited to the following:

- Demolition and disposal costs
- Relocation and reinstatement costs for other impacted Council assets

COMPREHENSIVE REVALUATION PROCESS

The frequency with which comprehensive revaluations are to be performed can be no more than once every five years. However, the guiding principle for determining the appropriate revaluation frequency is ensuring that the carrying amount does not differ materially from the fair value of that class of assets at that same date.

Along with reassessing fair value, a full revaluation process within Council requires a reassessment of remaining useful life, residual value (if any) and underlying unit rates.

Such revaluations should be undertaken by suitably qualified personnel with the process taking into account the differing characteristics of individual assets.

A full revaluation process needs to be carefully controlled to avoid double counting, whereby values included in the revaluation data relate to assets with acquisition/construction costs still included in capital Works in Progress (WIP). To any avoid double accounting problems all such WIP balances must be processed into the financial asset register prior to processing the revaluation data.

Materiality in accordance with AASB 1031 is to be applied when assessing if an asset type within an asset class is to be revalued.

INTERIM REVIEWS

In between comprehensive revaluations, an annual review of Council's non-current asset classes is to be conducted in order to validate that there has not been a material movement in the values of the underlying assets within that asset class since the last comprehensive revaluation.

Document No. >> (Insert Magiq Doc ID ####) Version No.###
Authorised by >> Director ###

Initial Date of Adoption >> ####
Latest Version Adopted: ###
Next Review Date>> ####

Asset Accounting Guidelines

According to AASB 1031 *Materiality*, the notion of materiality guides the margin of error that is acceptable in the amount attributed to an item or an aggregate of items and the degree of precision required in estimating the amount of an item or an aggregate of items.

AASB 1031 suggests that an amount of less than 5% would be considered immaterial, whilst an amount of 10% or greater would be considered to be material. The range in-between 5% and 10% is a matter of professional judgement, and is at the discretion of the entity to adopt an approved approach.

Council has elected to adopt a materiality threshold for overall cumulative movement (either positive or negative) of 5% since the last comprehensive revaluation. This would be determined by undertaking a comparison of the cumulative increment/decrement over the interim years against the value of the financial asset class as a whole.

Where the cumulative movement since the last full revaluation has exceeded the level of materiality, an interim revaluation should be undertaken on the financial asset class at financial year-end. Such interim revaluations can be completed by 'desk top' review with an appropriate indexation rate determined for the asset class as a whole. This indexation rate is applied to all assets valued at fair value within the applicable asset class, and the financial accounting adjustment is treated the same as any comprehensive revaluation process.

Indexation rates used for interim revaluation purposes should comply with the concepts of fair value and sufficient rigour must be applied in their formulation to satisfy audit scrutiny.

Asset Accounting Guidelines

GUIDELINE E – Accounting for Impairment of Non-Current Assets

Purpose

The purpose of this guideline is to provide guidance on assessing and accounting for Asset Impairment.

What is Asset Impairment?

A non-current asset is impaired whenever its carrying amount as recorded in the financial asset register exceeds its recoverable amount.

Recoverable amount is the higher of an asset's:

- Fair Value less cost to sell; or
- Its value in use.

The concept of fair value is described in detail within both Guideline A and Guideline D. Essentially fair value equates to market value wherever a readily available market exists or depreciated current replacement cost where a market for the asset is not available.

Value in use is applicable to assets that generate some form of cash inflow. In the context of Council where the future economic benefits of an asset are not primarily dependant on its ability to generate net cash inflows and given that Council would generally replace the asset if deprived of it, the applicable accounting standard (AASB 136) deems value in use to be depreciated current replacement cost.

Therefore, for the majority of Council's infrastructure assets, as well as any buildings with no market evidence, the recoverable amount simply equates to its depreciated current replacement cost.

Impairment Review Requirements

Under the requirements of the applicable accounting standard (AASB 136), Council is required to assess each financial year whether there has been an event or catastrophe that could give rise to any assets being impaired. Therefore, to satisfy AASB 136, Asset Custodians are required to undertake a formal review each year to determine whether there has been any indicators of asset impairment.

Regular depreciation and revaluation processes undertaken by Council generally account for normal fluctuations in the value of assets. Consequently, an asset will only become impaired as a result of some type of irregular event or catastrophe.

Asset Accounting Guidelines

Indicators of Asset Impairment

Indicators of asset impairment relevant to Council would generally fit into one of the following categories:

- Sudden natural event such as a flood, earthquake, major bush fire, tsunami or severe storm
- Prolonged natural event such a drought or rain
- Major damage to an asset caused through an accident, arson or inappropriate use
- Change to the extent or manner in which an asset can be used
- Change to an asset's technological, market, economic or legal environment

Refer below to Examples of Potential Asset Impairment for specific situations where the above indicators could result in an asset impairment test being required at Council.

Undertaking an Impairment Test

Whenever an Asset Custodian determines as part of their annual review that there have been indicators of asset impairment (i.e. an irregular event or catastrophe has occurred), all impacted assets should be identified and an impairment test should be undertaken on those assets.

Exceptions to undertaking the Impairment Test are as follows:

- Whenever an impacted asset has been destroyed or subsequently removed from service following an irregular event or catastrophe. In such circumstances the asset should be accounted for as a disposal.
- Whenever an impacted asset requires treatments that are not of a capital nature following an irregular event or catastrophe. Examples would include flood damage treatments such as road formation grading, pothole repairs and desilting of structures.
- Whenever an impacted asset has had capital works undertaken to restore it back to its pre-event level of service prior to financial year end.

When performing the impairment test, the recoverable amount of each impacted asset is to be compared to the asset's carrying value as recorded in the financial asset register to ascertain whether an adjustment in the accounts is to be recognised for asset impairment.

The following provides a summary of the Impairment Test outcomes:

Carrying Value > Recoverable Amount = Impairment Loss

Carrying Value ≤ Recoverable Amount = No Impairment

Application of Materiality

According to AASB 1031 *Materiality*, the notion of materiality guides the margin of error that is acceptable in the amount attributed to an item or an aggregate of items and the degree of precision required in estimating the amount of an item or an aggregate of items.

Document No. >> (Insert Magiq Doc ID ###) Version No.###
Authorised by >> Director ###

Next Review Date>> ####

Asset Accounting Guidelines

Council has elected to adopt a materiality threshold for asset impairment of 5%. This would be determined by undertaking a comparison of total assessed impairment loss for the impacted assets for the financial year against the value of the financial asset class as a whole.

Accounting for Impairment

Where the total assessed impairment loss for the financial year is more than Council's adopted materiality threshold, the relevant accounting standard (AASB 136) requires the impairment loss to be treated as follows:

- Firstly offset the impairment loss against any asset revaluation surplus for the applicable financial asset class;
- Any balance should then be recognised as an expense within the Statement of Comprehensive Income.

Examples of Potential Asset Impairment

1. A bridge has been badly damaged by a major flood and subsequent repairs have not fully restored the asset's pre-event level of service.

Consequence: Test for asset impairment

2. As a consequence of prolonged drought underground stormwater pipes have developed cracks that significantly impact on the service potential of the drainage network.

Consequence: Test for asset impairment

3. Structural deficiencies identified during a bridge inspection following an earthquake have resulted in a weight restriction being imposed and thereby a reduced level of service.

Consequence: Test asset for impairment

4. Following a bad fire caused by faulty wiring one of Council's offices has been demolished in preparation for the construction of a replacement building.

Consequence: No need to test for asset impairment as the demolished building should be derecognised from the financial asset register. Costs associated with the replacement building are to be capitalised as a new asset in accordance with the methodology outlined within Guideline A.

5. A prolonged period of rain resulted in large potholes along a stretch of road. Funding has been received from QRA and the damage is to be repaired through operational works.

Consequence: No need to test for asset impairment as the damage treatments are not of a capital nature and QRA funding specifies that the works undertaken are operational.

6. Another section of road suffered severe damage during the prolonged period of rain which necessitated its surface being replaced. Due to the nature and cost involved the reseal works were capitalised.

Consequence: No need to test for asset impairment as the damaged section of road should be derecognised from the financial asset register as a partial disposal. Costs associated with the replacement section of road are to be capitalised in accordance with the methodology outlined within Guideline A.

Asset Accounting Guidelines

7. A particular item of Council plant can no longer be used for their intended purpose due to new emission standards being imposed by federal legislation. Their restricted level of service use can be provided by less expensive plant.

Consequence: Test assets for impairment

8. The market value of one of Council's major land parcels may be impacted by an adjacent area being earmarked for toxic waste disposal.

Consequence: Test asset for impairment

OFFICER REPORT

TO: Council

SUBJECT: Queensland Reconstruction Authority - Disaster Recovery Funding

DATE: 08.03.21

AGENDA REF: FCS3

AUTHOR: Andrew Boardman - Director Infrastructure Services
 Michelle Clarke - Director Finance & Corporate Services

Sub-Heading

Amendment to Budget 2020/21 and Revenue Recognition

Executive Summary

Council has received approval of submissions made under the Disaster Recovery Funding Arrangements for a further \$17,218,157.43 in flood recovery works following the February 2020 event. The purpose of this report is to amend the 2020/21 budget and assess the revenue recognition.

Background

The funding is in addition to the \$21,138,317 previously approved. The projects approved are for:

QRA submission number	Description
BalSC.0017.1920K.REC	Reconstruction of Essential Public Assets - South West Queensland Flooding, 20-26 February 2020 - - REPA Hoolavale Rd - Mourilyan Rd
BalSC.0018.1920K.REC	Reconstruction of Essential Public Assets - South West Queensland Flooding, 20-26 February 2020 - - REPA Femlee Rd - Honeymah Ln
BalSC.0019.1920K.REC	Reconstruction of Essential Public Assets - South West Queensland Flooding, 20-26 February 2020 - - REPA Dalkeith Rd - Farm 158 Rd
BalSC.0020.1920K.REC	Reconstruction of Essential Public Assets - South West Queensland Flooding, 20-26 February 2020 - - REPA - Alfred St - Corack Rd
BalSC.0022.1920K.REC	Reconstruction of Essential Public Assets - South West Queensland Flooding, 20-26 February 2020 - - Lower Plains Road Submission

The purpose of this report is to amend the 2020/21 budget and complete the revenue recognition checklist against the accounting standards.

All projects must be completed by 30 June 2022 and the first milestone payments have already been received.

Link to Corporate Plan

Key Foundation Area	Key Program Area
<u>Governance</u>	Financial management for long-term sustainability

Consultation (internal/external)

Queensland Reconstruction Authority

Lonergans

Infrastructure Services advise works are scheduled to commence in 2021/22 financial year.

Legal Implications

The Local Government Regulations 2012 S170(3) allows Council to amend its budget by resolution at any time during the financial year.

Risk Implications

Financial Impact - Inability to achieve financial sustainability and meet current and future needs of the community.

Policy Implications

The Accounting Standard IFRS 15 establishes the principles that an entity applies when reporting information about the nature, amount, timing and uncertainty of revenue and cash flows from a contract with a customer. To recognise revenue under IFRS 15, an entity applies five steps as outlined in the attached checklist for the funding.

Financial and Resource Implications

The following milestone amounts for 2020/21 will be recognised as revenue as received with the remaining milestone payments being received and expended in 2021/22.

Payment terms include 30% upfront with up to 60% of project expenditure claimed in Milestone 2 and the final 10% claimed within three months of the project completion date (being 30 June 2022). The funding agreement ends on 30 June 2023.

There are ineligible costs associated with the submissions however, these will be considered as part of Budget 2021/22 if there will be council expenditure required.

Review of Standing and Advisory Committees and rescinding portfolios

Executive Summary

Council has undertaken a number of workshops to develop its list of Standing and Advisory Committee and Advisory or Reference Groups to assist in community and stakeholder engagement together with achieving Council's strategic goals. The purpose of this report is to rescind the Councillor Portfolio Policy and six strategic portfolio areas and formalise the governance framework for Standing and Advisory Committees.

Background

On 21 May 2020 Council adopted a Councillor Portfolio Policy and six strategic portfolio areas. On 20 August 2020 Council established a number of Standing and Advisory Committees. Council has now reviewed workshops, committees and portfolio meetings and determined that a consistent governance framework for Standing and Advisory Committees together with Working Groups for major projects is required.

All other Standing and Advisory Committees and User Groups will remain as previously adopted. The list of councillors to attend meetings at various towns will remain unchanged.

The following new committees to be added to the Standing Committees of Council:

Standing Committee	Membership
Assets Standing Committee	Councillors Scriven (Chair), Todd and Avery
Parks & Gardens Standing Committee	Councillors Fuhrmeister (Chair) and Winks
Plant Standing Committee	Councillors Todd (Chair), Scriven & Avery

The following new Advisory committees to be added:

Advisory Committee	Membership
Economic Development Advisory Committee	Councillors Lomman (Chair) and Avery
Biosecurity Advisory Committee	Councillors Avery (Chair) and Scriven

The following Project Groups to be adopted:

Project Group	Membership
Dirranbandi Dip Project Group	Councillors Todd, Fuhrmeister and Avery
Business Mentoring Project Group	Councillor Lomman (and the Mayor as ex officio)
Recreation Vehicle Strategy Working Group	

Council acknowledged that management may from time to time hold briefing meetings with relevant Chairs and Councillor members prior to Committee, User Group or community meetings (for example Tourism Operators Meeting).

Link to Corporate Plan

Key Foundation Area	Key Program Area
<u>Governance</u>	Active community and stakeholder engagement

Consultation (internal/external)

Councillors
Senior Leadership Group

Legal Implications

Section 264a) of the Local Government Regulations 2012 allows Council to appoint from its councillors – standing committees

Section 264b) allows Council to appoint advisory committees (including members that are not councillors).

All Standing and Advisory Committees are subject to Council's Code of Meeting Practice and business may only be conducted at meetings where a quorum is present.

Minutes are to be kept of all Council Standing and Advisory Committee meetings and tabled at the next Council meeting.

There are no legislative requirements for Project Groups. This is an informal arrangement for the life of a project to consult and workshop large projects. All decisions will be made under delegated authority by the Chief Executive Officer and/or referred to Council for resolution from these Groups as required.

Risk Implications

Community Service - Inability to achieve Council's vision and mission to deliver community services and meet current and future needs.

Policy Implications

A model terms of reference will be developed and each the new Standing and/or Advisory Committee terms of reference will be developed in consultation with the committee members.

Financial and Resource Implications

Administrative support will be offered by the Finance & Corporate Services – Administrative Officer – Governance to ensure that agendas, minutes and follow up action items are managed appropriately.

A schedule of meetings will be prepared based on the adopted terms of reference and frequency of meetings.

Options or Alternatives

Amend or change the name and/or composition of the nominated committees/groups

2020/21 Road To Recovery Programme Change

Executive Summary

Balonne Shire Council have completed the majority of Council's Road To Recovery Projects for the 2020/21 financial year. All Bitumen Reseal, Gravel Resheeting and Culvert Replacement works are completed with both Ballangarry Road and Wagoo Road Bitumen Seal Upgrades outstanding. Council had an RPEQ Certified Design for both Ballangarry Road and Wagoo Road completed and propose the following project reallocation:

- An additional \$280,000 reallocated to Ballangarry Road and extending the road chainage to 38.04 to 39.22 km on Ballangarry Road. This would see the bitumen seal upgrade extend to the Ballangarry Bridge.
- An additional \$280,000 reallocated to Wagoo Road to ensure the full scope of work can be delivered
- Create a Project for Gravel Resheeting on Dingadee Road for \$171,071.73 from Chainage 5.00 to 7.15km

Background

Balonne Shire Council have delivered the Bitumen Resealing Programme and Culvert Replacements under Roads to Recovery. The total value of Road to Recovery Works delivered to date is \$767,420.89 with Ballangarry Road & Wagoo Road Construction Seal Upgrades still to be completed, resulting in the current Expected Project Forecast being \$981,103.27. One reason identified for the \$731,071.73 worth of project savings is the competitive tender Council has received in this year's reseal programme. Another is the cancelation of the Kenny Lane (Stormwater and Drainage Works).

Acct Code	2020/21 Road To Recovery Projects	Chainage	Project Status	Project Budget	Actual	Variance	Revised Project Budget (Current)
21RTR1001	Ballangarry Road (Bitumen Sealing)	38.82 – 39.22km	Commenced Construction	\$140,560.00	\$26,535.12	\$114,024.88	TBD (\$140,560.00)

21RTR1027	Commissioners Point Road (Culvert Replacement)	3.8 – 3.9km	Completed	\$15,640	\$10,529.43	\$5,110.57	\$10,529.43

Recommendation/s

That Council resolves to amend the Completed Road To Recovery Budget, in accordance with S170(3) of the Local Government Regulations 2012, to reflect the cost of the project delivery and reallocate the \$731,071.73 of the Road To Recover Budget by:

1. Amending the Ballangarry Road (Bitumen Sealing) scope from Chainage 38.82 – 39.22km and the Project Budget from \$140,560 to \$420,560
2. Amending the Wagoo Road (Bitumen Sealing) Budget from \$111,719 to \$391,719
3. Create a new Project for Dingadee Road to Gravel Resheet from Chainage 5.00 to 7.15km with a Project Budget of \$171,071.73

OFFICER REPORT

TO: Council

SUBJECT: Hebel - Goodooga Road Alignment (Woolerbilla Road to Castlereagh Highway)

DATE: 11.03.21

AGENDA REF: IFS2

AUTHOR: Brenton Judge - Manager Transport and Drainage

Sub-Heading

Hebel – Goodooga Road Alignment (Woolerbilla Road to Castlereagh Highway)

Executive Summary

Balonne Shire Council have undergone Community Consultation with the Hebel Community to determine the desired road construction for the Hebel – Goodooga Road Upgrade. The community preference was for the road to be behind the State School however this will result in significantly higher construction costs and increase in noise to the local State School, as well as potential safety concerns. The officer recommendation, due to the additional cost, is to upgrade the existing Street, Maude St as part of the Hebel – Goodooga Road upgrade (in front of the school).

Background

Balonne Shire Council have been successful for the Australian Governments – Heavy Vehicle Safety Productivity Programme Round 7 funding. This project will upgrade the Hebel – Goodooga Road to a bitumen seal road capable of carrying Type – 2 Road Trains. Council in the February 2021 meeting resolved to maintain the Hebel – Goodooga Road on its existing alignment from NSW to the Woolerbilla Intersection. Council have consulted the Hebel Community on the 9th of March 2021 about potential options for the road design, with 68% of the community preferring the road to be relocated behind the Hebel State School and 32% of the community preferring the road to remain on its existing alignment through Maude Street. The Hebel State School preference was for the road to remain on its existing alignment. The following items were discussed throughout the community consultation.

Concerns	Option 1 – Maintaining the road on its existing alignment through Maude Street	Option 2 – Turn Maude Street into a Local Traffic Only Road and have Hebel – Goodooga Road realigned to behind the Hebel State School
Hebel Community & Hebel State School		
Dust Drop Site	Will be addressed in design with a Drop Dust Sign.	Will be addressed in design with a Drop Dust Sign.
Speed of Vehicles coming into town	Sharper corners on this road alignment will further limit this. Town Entry Treatment to be	Larger corners will not reduce the speed as significantly.

	<p>incorporated as part of the design. (For example, the entry into Surat)</p> <p>Limit Compression Breaking Signs will be incorporated to limit vehicle noise.</p>	<p>Town Entry Treatment to be incorporated as part of the design. (For example, the entry into Surat)</p> <p>Limit Compression Breaking Signs will be incorporated to limit vehicle noise.</p>
Volume of Traffic	<p>Local residents on Maude Street were concerned about traffic volumes and noise.</p> <p>Preference was given to Option 2 for this reason by the Community.</p>	<p>Hebel State School raised concerns about the road proceeding behind the State School. The noise generated to the classrooms and the proximity of the road to the outdoor recreational area / basketball courts.</p> <p>Preference was given to Option 1 for this reason by the State School.</p>
Driveway Access and Drainage	<p>Local residents on Maude Street were concerned about poor drainage along Maude Street and accessibility to their respective driveways.</p> <p>This would-be rectified undertaking this Option as part of the design.</p>	<p>Local residents on Maude Street were concerned about poor drainage along Maude Street and accessibility to their respective driveways.</p> <p>Maude Street would not have its existing design altered and stormwater drainage concern will not be rectified undertaking this option.</p>
Ballandool Road Intersection	<p>Query was made about the Ballandool Road Intersection and safe configuration of intersection. The following design was shown with intersection configuration. This will ensure Woolerbilla Road traffic will stop and drop dust even if they don't utilise the drop dust bay.</p>	
Sound Barriers	<p>Not applicable. Council would look at long-term facilitating vegetation to minimise the noise and vehicular lights along Maude Street, beautifying the approach into Hebel.</p>	<p>The indicative cost for a Sound Barrier to protect from excessive noise and children accessing the road is \$196,800.00</p> <p>Alternatively a planting barrier could be used as a visual and noise barrier.</p>
Other Comments		<p>The community wanted Maude Street to have access from both ends in-lieu of a 'No Through Road'</p> <p>Hebel State School has advised that Queensland Education will be lodging an appeal in relation to this option.</p>
Officer's		
Constructability Challenges	<ul style="list-style-type: none"> • Traffic Management (Low Risk – Acceptable) • Box out and top up of gravel material required for the 10.0m 	<ul style="list-style-type: none"> • Works can be undertaken at this location without the minimal need for traffic management

	wide road. Less material and labour required to deliver this	<ul style="list-style-type: none"> More Material required to build the road at a sufficient elevation to prevent unnecessary flooding
Estimate Cost	\$711,025	\$1,232,125 (an additional \$521,100 excluding sound barrier)

Below is the traffic increase expected upon completion of the link, it is forecasted that this traffic will increase by 2.5% per annum.

	Existing Traffic	Expected Traffic	Expected Increase
Light Vehicle	12	47	35
Truck	10	44	34
Average Daily Traffic	22	91	69

Legal Implications

Nil.

Risk Implications

Reputation - Inadequate engagement and assessment of the impact of external and internal stakeholders on our community, viability and productive capacity. Community Service - Inability to achieve Council's vision and mission to deliver community services and meet current and future needs.

Financial Impact - Inability to achieve financial sustainability and meet current and future needs of the community.

Policy Implications

Nil.

Financial and Resource Implications

An additionally \$521,100 is required to construct the Hebel – Goodooga Road behind the Hebel State School, without any sound barriers. An additional \$196,800 would be required to construct sound barriers to limit the amount of noise experienced at the school. This option will also create a new depreciating asset.

Options or Alternatives

1. Upgrade the existing alignment, Maud Street, at an estimated cost of \$711,025.00. This option risks reputational damage with the Hebel Community as the majority preference from those that attended was behind the school. – Please note that this option doesn't prevent Council at a later stage applying for further funding to 'bypass' Maud Street should traffic volumes increase significantly higher than expected and forecasted.
2. Construct the Hebel – Goodooga Road behind the Hebel State School within the existing road reserve at a cost of \$1,232,125 (excluding a Sound Barrier). This option risks reputational damage with the School and Education QLD as the school prefers the existing alignment stating it will allow for a safer learning environment with less distractions for the children.
3. Negotiate and resume 20m x 815m of 22BLM88 allowing a 20-metre buffer zone to exist between the Hebel State School and the Hebel – Goodooga Road that shall be constructed behind the Hebel State School. \$1,232,125 + resumption cost. This option will most likely delay this section of the project and require a variation to the HVSPF funding, risking reputational damage.

2021-22 to 2024-25 Transport Infrastructure Development Scheme Programme Change

Executive Summary

Balonne Shire Council have revised its four-year rolling TID's programme. It's proposed to reallocate project funds from the Noondoo – St George Road to other Local Roads of Regional Significance for the 2021/22 financial year and to incorporate the bitumen resealing of Talwood – Mungindi Road for the 2022/23 financial year and incorporation of a 4th year of TIDS funding (2024/25) to include Gravel Re-sheeting on the Noondoo – Mungindi Road and Bitumen Resealing on the Bollon – Dirranbandi Road.

Background

Balonne Shire Council as part of the South West Regional Roads Technical Group receive \$975,000 from the Department of Transport of Main Roads – Transport Infrastructure Development Scheme. Balonne Shire Council co-contribute a further \$975,000 as per the funding agreement to invest in renewing our roads that are deemed Local Roads of Regional Significance and are required to yearly update the four-year rolling programme.

STEP TWO: Complete Project Alignment with SWRRTG Strategic Transport Plan		
Strategic Criteria	Yes/No	If Yes, please provide reasoning
Does project contribute to reducing the number or severity of road crashes in the region?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The road requires resheeting to ensure the integrity of the road is maintained, to minimise the occurrence of road failures on the link and to ensure that sufficient gravel is present to maintain trafficability on the road.
Does project contribute to regional tourism development?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Noondoo - Mungindi Rd is a strategic road providing an alternative route to tourists travelling from the South West Region into New South Wales.
Does the project improve flood immunity and wet weather access?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Resheeting is required to ensure that during a wet weather event the integrity of the pavement can remain to enable the movement of traffic.
Does the project improve connections between communities?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Noondoo - Mungindi Rd is an important link between NSW and the South West Region. It allows the agriculture industry access to alternative markets in NSW rather than just QLD markets.
Does the project improve access for heavy vehicles resulting in improved commercial transport efficiency?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Noondoo - Mungindi Rd is an important link between NSW and the South West Region. It allows the agriculture industry access to alternative markets in NSW rather than just QLD markets.
Is project identified for renewal in an approved council asset management plan	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Council within its asset management plans have incorporated the continual renewal of gravel within its shire inclusive of Noondoo - Mungindi Rd.

STEP TWO: Complete Project Alignment with SWRRTG Strategic Transport Plan		
Strategic Criteria	Yes/No	If Yes, please provide reasoning
Does project contribute to reducing the number or severity of road crashes in the region?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The road requires resheeting to ensure the integrity of the road is maintained, to minimise the occurrence of road failures on the link and to ensure that sufficient gravel is present to maintain trafficability on the road
Does project contribute to regional tourism development?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Whyenbah Rd is a strategic road providing an alternative route to tourists travelling from the Castlereagh Hwy and see the agriculture in the Balonne Shire
Does the project improve flood immunity and wet weather access?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Resheeting is required to ensure that during a wet weather event the integrity of the pavement can remain to enable the movement of traffic.
Does the project improve connections between communities?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Whyenbah Rd is an important link between St George and Dirranbandi and is integral for commuting between these two townships.
Does the project improve access for heavy vehicles resulting in improved commercial transport efficiency?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	The Whyenbah Rd is a strategic road that allows freight inclusive of agriculture and horticulture to travel up through St George from Dirranbandi.
Is project identified for renewal in an approved council asset management plan	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Council within its asset management plans have incorporated the continual renewal of gravel within its shire inclusive of Whyenbah Rd.

OFFICER REPORT

TO: Council

SUBJECT: Local Roads Of Regional Significance - Jakelwar Goodooga Road

DATE: 08.03.21

AGENDA REF: IFS4

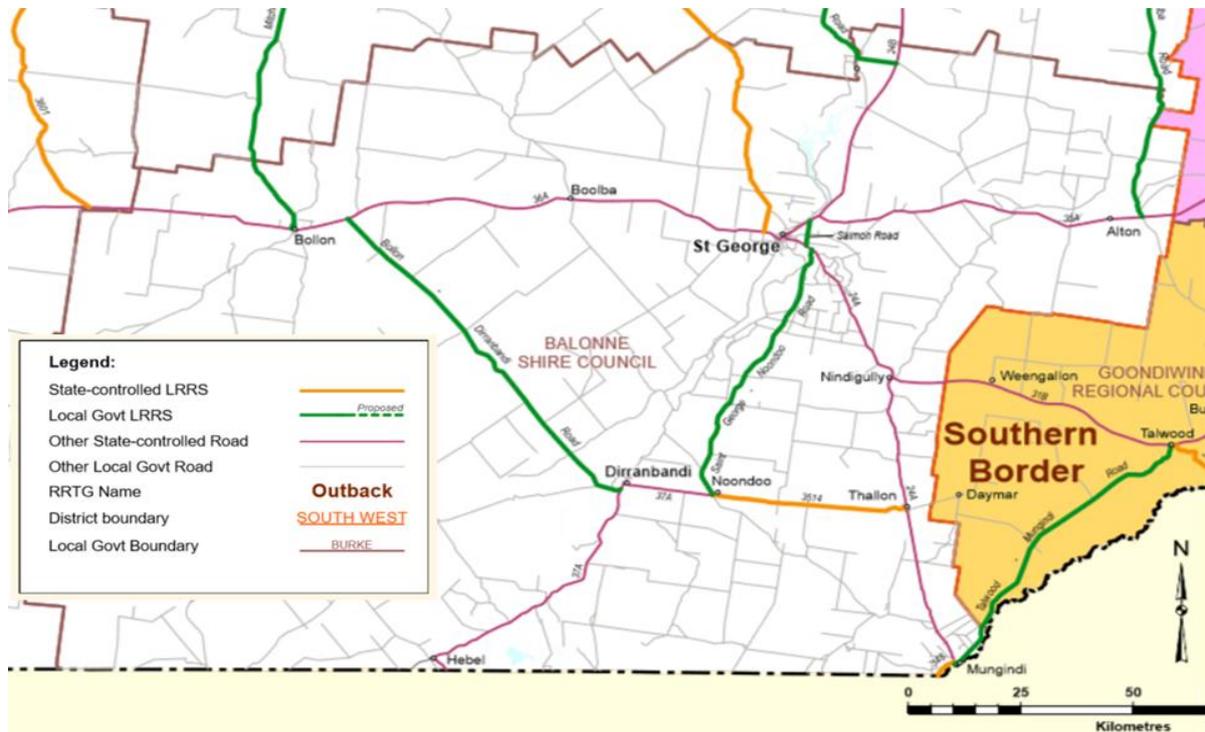

AUTHOR: Brenton Judge - Manager Transport and Drainage

Executive Summary

Local Roads of Regional Significance – Jakelwar Goodooga Road

Background

Annually the South West Regional Roads and Transport Group Technical Committee (SWRRTGTC) calls for review of Council's Local Roads or Regional Significance (LRRS). Officers have reviewed the current LRRS as shown below.

Current LRRS are:

- Bollon – Dirranbandi Rd
- Salmon Rd
- Bollon Mitchell Rd
- St George Noondoo Rd
- Talwood Mungindi Rd
- Wanganui Lane
- Kooroon Rd
- Whyenbah Rd
- Hebel – Goodooga Rd
- Noondoo Mungindi Rd

Officers proposed the following additional roads included as LRRS due the strategic regional economic importance of the roads.

- Jakelwar – Goodooga Road

Council will need to submit a request to the SWRRTG for the additional LRRS to be recommended for approval by the South West Regional Roads Group.

Depot Office Expansion – Project Request

Executive Summary

The St George Works Depot currently has inadequate, facilities, space for meetings/training and is at capacity for desk space. This request is for this project to become a Council project and to progress the project through the Project Governance Frameworks. This request is raised to Council as part of the 'identify' phase of the Project Governance Framework.

Background

In the 2016/17 financial year the Infrastructure Services Management was move from the Administration Office St George to the Works Depot St George. Funding was provided through the Queensland Government's Works for Queensland (W4Q) 2017-2019 programme to refurbish the Depot.

These works filled in the training room to create additional desk space. This created an issue as there is not adequate meeting space or training space at the Depot. This has led to the request for a depot office expansion. It is expected the that the options analysis and business case will explore the following:

- 1) Creation of additional office area under existing roof area
- 2) Improve Parking
- 3) Create additional female ablutions
- 4) Create a dedicated training and meeting room
- 5) Review existing layout and utilisation of space

Link to Corporate Plan

Infrastructure and Planning	Community infrastructure for existing and future needs

Consultation (internal/external)

Nil – Only Identify phase of the Project Governance Framework

Legal Implications

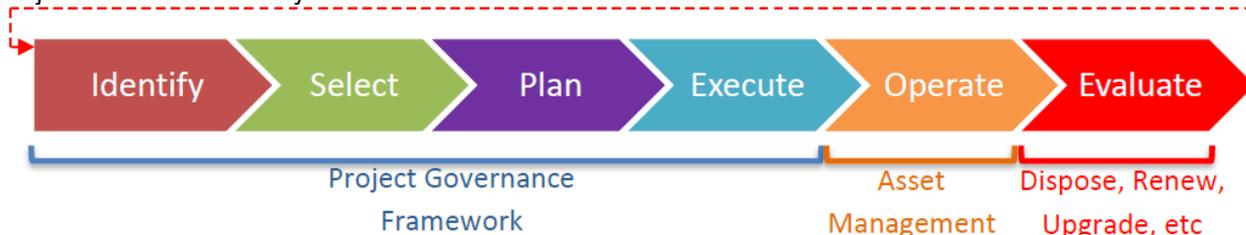

Nil – Only Identify phase of the Project Governance Framework

Risk Implications

Community Service - Inability to achieve Council's vision and mission to deliver community services and meet current and future needs.

Policy Implications

Project Governance Policy and Framework

Financial and Resource Implications

Cost of progressing request under the 'Select' phase, budget to be requested for next financial year.

Options or Alternatives

- 1) To not approve project, do not proceed.
- 2) To approve project to proceed and start progressing the select stage of the project.
- 3) To approve project however, delay progressing the select stage of the project until 2021/22

Attachments

1. Form 1 - Project Request Form - Depot Office Expansion [↓](#)

Recommendation/s

That Council resolves to accept the St George Depot Office Expansion proposal as a Council initiative under the Project Governance Framework and progress the proposal to the 'select' phase (consultation, options analysis, business case, concept) of the Framework.

OFFICER REPORT

TO: Council

SUBJECT: **Application for Conversion of Term Lease 0/240532 located over Lot 1 on CP840426**

DATE: 05.03.21

AGENDA REF: ERS1

AUTHOR: Fiona Macleod - Planning & Development Officer

Sub-Heading

The purpose of this report is for Council to consider the proposed conversion of Term Lease 0/240532 located over Lot 1 on CP840426.

Background

On 1st February 2021 Council as an advisory agency, received correspondence from the Department of Resources (DR) informing of an application for conversion of an identified parcel of land within Balonne Shire Council area (**see attachment 1**).

Specifically the land in question is recognised as Lot 1 on CP840426 (title reference: 40075432) and occupies a total area of 0.661 hectares. The current leased land purpose is for 'Religious'. The subject land is situated on the eastern side of Arthur Street, within St George township (**see attachment 2**).

DR has requested a response from Balonne Shire Council in advising of any views of requirements that the department should consider when assessing the conversion.

It was requested that any objections to the application, and any views or requirements that may affect the future use of the land should be received by close of business on 5th March 2021.

An email was submitted to DR requesting an extension of time for Council to provide a response to the correspondence. This request was granted by DR and Council is now permitted to provide a response until close of business on 23rd March 2021 (**see attachment 3**).

Council's Planning and Development Officer reviewed the application and recognises that the conversion will not affect any current or future strategic land uses for the area. Specifically, for the reasons stated below:

- *The site and surrounding area is zoned under the current Balonne Shire Planning Scheme 2019 as Industry and it is anticipated that this will remain in the imminent future given the character of uses in the immediate surrounds (being industrial activities). Any future development onsite beyond the existing permitted operations (being 'Place of Worship' – Church) will continue to be subject to the requirements of the Balonne Shire Council Planning Scheme.*
- *Given the existing use of the site for 'place of worship' purposes it is anticipated that the land will continue to be utilised for this activity.*

Based on the above comments, it is recommended by the Planning and Development Officer, that Council respond to DR citing no objection in relation to the proposed conversion.

Hello

Application for Conversion of TL 0/240532 being Lot 1 on CP840426

An application for conversion of TL 0/240532 being Lot 1 on CP840426 has been lodged with this department.

To enable full consideration to be given to this matter please submit your views and/or requirements, in writing, to this office by **05 March 2021**. If no reply is received by that date it will be assumed you have no objection to the application.

If you wish to provide a response but are unable to do so before the due date, please contact me before the due date to arrange a more suitable timeframe. If a response is not received by the due date and no alternative arrangements have been made, it will be considered that you have no objections or requirements in relation to this matter.

This information has been provided to you in confidence for the purpose of seeking your views on this matter. It is not to be used for any other purpose, or distributed further to any person, company or organisation, without the express written permission of the department.

Any objections received may be viewed by other parties interested in the proposed conversion in accordance with the provisions of the *Right to Information Act 2009*.

If you wish to discuss this matter please contact Yvonne Edwards on 4624 1500.

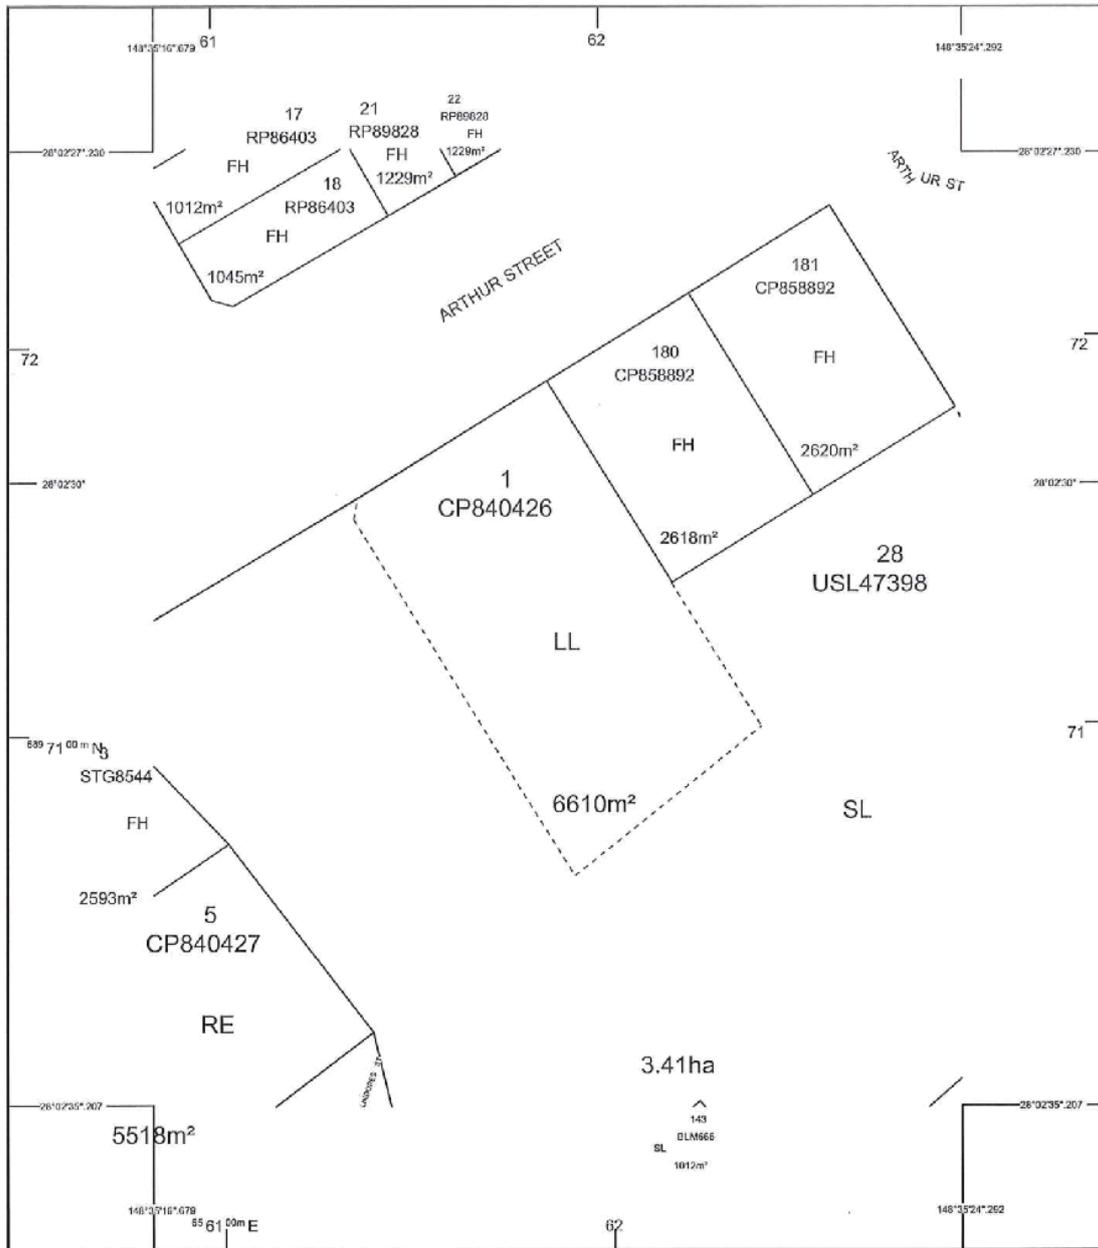

All future correspondence relative to this matter is to be referred to the contact Officer at the address below or by email to slam-roma@resources.qld.gov.au. Any hard copy correspondence received will be electronically scanned and filed. For this reason, it is recommended that any attached plans, sketches or maps be no larger than A3-sized.

Please quote reference number 2021/000005 in any future correspondence.

TO: Council

SUBJECT: **MCU 189 - Development Application for Material Change of Use - "Low Impact Industry (Livestock Feed Supplement Storage Facility)" Located at Johnston Road, St George QLD 4487 (described as Lot 2 on SP246950)**

DATE: 05.03.21

AGENDA REF: ERS2

AUTHOR: Fiona Macleod - Planning & Development Officer

Sub-Heading

MCU 189 - Development Application for Material Change of Use - "Low Impact Industry (Livestock Feed Supplement Storage Facility)" Located at Johnston Road, St George QLD 4487 (described as Lot 2 on SP246950).

Executive Summary

Council has received a properly made development application from Colin and Julie Brosnan C/- Geoff Broadbent, PATS Consulting Pty Ltd for MCU 189 - Development Application for Material Change of Use - "Low Impact Industry (Livestock Feed Supplement Storage Facility)" Located at Johnston Road, St George QLD 4487 (described as Lot 2 on SP246950).

The development application is subject to Impact assessment and must be assessed against the assessment benchmarks (to the extent relevant) provided by Section 45 of the *Planning Act 2016* and any matters prescribed by regulation. The *Development Assessment Rules* set out the procedural requirements that Council must follow in the development assessment process.

Public notification about the application was carried out in accordance with Part 4 of the *Development Assessment Rules* and for a period of 15 business days between 03 February 2021 and 23 February 2021. There were no properly made submissions about the development received during this period.

The application is generally consistent with the assessment benchmarks provided by the *Planning Act 2016* and any perceived conflict with the assessment benchmarks can be addressed by way of conditions of development approval and having regard to the relevant matters.

Background

Applicant:	Colin and Julie Brosnan C/- Geoff Broadbent, PATS Consulting Pty Ltd
Owner of Land:	Jewelco Pty Lty as Ttee Jewelco Superannuation Fund
Land description:	Lot 2 on SP246950
Lot area:	1.177ha
Zone/ Precinct:	Rural Zone
Overlay:	Nil
Proposal:	Material Change of Use – “Low Impact Industry”
Proposal Assessment category:	Impact Assessment
Properly made date:	17 January 2021

PROPOSAL

The application seeks approval for MCU 189 - Development Application for Material Change of Use – Low Impact Industry (Livestock Feed Supplement Storage Facility) at Johnston Road, St George (Lot 2 on SP246950).

The proposal involves the development of a Livestock Feed Supplement Storage Facility which is intended to support the agricultural sector within Balonne Shire and beyond.

Specifically, the facility will comprise of the following:

- 1 x 108 sqm storage shed for equipment and materials;
- 2 x 30,000 Litre Enmach cone base poly molasses tanks located on concrete slab;
- 2 x 22,000 Litre Clarke flat bottom poly molasses tanks located on sand base; and
- 1 x 25,000 Litre poly water tank located on sand base.

(Refer to Attachment 1: Development Application - Proposal Plan)

Access to the site will continue to be gained via the existing crossover located off Johnston Road. The maximum vehicle size that will be accessing the development will be a heavy rigid vehicle (HRV). The proposed facility will be unmanned and will be accessed by delivery trucks twice a month to refill storage tanks and the operator will also access the site approximately twice a month to refill a transport vehicle (HRV) and undertake routine maintenance of the facility, as required. Accordingly, given the nature of the operation of the facility, no onsite carparking spaces are provided.

Given the nature of the proposed use for storage purposes, with no onsite employees no sewerage system is proposed to be provided on the premises. The site currently has connection to electricity and telecommunications services. A proposed 25,000 water tank for potable water supply will support the proposed development operations.

Characteristics of the site:

The development site is in the Rural Zone of the *Balonne Shire Planning Scheme 2019*, on the southern interface of the township of St George (approximately 3 kms from the centre of town). Access to site is gained via an existing single access point from Johnston Road.

The subject site is a large rectangular-shaped block that comprises a total area of 1.177 hectares. The lots current land use is vacant land with sparse vegetation on it, none of it which is currently identified on State Mapping as regulated vegetation.

The proposed low impact use activities will be sited in the north eastern corner of the lot directed towards the interface with existing industry (machinery storage and workshop) activities and the livestock feed supplements will be contained to storage tanks and a shed (**Refer to Figure 1 – Site Plan**).

Adjoining land uses are as follows:

- North: Johnston Road; Lot 1 on SP246950 (Vacant Rural Land)
- South: 13 Johnston Road; Lot 3 on SP246950 (Industry – Machinery Storage and Workshop)
- East: 13 Johnston Road; Lot 3 on SP246950 (Industry – Machinery Storage and Workshop)
- West: Johnston Road (Local Government Road Reserve)

Figure 1: Development site

Source: QLD Globe

The site is adjoined by other rural zoned land (to the north, south and east) with road reserve (Johnston Road) separating the property from the industry zoned land (to the west).

The proposed low impact industry use buildings are situated in the north east corner of the property. The balance of the property is made up of a vehicle turning area and existing vegetation.

Figure 2: Zoning – Rural Zone

Source: Balonne Shire Online Mapping Tool

ASSESSMENT

The proposal constitutes a *material change of use* as defined in the *Planning Act 2016* (being *the start of a new use of the premises*).

The proposed use is defined as a “Low Impact Industry” in the *Balonne Shire Planning Scheme 2019* (the Planning Scheme):

Low Impact Industry: means premises used for industrial activities that include manufacturing, producing, processing, repairing, altering, recycling, storing, distributing, transferring or treating of products and have one or more of the following attributes;

- Negligible impacts on sensitive land uses due to offsite emissions including aerosol, fume, particle, smoke, odour and noise.
- Minimal traffic generation and heavy-vehicle usage.
- Demands imposed upon local infrastructure network consistent with surrounding uses.
- The use generally operates during the day (e.g. 7am to 6pm).
- Offsite impacts from storage of dangerous goods are negligible.
- The use is primarily undertaken indoors.

The proposed use requires a development permit to be issued by Council prior to the commencement of use.

Pursuant to Section 45 of the *Planning Act 2016*, an Impact Assessable application is an assessment that must be carried out against the Assessment benchmarks prescribed by the *Planning Regulation 2017*, in this case being;

- the Regional Plan (i.e. *Maranoa-Balonne Regional Plan* and *Darling Downs Regional Plan*);
- the *State Planning Policy*; and
- the *Balonne Shire Planning Scheme*.

An Impact assessment must also have regard to any other relevant matter, other than a person's personal circumstances, financial or otherwise, including any properly made submission about the application.

After completing an assessment of the proposal against the Assessment Benchmarks, Council must make a decision about whether to approve or refuse this development application in accordance with Section 60 of the *Planning Act 2016*.

Assessment Benchmarks

Regional Plans

The *Maranoa Balonne Regional Plan 2009* is a statutory planning instrument intended to assist in managing change and shaping the prospects of rural communities in the Maranoa and Balonne regional council areas. The regional plan sets out desired regional outcomes, which identify aspirations for ecological sustainability for the region.

The *Darling Downs Regional Plan 2013* was adopted in October 2013, and covers the local government areas of Balonne, Goondiwindi, Maranoa, Southern Downs, Toowoomba and Western Downs.

The intent of the Darling Downs Regional Plan is to provide direction to resolve competing state interests relating to the agricultural and resources sectors, and to enable the growth potential of the region's towns. It seeks to maximise opportunities for co-existence of resources and agricultural land uses.

The *Balonne Shire Planning Scheme*, and specifically the strategic framework, appropriately advances the *Maranoa-Balonne Regional Plan 2009* and the *Darling Downs Regional Plan 2013* as they apply in the planning scheme area, and therefore an independent assessment of the proposal against these planning instruments is not required. Although this is the case, the regional planning outcomes sought to be achieved by these regional plans have been considered as part of the development assessment. The development proposal is consistent with both regional plans.

State Planning Policy

The development assessment must consider the State Planning Policies to the extent they have not been appropriately integrated within or are inconsistent with the Balonne Shire Planning Scheme. As the Balonne Shire Planning Scheme appropriately integrates all relevant aspects of the State Planning Policy a separate assessment of the application against this planning instrument is not required.

Balonne Shire Planning Scheme 2019

The relevant sections of the *Balonne Shire Planning Scheme 2019* are:

- Part 3 Strategic Framework
- Part 4 Local Government Infrastructure Plan
- Part 5 Tables of assessment
- Part 6 Zones
 - Part 6.2.5 Rural zone code

- Part 7 Development Codes
 - Part 7.3.1 General development code

Part 3 – Strategic framework

The Strategic framework sets the policy direction for the Planning Scheme and forms the basis for ensuring appropriate development occurs within the planning scheme area for the life of the planning scheme.

The Strategic framework is structured in the following way;

- (1) For the purpose of describing the policy direction for the planning scheme, the strategic framework is structured in the following way:
 - (a) the strategic intent – Encouraging Prosperity in the Shire
 - (b) the following themes that collectively represent the policy intent of the scheme:
 - (i) Encouraging economic growth
 - (ii) Supporting rural and small-town living
 - (iii) Avoiding impacts of natural and other hazards
 - (iv) Safeguarding our environment and heritage
 - (v) Providing appropriate infrastructure
 - (c) the strategic outcome(s) proposed for development in the planning scheme area for each theme
 - (d) the element(s) that refine and further describe the strategic outcome(s)
 - (e) the specific outcomes sought for each, or a number of elements
 - (f) the land-use strategies for achieving these outcomes.
- (2) Although each theme has its own section, the strategic framework in its entirety represents the policy intent for the planning scheme.

An assessment of the proposed development against the strategic themes of the Balonne Shire Planning Scheme is provided in the table below;

Theme	Response
Encouraging economic growth	<p>While the proposed development is identified as an 'Industry' activity, it is importantly recognised that the purpose of the storage facility is for livestock feed supplements. It is understood that the livestock feed supplements stored on the property will support the agricultural sector within Balonne Shire, a key economic industry of the area.</p> <p>The proposed facility will value add and diversify the range of supporting businesses to the operation of the agricultural industry in Balonne Shire.</p> <p>The development is not located nearby an identified stock route and therefore no conflict with the stock route network will occur.</p>
Supporting rural and small-town living	<p>The proposed development will provide diversification of business services for St George and surrounding towns within Balonne Shire to support rural activities occurring within the shire.</p> <p>It is importantly recognised that future industrial development in St George (to which the proposed facility is defined as), if appropriate to the surrounding context, will be directed beyond Johnston Road and Rimmer Road to Salmon Road.</p> <p>Given the interface of the development being located on the east side of Johnston Road (with the west side being Industry Zoned land) as well as adjoining and opposite properties being used for Industry Purposes, the facility is considered to be in an appropriate location considering existing land use context.</p> <p>Furthermore, the uses built form is not an uncommon feature found in the Rural Zone which the subject site is located.</p>
Avoiding impacts of natural and other hazards	<p>The proposed development is located on a property that is not identified as being subject to potential flood inundation or bushfire risk.</p> <p>The proposed use for livestock feed supplements storage facility will not involve activities that use, store and dispose of recognised hazardous materials and hazardous chemicals, dangerous goods and flammable or combustible substances.</p>
Safeguarding our environment and heritage	<p>The proposed development will not have impact on the environment and will solely be contained within the properties boundaries and therefore not causing impacts to any identified heritage places.</p> <p>Importantly, the development is not located near any identified waterways nor biodiversity areas.</p>

	In terms of protecting cultural heritage, a condition will be included on any permit that issues requiring the developer to adhere to Cultural Heritage Duty of Care Guidelines and for obtaining any clearances required from the responsible entity.
Providing appropriate infrastructure	The proposed development will be connected to electricity supply and telecommunications. Given the nature of the use, being an unmanned storage facility, sewerage supply is not considered to be required. The water supply for the property will be potable water; a 25,000-litre water tank. The site has direct access to Johnston Road a local government road.

Part 4 - Local Government Infrastructure Plan

The Balonne Shire Council does not have a Local Government Infrastructure Plan.

Part 5 - Tables of assessment

The Tables of Assessment identify the category of development, the category of assessment and the assessment benchmarks for assessable development in the planning scheme area. The Tables of Assessment identify the level of assessment for the proposed use in the proposed location as "Impact assessment."

Part 6 - Zones

Zones organise the planning scheme area in a way that facilitates the location of preferred or acceptable land uses. The subject site is located in the Rural Zone.

Part 6.2.5 Rural Zone Code

The purpose of this code is to:

- (a) primarily accommodate grazing and value-adding rural uses (such as cropping) where they do not conflict with petroleum leases or facilities or stock routes.*
- (b) ensure the productive capacity of agricultural and associated rural industries that rely on Important Agricultural Areas (IAA) land and identified as IAA as shown on SPP mapping – Economic Growth, Agriculture is maximised and maintained while protecting biodiversity values including MSES and also allowing for farm diversification and value adding industries to occur in the rural area.*
- (c) maintain the character and amenity of the rural and natural environment.*
- (d) encourage tourism development where it can value-add to the viability of rural enterprises, does not diminish biodiversity values including MSES and avoids impacts of flooding and bushfire.*
- (e) ensure that the stock route network is maintained and protected from inappropriate or incompatible development.*
- (f) ensure development protects extractive resources development from reverse amenity impacts resulting from existing and proposed rural uses and, also protects new rural uses from impacts of existing or future extractive industries by maintaining separation distances or buffers.*
- (g) ensure development does not obstruct the safe and efficient operation of pipelines.*
- (h) enables the development and supply of renewable energy such as solar farms, geothermal energy, bioenergy, hydropower and wind at the regional, local and individual scale in appropriate locations.*

The purpose of the code will be achieved through the following outcomes:

- (a) the zone primarily accommodates grazing and value-adding rural uses where they do not conflict with petroleum leases or facilities or stock routes.*
- (b) new small-scale tourist developments are accommodated where they:*

- i. *i are associated with and do not threaten the viability of existing rural uses.*
 - ii. *ii assist with maintaining the viability of existing rural production enterprises.*
 - iii. *iii support and add to the quality of experiences on the Adventure Way and Great Inland Way.*
 - iv. *iv protect extractive resources of local and state significance and operating extractive industry from encroachment by incompatible uses.*
- (c) *new extractive industries are established only where they do not impact on the viability of existing agricultural, residential and tourist uses.*
- (d) *biodiversity values and ecological connectivity associated with MSES are protected and maintained.*
- (e) *development is serviced with infrastructure including formal road access, and is appropriate for the level of risk associated with any flood and bushfire hazard.*

The proposed development complies with the Purpose and Outcomes of the Rural zone because;

- The proposed development will directly contribute to the everyday operation of existing rural uses within Balonne Shire.
- The subject property where the development it to be located is not located in an identified biodiversity (MSES), flood or bushfire risk area.
- The proposed development will not conflict with petroleum leases or facilities or the stock route network.
- The proposed development is consistent with the character of the immediate area. Importantly acknowledged, while the site is zoned Rural, given its proximity to St George Township area (Industry Zone on the western side of Johnston Road) existing uses and subdivision patterns indicate a more 'Industry' character of the immediate area to the east and west of the subject site. Therefore the development is not considered to adversely impact on the existing character of the immediate surrounds.
- The proposed development is supported by an appropriate level of infrastructure.

The Code's relevant Performance Criteria are shown below, in order to more easily view structured and detailed consideration of relevant issues—

Performance outcomes	Response
For assessable development	
<p>PO1 Proposed uses established in the Rural zone do not conflict with existing rural land uses or the biodiversity (including MSES), scenic and community values of the area.</p>	<p style="text-align: center;">✓</p> <p>The proposed development while not a rural land use is considered appropriate given the immediate context of surrounding uses, being "Industry". Importantly, the use proposed is to be an unmanned facility that will have infrequent vehicle movement on and off the premises which will be used for storage purposes. It is considered that the surrounding uses will not have any unreasonable amenity impacts. The proposed built form on the property to support the use, being a shed and tanks are not uncommon fixtures found in the Rural Zone.</p> <p>Additionally, the site is not identified as having any MSES and is largely devoid of vegetation therefore it is considered that biodiversity and scenic values will not be impacted on by the proposed use. While the</p>

	use is classified as “Industry” the nature of the operation will provide support to the agricultural community within Balonne Shire.
<p>PO2</p> <p>Uses established in the Rural zone do not conflict with:</p> <p>(a) petroleum infrastructure that occurs on petroleum leases or under petroleum facility licences and pipeline licences.</p> <p>(b) the function of stock routes.</p> <p>(c) mining leases and claims.</p>	<p style="text-align: center;">✓</p> <p>The proposed development is not located in close proximity (i.e. within 200 metres) / or adjacent to an identified pipeline or pipeline easement nor will it impact on the function of stock routes or mining leases and claims.</p>
<p>PO3</p> <p>Tourist uses that support the primary rural uses on the site are limited in scale and do not threaten the viability of traditional rural uses.</p>	N/A – The proposed development is not for a ‘Tourist’ use.
<p>PO4</p> <p>Extractive industry is adequately separated from sensitive land uses to minimise potential for nuisance or complaint.</p>	N/A – The proposed development is not for a ‘Extractive Industry’ use.
<p>PO5</p> <p>Development is connected to an appropriate level of infrastructure services.</p>	<p style="text-align: center;">✓</p> <p>The proposed development will continue to be accessed from the existing crossover off Johnston Road. The application was referred to Council’s Infrastructure Department who cited no issues with the proposal subject to conditions, and specifically compliance with <i>Balonne Shire Council’s Private Property Entrance Policy</i> dated 15 January 2010.</p> <p>Given the nature of the use, being for storage purposes and no persons employed onsite to necessitate the use it is not considered that an onsite sewerage system is required to be installed.</p> <p>With respect to water supply, the development includes provision of a water storage tank which can be utilised for supply of potable water.</p> <p>The development will be connected to an appropriate supply of electricity and telecommunications services.</p>
<p>PO6</p> <p>Development is located to protect sensitive land uses from the impacts of previous activities that may cause risk to people or property including land containing</p>	N/A – The proposed development does not include for the establishment of any sensitive land uses.

<p>former mining activities and hazards e.g. disused underground mines, tunnels and shafts.</p> <p>Note: A geotechnical assessment report prepared by a suitably qualified and experienced person will assist in demonstrating the achievement of the performance outcome where a possible risk from former mining activities is identified through local knowledge, a predevelopment ground inspection, Schedule 4 – Online Mapping Resources – Mines Online Maps, or other sources.</p>	
<p>PO7</p> <p>Renewable energy facilities are located and designed to avoid adverse impacts on sensitive uses including impacts on privacy, safety, noise, odour and fumes by lighting and traffic generation.</p>	<p>N/A – The proposed development is not for a Renewable energy facility.</p>

Part 7.3.1 General development code

The purpose of the General development code is to ensure that development in the Shire is located, designed and managed in a safe and efficient manner.

The purpose of the code will be achieved through the following overall outcomes:

- (a) *Development is located to protect and enhance matters of national, state and local environmental significance, landscape values and ecological connectivity.*
- (b) *Development has a safe and efficient site layout.*
- (c) *Development does not detract from the Shire’s unique building design, is complementary to the scale of neighbouring uses, and contributes to the character of the street and the locality.*
- (d) *Development on local heritage places:*
 - i. does not result in the demolition or removal of a local heritage place, unless there is no practical reason and feasible alternative.*
 - ii. conserves the physical features, fabric and contents that contribute to the cultural heritage significance of the local heritage place.*
 - iii. safeguards archaeology and archaeological potential, and ensures they are appropriately investigated and artefacts appropriately managed.*
- (e) *An appropriate level of servicing and infrastructure is provided to new development and is connected to BSC’s infrastructure where available.*
- (f) *The site layout protects adjoining amenity, allows access around the building, allows sufficient areas for parking and manoeuvring on the site and safe and efficient access and egress.*
- (g) *Assets of the BSC are protected.*
- (h) *Any planned earthworks ensure that existing drainage regimes are maintained.*
- (i) *Development does not conflict with the ongoing efficient and safe use of the stock route network by travelling stock.*
- (j) *Development does not inhibit the safe and efficient operation of pipelines.*

The proposed development complies with the Purpose and Outcomes of the General Development Code because;

- The proposed development will not impact on matters of national, state and local environmental significance, landscape values and ecological connectivity.
- The proposed development does not involve any demolition or removal of local heritage place.
- The proposed development will not detract from the shire's unique building design and will be complementary to the scale of neighbouring uses and complement the existing character and streetscape of the immediate area.
- The proposed development will be connected to electricity and telecommunications, have onsite potable water supply and has direct access to the road network.
- The proposed development site layout allows sufficient areas to be utilised for parking and manoeuvring onsite to allow for safe and efficient access and egress; and
- The proposed development has been designed and sited to create a safe and efficient site layout with BSC assets not being adversely impacted on.
- The proposed development is not adjacent to an identified stock route or pipeline.

The Code's relevant Performance Criteria are shown below, in order to more easily view structured and detailed consideration of relevant issues—

Performance outcomes	Response
Site Layout	
<p>PO1 The size and bulk of new buildings associated with development maintains and enhances the intended local character of the zone by avoiding over-development of the site, and allowing for development at a consistent scale, siting and intensity to nearby development.</p>	<p style="text-align: center;">✓</p> <p>The proposed development includes for a 108 square metre storage shed and 5 storage tanks to be located in the north – east corner of the premises. Given the size of the subject site it is considered that the proposal will not result in over-development.</p> <p>Siting of the proposed use has been located near the adjoining land where existing industry activities and built form is located (13 Johnston Road).</p>
<p>PO2 Landscaping is provided to enhance the visual appeal of the development and soften the appearance of the built form. The majority of landscaping is to be undertaken on the principal street frontage of the development.</p>	<p style="text-align: center;">✓</p> <p>The proposed development is located within the Rural Zone and given the nature and siting of the built form and site being unmanned it is not considered that formal landscaping is required beyond the existing vegetation on the premises. Characteristics of the rural zone in this area is generally grazing land which has historically been cleared.</p>
Building Design	
<p>PO3 New development maintains the low-rise scale and character of the Shire.</p>	<p style="text-align: center;">✓</p> <p>The proposed built form associated with the Low Impact Industry use, being storage tanks and a shed will be a maximum height of 6.5 metres which is consistent with the character of the area.</p>

<p>PO4 New buildings or structures present a traditional façade to the street.</p>	<p style="text-align: center;">✓</p> <p>The proposed built form associated with the development is set back from Johnston Road (the street frontage for the site). It is considered that the storage facility accords with the siting of other Industry development in the surrounding area.</p>
<p>PO5 Development is generally in accordance with existing setbacks within the locality.</p>	<p style="text-align: center;">✓</p> <p>The siting of the development has been setback from Johnston Road. It is considered that this generally accords with other built form setbacks along Johnston Road.</p>
Access, Manoeuvring and Parking	
<p>PO10 The proposed development accommodates sufficient car parking on site.</p>	<p style="text-align: center;">✓</p> <p>The statutory car parking requirements as stipulated for uses in table 7.3.1.2 in the planning scheme for Industrial Uses list 1 space per 50sqm of gross floor area for the first 1000sqm and 1 additional space per 100sqm of gross floor area exceeding 1000sqm. Accordingly, the required amount of onsite carparking to be provided is 3 car parks. Current car parking conditions proposed on the property identifies no formalised parking area.</p> <p>It is considered that the configuration of the development allows for adequate car parking to cater for the use to occur on the property. While this does not meet the statutory requirement, onsite parking will be used infrequently given the facility is unmanned and the gravelled onsite manoeuvring area will accommodate persons accessing the premises both in HRV and LRV.</p>
<p>PO11 The proposed driveway is clear of all impediments.</p>	<p style="text-align: center;">✓</p> <p>A review of the existing access point to the property from Johnston Road does not identify any street furniture, gully pits, man holes, power poles and street trees impediments.</p>
<p>PO12 The location of driveways does not create a danger to the safety and efficiency of existing intersections.</p>	<p style="text-align: center;">✓</p> <p>The location of the existing driveway which will continue to be utilised as the access point to the development site from Johnston Road is greater than 6m from the intersection with another identified road.</p>
<p>PO13 Access to, from and within the site:</p> <ul style="list-style-type: none"> • is adequate for the type and volume of traffic generated by the use. • does not adversely impact on the traffic network external to the site. • caters for safe pedestrian access. • provides for disabled access. 	<p style="text-align: center;">✓</p> <p>The proposed development does not identify any upgrades to the access and onsite manoeuvring to cater for the proposed use. It is considered that given the nature of the development being accessed infrequently and unmanned that the existing access point will be sufficient.</p> <p>Infrastructure were referred the application and cited no concerns on the proviso that the access complied with the</p>

	<i>Balonne Shire Council's Private property Entrance Policy dated 15 January 2010.</i>
Infrastructure and Services	
PO14 The development is supplied with an appropriate level of infrastructure to support the intended use.	✓ The proposed development will be connected to telecommunications and electricity supplies.
PO15 All development has an adequate supply of potable water and can provide for appropriate treatment and disposal of effluent and other waste water. Note: If the development is not connected to a reticulated water supply network, there is no guarantee of reliability or availability of water from watercourses, overland flow or underground water for new non-stock and domestic development across the Balonne Shire. This is because access to water is subject to the limitations and appropriate authorisation under the <i>Water Act 2000</i> .	✓ The proposed development will have a potable water supply by way of a 25,000 litre tank on the property. No onsite effluent and wastewater infrastructure is proposed given the nature of the use being for storage purposes (unmanned facility).
PO16 Stormwater is collected and discharged to ensure no impacts on adjoining land owners, BSC or State infrastructure while also ensuring environmental values of waters in the Shire are maintained.	✓ Stormwater runoff from the property will be collected and discharged in accordance with legislative requirements. Given the site coverage and the proposed use being for storage purposes, it is not considered that stormwater impacts will occur beyond property boundaries.
PO17 Wastewater discharge to a waterway is avoided or managed in a way that maintains ecological processes, riparian vegetation, waterway integrity, and downstream ecosystem health.	✓ The proposed development will not discharge any wastewater into a waterway.
BSC assets	
PO18 Structures and buildings do not adversely impact on BSC infrastructure.	✓ The proposed development is not identified near any BSC easements or infrastructure. The existing access to continue to be utilised and remains clear of BSC infrastructure located within the road reserve with a minimum separation distance of 1m.
Electricity infrastructure	
PO29 Development is separated from major electricity infrastructure or substations and incorporates buffers to maintain public health and safety, residential amenity and allow access to infrastructure for maintenance.	✓ The subject site is not located on or near major electricity infrastructure or substations.
Local heritage places	
PO30 Development contributes to the retention of a local heritage place, facilitates their adaptive reuse, but does not result in a change that is	✓ The subject site is not located on or near an identified local heritage place.

incompatible with conserving the cultural heritage significance of the place.	
Biodiversity	
PO31 Development: (a) is located to avoid significant adverse impacts on matters of state environmental significance (b) facilitates the protection and enhancement of matters of state environmental significance (c) protects and enhances ecological connectivity	✓ The proposed development is not located in proximity to any identified watercourse or any areas identified as a Matter of State Environmental Significance (MSES).
Aviation facilities	
PO32 Development does not interfere with the function of air service facilities SPP mapping – Infrastructure – Strategic Airport and Aviation Facilities .	✓ While the proposed development is located within the Obstacle Limitation Surface of the St George Airport, it is not considered that negative impacts to the airport operations will arise from the proposed use. Importantly, the use is to be for storage purposes with maximum building height being the following; <ul style="list-style-type: none"> - 30,000L cone based tanks – 6.5m - 25,000 flat bottomed tank – 2.8m - 22,000 flat bottomed tank – 2.6m - Storage Shed – max 5m The materials of the built form will not be made of a reflective surface and therefore it is considered that the facility will not interfere with signals transmitted by airport operations.

Referral Agencies

Not Applicable.

Public Notification and Submissions

Public notification about the application was carried out in accordance with Part 4 of the *Development Assessment Rules* and for a period of 15 business days between 03 February 2021 and 23 February 2021. There were no properly made submissions received during this period.

Recommendation/s

That:

1. Council approves the development application MCU 189 - Development Application for Material Change of Use - "Low Impact Industry (Livestock Feed Supplement Storage Facility)" Located at Johnston Road, St George QLD 4487 (described as Lot 2 on SP246950) subject to the permit conditions listed below.

DEVELOPMENT PERMIT CONDITIONS

Preamble

- i. The relevant planning scheme for this development is *Balonne Shire Planning Scheme 2019*. All references to the 'Planning Scheme' and 'Planning Scheme Schedules' within these conditions refer to the above Planning Scheme.
- ii. Under the Planning Scheme a "Low Impact Industry" - means premises used for industrial activities that include manufacturing, producing, processing, repairing, altering, recycling, storing, distributing, transferring or treating of products and have one or more of the following attributes;
 - a. Negligible impacts on sensitive land uses due to offsite emissions including aerosol, fume, particle, smoke, odour and noise.
 - b. Minimal traffic generation and heavy-vehicle usage.
 - c. Demands imposed upon local infrastructure network consistent with surrounding uses.
 - d. The use generally operates during the day (e.g. 7am to 6pm).
 - e. Offsite impacts from storage of dangerous goods are negligible.

f. *The use is primarily undertaken indoors.*

- iii. The *Environmental Protection Act 1994* states that a person must not carry out any activity that causes, or is likely to cause, environmental harm unless the person takes all reasonable and practicable measures to prevent or minimise the harm. Environmental harm includes environmental nuisance. In this regard, persons and entities involved in the operation of the approved development are to adhere to their 'general environmental duty' to minimise the risk of causing environmental harm to adjoining premises.
- iv. All Aboriginal Cultural Heritage in Queensland is protected under the *Aboriginal Cultural Heritage Act 2003* and penalty provisions apply for any unauthorised harm. Under the legislation a person carrying out an activity must take all reasonable and practicable measures to ensure the activity does not harm Aboriginal Cultural Heritage. This applies whether or not such places are recorded in an official register and whether or not they are located in, on or under private land. The developer is responsible for implementing reasonable and practical measures to ensure the Cultural Heritage Duty of Care Guidelines are met and for obtaining any clearances required from the responsible entity.
- v. It is the responsibility of the developer to obtain all necessary permits and submit all necessary plans and policies to the relevant authorities for the approved use.
- vi. An operational works application will be required to be submitted to and approved by Council where there would be a change 1m or more in the level of any part of the land or where any drainage path is affected; or for urban purposes that involve disturbing more than 2,500m² of land.
- vii. In completing an assessment of the proposed development, Council has relied on the information submitted in support of the development application as true and correct. Any change to the approved plans and documents may require a new or changed development approval. It is recommended to contact Council for advice in the event of any potential change in circumstances.

Use

2. The approved development is a Material Change of Use - "Low Impact Industry" as defined in the Planning Scheme and as shown on the approved plans.
3. A development permit for building works must be obtained prior to commencing construction of the "Low Impact Industry".
4. The approved development is to be carried out generally in accordance with the following approved plans/documents and subject to approval conditions. Where there is any conflict between the approval conditions and the details shown on the approved plans, the approval conditions prevail.

Plan/Document Number	Plan/Document Name	Date
Rev 1	Site Layout Plan	05/01/2021
ESF090-01 Issue C	9000 Max Width Shade Shed	09/02/2016

5. During the course of constructing the works, the developer shall ensure that all works are carried out by appropriately qualified persons and the developer and the persons carrying out and supervising the work shall be responsible for all aspects of the works, including public and worker safety, and shall ensure adequate barricades, signage and other warning devices are in place at all times.

Compliance inspection

6. All conditions relating to the establishment of the approved development must be fulfilled prior to the approved use commencing, unless otherwise noted in these conditions.
7. Prior to the commencement of the use, the applicant shall contact Council to arrange a development compliance inspection.

Applicable Standards

8. All works must comply with:
 - a) the development approval conditions;
 - b) any relevant provisions in the Planning Scheme
 - c) any relevant Australian and Austroads Standards and the National Construction Code that applies to that type of work; and
 - d) any alternative specifications that Council has agreed to in writing and which the developer must ensure do not conflict with any requirements imposed by any applicable laws and standards.

Development works

9. The developer shall ensure that all approved works are carried out by appropriately qualified persons and the developer and the persons carrying out and supervising the work shall be responsible for all aspects of the works, including public and worker safety, and shall ensure adequate barricades, signage and other warning devices are in place at all times.
10. The developer is responsible for locating and protecting any Council and public utility services, infrastructure and assets that may be impacted on during construction of the development. Any damage to existing infrastructure (kerb, road pavement, existing underground assets, etc.) that is attributable to the progress of works on the site or vehicles associated with the development of the site shall be immediately rectified in accordance with the asset owners' requirements and specifications and to the satisfaction of the asset owners' representative(s).

Waste Management

11. All waste generated from construction of the premises must be effectively controlled on-site before disposal. All waste must be disposed of in accordance with the *Environmental Protection (Waste Management) Regulation 2000*.
12. All waste generated on-site must be managed in accordance with the waste management hierarchy as detailed in the *Waste Reduction & Recycling Act 2011*.

Stormwater Drainage

13. Stormwater drainage is to be provided in accordance with:
 - a) Queensland urban drainage manual, 3rd Edition, Queensland Department of Energy and Water Supply, 2013;
 - b) Pilgrim, DH, (ed)., Australian Rainfall & Runoff – A Guide to Flood Estimation, Institution of Engineers, Australia, Barton, ACT, 1987; and
 - c) Class 1 and Class 10 buildings – National Construction Code, Volume 2.

Earthworks and Construction

14. During construction, erosion controls and silt collection measures are to be put in place to protect environmental values and mitigate potential impacts to adjoining properties and roadway/s.

Avoiding Nuisance

15. No nuisance is to be caused to adjoining properties and occupiers by the way of noise, smoke, dust, rubbish, contaminant, stormwater discharge or siltation at any time during or after the establishment of the approved development.
16. Lighting of the site, including any security lighting, shall be such that the lighting intensity does not exceed 8.0 lux at a distance of 1.5 metres from the site at any property boundary.
17. All lighting shall be directed or shielded so as to ensure that no glare directly affects nearby properties.
18. The area and its surrounds shall be kept in an orderly fashion, free of rubbish and clear of weeds and long grasses. The approved development and the premises are to be maintained in a clean and tidy condition and not to pose any health and safety risks to the community.
19. Noise emissions from the development shall not cause environmental harm of nuisance to adjoining properties or "Sensitive Land Uses" in accordance with the *Environmental Protection (Noise) Policy 2008*.
20. Air emissions from the development shall not cause environmental harm of nuisance to adjoining properties or "Sensitive Land Uses" in accordance with the *Environmental Protection (Air) Policy 2008*.

Hours of Operation

21. Unless otherwise approved by Council, the activities associated with the Low Impact Industry Use must only be conducted between the hours of;
 - 5am to 6pm, Monday to Sunday inclusive
22. Unless otherwise approved in writing by the Council, approved hours of construction are restricted to Monday – Saturday 6.30am to 6.30pm – noise permitted. Work or business which causes audible noise must not be conducted from or on the subject land outside the above times or on Sundays or Public Holidays.

Provision of Services

23. The development must be connected to an electricity reticulation service in accordance with the relevant service provider's requirements and specifications along with relevant building standards, requirements and specifications (as relevant).
24. If the premises is connected to a telecommunications service, then such works shall be undertaken in accordance with the relevant service provider's requirements and specifications along with relevant building standards, requirements and specifications (as relevant).

Access

25. The developer shall be responsible for construction and maintenance of vehicle crossovers from the road carriageway to the property boundary and for obtaining any approvals that may be required, and for complying with the applicable designs and standards. Should any damage be caused at the approved access location, it is the landowner's responsibility to ensure this is reinstated. Any repair works are to be undertaken in consultation with Council and at the landowner's expense.
26. The existing vehicle access from Johnston Road is to be upgraded to a gravel surface. Vehicle access and manoeuvring shall be maintained by the developer generally in accordance with *Balonne Shire Council's Private Property Entrance Policy* dated 15 January 2010 ensuring no damage to the roadway.
27. Vehicle crossovers must be located a minimum distance of one metre from any power poles, street signage, street lights, manholes, stormwater gully pits or other Council assets, unless otherwise specified in the applicable development standards and specifications.
28. Vehicles entering and exiting the development site must be able to enter and leave in forward direction. Reversing out of the development site is not permitted. Vehicle manoeuvres in this regard are to be totally contained within the development site boundaries.

Landscaping

29. Site landscaping must not interfere with electrical infrastructure nor restrict maintenance access to any onsite infrastructure, public utility or easement.
30. Landscaping must not interfere with site lines at access driveways for vehicle traffic.

No Cost to Council

31. The developer is responsible for meeting all costs associated with the approved development unless there is specific agreement by other parties, including the Council, to meeting those costs. This includes the costs of any services and infrastructure required in connection with the establishment of the development.

Latest versions

32. Where another condition refers to a specific published standard, manual or guideline, including specifications, drawings, provisions and criteria within those documents, that condition shall be deemed as referring to the latest versions of those publications that are publicly available at the commencement of the development works, unless a regulation or law requires otherwise.

Application Documentation

33. It is the developer's responsibility to ensure that all entities associated with this Development Approval have a legible copy of the Decision Notice, Approved Plans and Approved Documents bearing 'Council Approval'.

OFFICER REPORT

TO: Council

SUBJECT: RL 109 - Development Application for Reconfiguring a Lot - Boundary Realignment (two lots into two lots) located at 110 & 112-118 Victoria Street, St George QLD 4487 (described as Lot 1 on RP96467 and Lot 5 on RP96467)

DATE: 11.03.21

AGENDA REF: ERS3

AUTHOR: Fiona Macleod - Planning & Development Officer

Sub-Heading

RL 109 Development Application for reconfiguring a lot – boundary realignment (two into two lots) at 110 & 112-118 Victoria Street, St George Qld 4487 (described as Lot 1 on RP96467 and Lot 5 on RP96467), by Council's planner.

A perceived conflict of interest was identified with the application given Balonne Shire Council is the applicant to the development application and the Assessment Manager. Accordingly, the assessment report and recommendations presented have been reviewed by Jessica Reiser, Town Planner at Maranoa Regional Council to ensure no bias to the grounds of decision.

Executive Summary

Council has received a properly made development application from the landowner for RL 109 - Development Application for Reconfiguring a Lot - Boundary Realignment (two lots into two lots) located at 110 & 112-118 Victoria Street, St George QLD 4487 (described as Lot 1 on RP96467 and Lot 5 on RP96467).

The development application is subject to Code assessment and must be assessed against the assessment benchmarks (to the extent relevant) provided by Section 45 of the *Planning Act 2016* and any matters prescribed by regulation. The *Development Assessment Rules* set out the procedural requirements that Council must follow in the development assessment process.

The application is generally consistent with the assessment benchmarks provided by the *Planning Act 2016* and any perceived conflict with the assessment benchmarks can be addressed by way of conditions of development approval and having regard to the relevant matters.

Background

Applicant:	Balonne Shire Council Matthew Magin
Owner of Land:	110 Victoria Street, St George: Council of the Shire of Balonne 112-118 Victoria Street, St George:

	Council of the Shire of Balonne
Land description:	Lot 1 on RP96467 Lot 5 on RP96467
Lot area:	Lot 1: 5974 sqm Lot 5: 1826 sqm
Zone/Precinct:	Centre Zone
Overlay:	Nil
Proposal:	Reconfiguring a Lot - Boundary Realignment (Two Lots into Two Lots)
Proposal Assessment category:	Code Assessment
Referral/Concurrency Agencies:	Nil
Properly made date:	25 February 2021

PROPOSAL

The application seeks approval for a RL 109 - Development Application for Reconfiguring a Lot - Boundary Realignment (two lots into two lots) located at 110 & 112-118 Victoria Street, St George QLD 4487 (described as Lot 1 on RP96467 and Lot 5 on RP96467).

The proposed development involves the realignment of the common boundary between Lot 1 and 5 to incorporate some additional land into Lot 5.

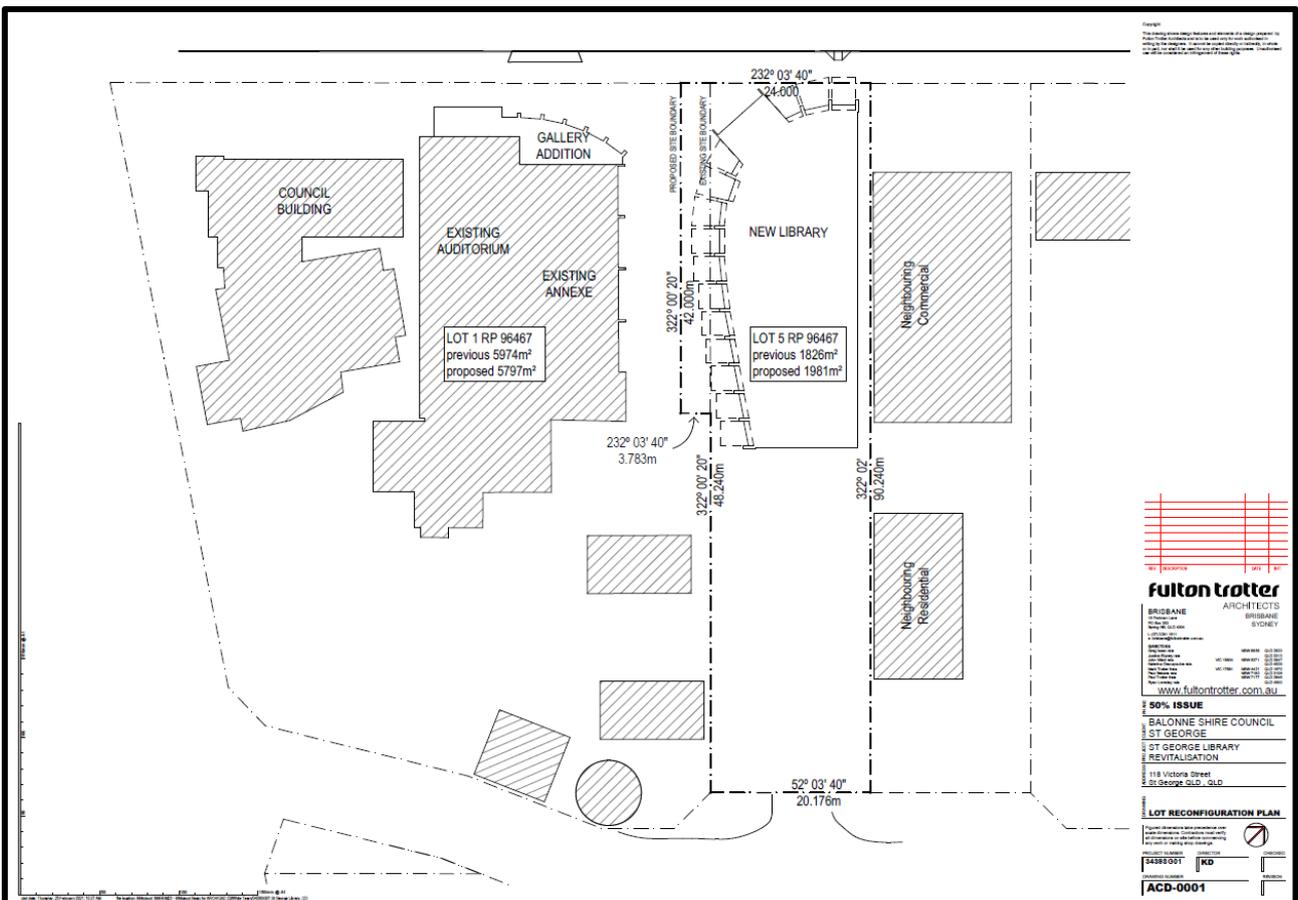

Figure 1: Plan of Proposed Boundary Realignment

Source: Application materials

The reconfiguration of the common boundary between the two lots will result in revised areas of 5797sqm (Lot 1) and 1981sqm (Lot 5) respectively. The proposal will not change the existing permitted use of either lots, and both lots will continue to be utilised for the following activities;

- Lot 1: 'Commercial' and 'Community' uses
 - o Balonne Shire Council Offices
 - o St George Cultural Centre
 - o St George Water Tower
 - o Caretakers Residence

- Lot 5: 'Community' use
 - o St George Library

No new buildings, structures, or infrastructure (roads or access points) are required as part of the boundary realignment.

Characteristics of the site:

The development site comprises the rearrangement of the boundary of generally rectangular shaped land parcels that are located in the Centre Zone of the *Balonne Shire Planning Scheme 2019*. The lots subject to the application are located in the township of St George.

The site is relatively flat with existing commercial and community activities occurring on both properties.

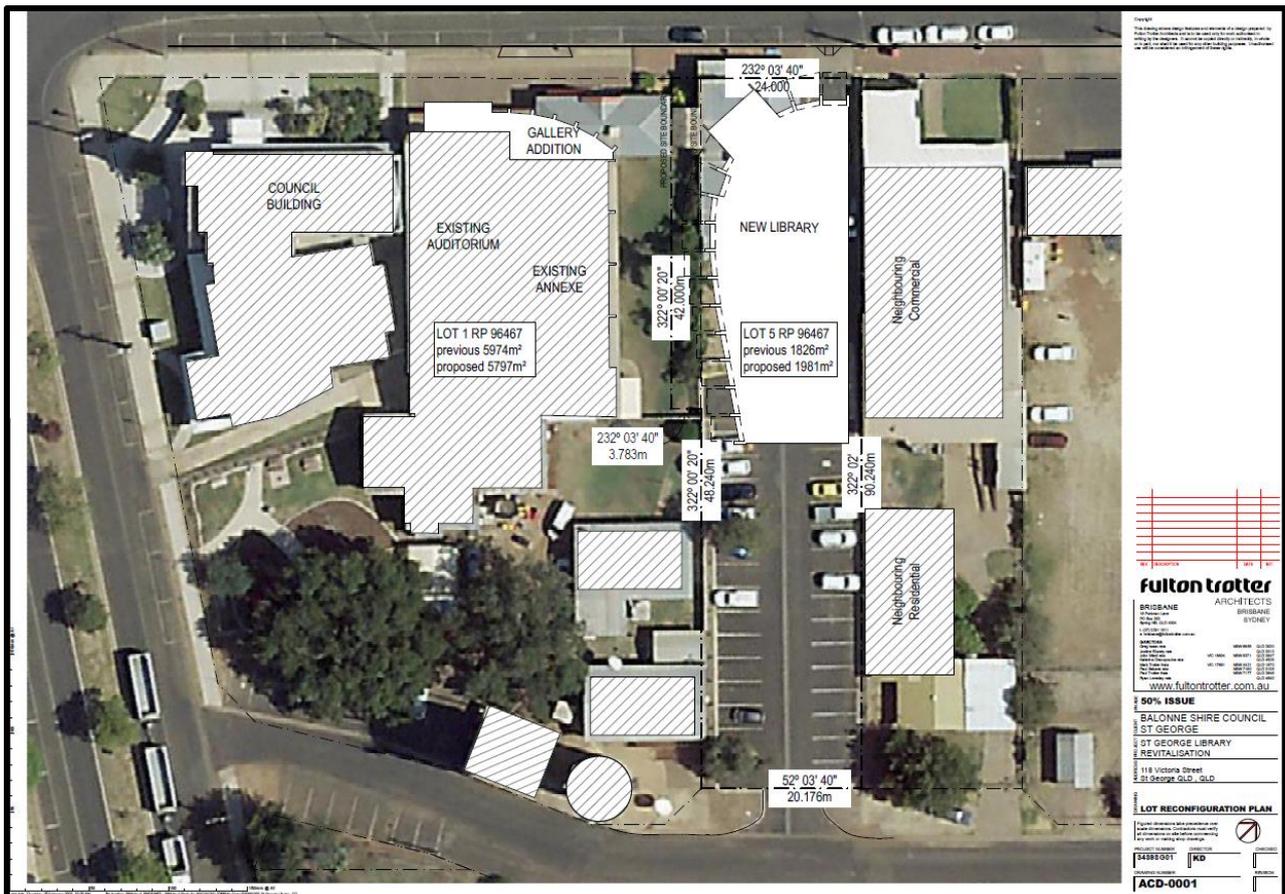

Figure 2: Aerial view – Development site

Source: Application materials

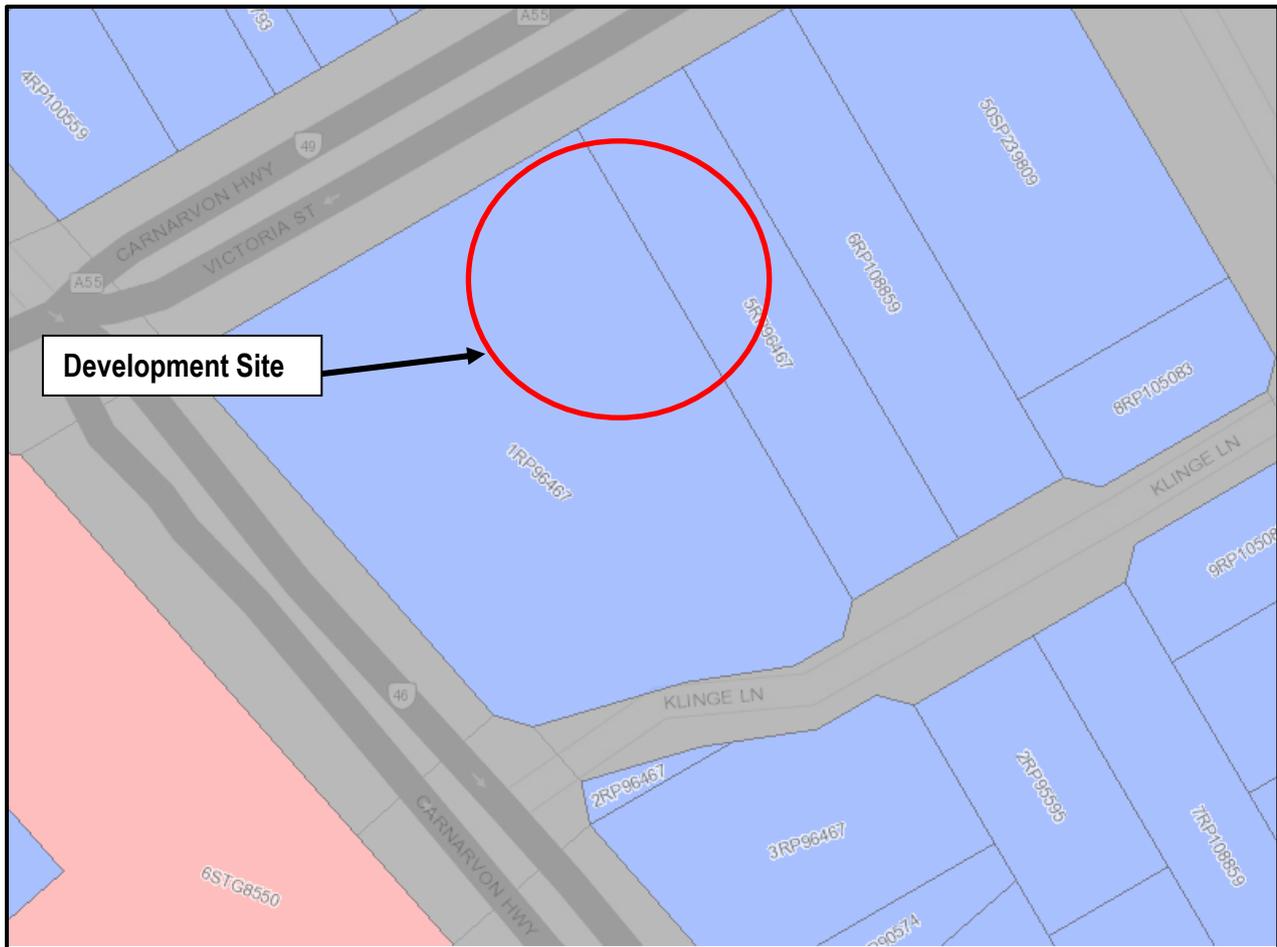

Figure 3: Site locality and zoning

Source: Balonne Planning Scheme 2019

Both land parcels are currently utilised for commercial and community purposes. Lot 1 has been developed for Office and Community purposes (currently occupied by the Balonne Shire Council Offices and St George Cultural Centre) and Lot 5 is used for Community Purposes (currently occupied by the St George Library). The existing activities occurring over the two land parcels are to continue and are not considered to be negatively impacted on due to the boundary realignment. Both lots have existing connections to a reticulated electricity supply and are connected to Council's water and sewerage system given the location of the properties within St George Township. Given the nature of the development for boundary realignment it is not considered that existing infrastructure connections will be impacted on.

The development site is surrounded by other land holdings used for commercial purposes which is consistent with the zoning of the land. It is not considered that the proposal will impact on the existing land uses in any way.

ASSESSMENT

The proposal constitutes a *reconfiguring a lot* as defined in the *Planning Act 2016*.

Reconfiguring a lot means:

- (a) creating lots by subdividing another lot; or
- (b) amalgamating 2 or more lots; or
- (c) rearranging the boundaries of a lot by registering a plan of subdivision under the *Land Act* or *Land Title Act*; or

- (d) *dividing land into parts by agreement rendering different parts of a lot immediately available for separate disposition or separate occupation, other than by an agreement that is—*
- (i) *a lease for a term, including renewal options, not exceeding 10 years; or*
 - (ii) *an agreement for the exclusive use of part of the common property for a community titles scheme under the Body Corporate and Community Management Act 1997; or*
- (e) *creating an easement giving access to a lot from a constructed road.*

Pursuant to Section 45 of the *Planning Act 2016*, a Code Assessable application is an assessment that must be carried out only -

- (a) *against the assessment benchmarks in a categorising instrument for the development; and*
- (b) *having regard to any matters prescribed by regulation.*

The Assessment Benchmarks applicable to the development assessment are:

- the Regional Plan (i.e. *Maranoa-Balonne Regional Plan* and *Darling Downs Regional Plan*);
- the *State Planning Policy*; and
- the *Balonne Shire Planning Scheme*.

After completing an assessment of the proposal against the Assessment Benchmarks, Council must make a decision about whether to approve or refuse this development application in accordance with Section 60 of the *Planning Act 2016*.

Assessment Benchmarks

Regional Plans

The *Maranoa Balonne Regional Plan 2009* is a statutory planning instrument intended to assist in managing change and shaping the prospects of rural communities in the Maranoa and Balonne regional council areas. The regional plan sets out desired regional outcomes, which identify aspirations for ecological sustainability for the region.

The *Darling Downs Regional Plan 2013* was adopted in October 2013, and covers the local government areas of Balonne, Goondiwindi, Maranoa, Southern Downs, Toowoomba and Western Downs.

The intent of the Darling Downs Regional Plan is to provide direction to resolve competing state interests relating to the agricultural and resources sectors, and to enable the growth potential of the region's towns. It seeks to maximise opportunities for co-existence of resources and agricultural land uses.

The *Balonne Shire Planning Scheme*, and specifically the strategic framework, appropriately advances the *Maranoa-Balonne Regional Plan 2009* and the *Darling Downs Regional Plan 2013* as they apply in the planning scheme area, and therefore an independent assessment of the proposal against these planning instruments is not required.

State Planning Policy

The development assessment must consider the State Planning Policies to the extent they have not been appropriately integrated within or are inconsistent with the Balonne Shire Planning Scheme. As the Balonne Shire Planning Scheme appropriately integrates all relevant aspects of the State Planning Policy a separate assessment of the application against this planning instrument is not required.

Balonne Shire Planning Scheme 2019

The relevant sections of the *Balonne Shire Planning Scheme 2019* are;

- Part 5 Tables of assessment
- Part 7 Development Codes
 - Part 7.4.2 Reconfiguring a lot code

Part 5 - Tables of assessment

The Tables of Assessment identify the category of development, the category of assessment and the assessment benchmarks for assessable development in the planning scheme area. The Tables of Assessment identify the level of assessment for the proposed reconfiguring a lot in the proposed location as “Code Assessment.”

Part 7 Development Codes

7.4.2 Reconfiguring a lot code

The purpose of the reconfiguring a lot code is to:

- (a) *Facilitate the creation of lots to a size and dimension of that allows the zones to achieve the intended use.*
- (b) *Reconfiguring lots ensures that future lots are resilient from the impacts of flood and bushfire.*
- (c) *Reconfiguring lots does not adversely impact on the cultural heritage or biodiversity values (including MSES) of an area or water quality.*
- (d) *Reconfiguring lots does not adversely impact on the Shire’s economy.*
- (e) *ensure that the stock route network is maintained and protected from inappropriate development.*

The purpose of the code will be achieved through the following overall outcomes:

- (a) *Reconfiguration of lots creates safe, functional and suitable lots that are consistent with the existing zone intent.*
- (b) *Reconfiguration of lots ensures that development can provide adequate access and services for all new lots.*
- (c) *Reconfiguration of lots does not lead to a loss of biodiversity and ecological connectivity.*
- (d) *Reconfiguration ensures the environmental values and quality of Queensland waters are protected and enhanced.*
- (e) *development does not conflict with the ongoing efficient and safe use of the stock route network by travelling stock.*
- (f) *Development does not inhibit the safe and efficient operation of pipelines.*

The proposed development for reconfiguring a lot for a boundary realignment complies with the Purpose and Outcomes of the reconfiguring a lot code because:

- The proposed boundary will create a safe and functional land configuration allowing for better management for the existing commercial and community purposes on both properties;
- Does not involve and clearing of vegetation and therefore the existing biodiversity and ecological connectivity and environmental values are protected;

- Does not involve the creation of any new lots and furthermore is not located near an identified Stock Route;
- The development site has adequate existing road accesses and is connected to onsite services adequate for the existing uses on the subject properties; and
- The proposed development will have no adverse impact on the Shire's economy.

The Code's relevant Performance Criteria are shown below, to more easily view structured and detailed consideration of relevant issues—

Performance outcomes	Response
<p>PO1 The land is physically suitable for the anticipated future land use in terms flooding hazard, bushfire hazard and practical access.</p>	<p style="text-align: center;">✓</p> <p>Both proposed reconfigured lots have existing access points which will be unaffected by the proposed boundary realignment.</p> <ul style="list-style-type: none"> - Lot 1 access will continue to be via Klinge Lane and Victoria and Grey Streets. - Lot 5 access will continue to be via Klinge Lane and Victoria Street. <p>The above access points are not identified on State or Local Government Mapping as being subject to Flood or Bushfire risk.</p>
<p>PO2 The proposed lots have a legal point of access from local or state-controlled road networks.</p>	<p style="text-align: center;">✓</p> <p>Both Lots 1 and 5 have existing legal access from road networks. As previously stated, Lot 1 has access from Klinge Lane (local government road) and Victoria and Grey Streets (state-controlled road). Lot 5 has access from Klinge Lane (local government road) and Victoria Street (state-controlled road). There will be no change to the existing access's as a result of the boundary realignment.</p>
<p>PO3 The proposed lots are of a size and dimension to meet the outcomes for development in the zones in respect of:</p> <ul style="list-style-type: none"> • preserving land for agriculture and animal production in the Rural zone. • achieving a safe and pleasant residential environment. • consistent with the nature and layout of existing subdivision patterns. • providing a variety of lot sizes for residential living, industry and commerce. 	<p style="text-align: center;">✓</p> <p>The development site is located in the Centre zone and consist of two land parcels. The planning scheme permits reconfiguration of a lot in the centre zone provided a minimum lot size of 400sqm is achieved with a minimum road frontage of 15m.</p> <p>Lot 1 has a proposed land area of 5797sqm which is above the permitted minimum lot size of 400sqm. The property has multiple road frontages to both Klinge Lane, Victoria and Grey Streets with all frontages having distances above the minimum requirement of 15m.</p> <p>Lot 5 has a proposed land area of 1981sqm which meets the minimum lot size of 400sqm. The property has dual road frontages to both Victoria Street and</p>

	Klinge Lane. Both frontages of the lot exceed the minimum requirement of 15m.
Site Layout	
PO4 Stormwater is controlled to minimise the environmental impacts of runoff from the development on the water quality of surface and ground water.	✓ As a result of the proposed reconfiguring a lot – boundary realignment there will be no change to the way stormwater is managed or stormwater runoff to water quality or ground water. Additionally, Council's Infrastructure Department was referred the application and cited no concerns with stormwater management on both premises as a result of the boundary realignment.
PO5 The impacts of development on matters of state environmental significance (identified in SPP mapping – Environment and Heritage – Biodiversity) are avoided or if avoidance is not possible, minimised.	N/A – The subject properties are not identified as having any matters of state environmental significance on them.
PO6 The proposed lots will not lead to diminished productivity of rural land.	N/A – The proposed boundary realignment is located within St George township in the Centre Zone.
PO7 A potable water supply and adequate sewerage services are available to each lot in a development that will be used for residential, commercial, or industrial purposes.	✓ Both Lot 1 and 5 are to continue to be utilised for Commercial and Community purposes. Both lots have existing water and sewerage connections to Council's network given the properties location in St George township which are considered to continue to be adequate. Additionally, Council's Infrastructure Department was referred the application and cited no concerns with water supply and sewerage connections as a result of the boundary realignment.
Flood	
PO8 Development located within areas containing a flood hazard responds to flooding potential and maintains personal safety at all times with regards to siting and layout.	N/A – The proposed development is for a reconfiguring a lot – boundary realignment. The properties subject to the realignment are not subject to potential inundation in a flood event as per current Flood Mapping contained in the Planning Scheme.
Bushfire	
PO9.1 Where reconfiguration is undertaken in an urban area or is for urban purposes or smaller scale purposes, a separation distance from hazardous vegetation is established provided to achieve a radiant heat flux level of 29kW/m ² at the edge of the proposed lot(s).	N/A – The development site is not located in an area identified as having hazardous vegetation.

<p>PO9.2 Where reconfiguration is undertaken for other purposes, a building envelope of reasonable dimensions is provided on each lot which achieves radiant heat flux level of 29kW/m² at any point.</p>	<p>N/A – The development site is not located in an area identified as having hazardous vegetation.</p>
<p>PO10 Where reconfiguration is undertaken in an urban area or is for urban purposes, a constructed perimeter road with reticulated water supply is established between the lots and the hazardous vegetation and is readily accessible at all times for urban fire fighting vehicles.</p> <p>The access is available for both firefighting and maintenance/defensive works.</p>	<p>N/A – The development site is not located in an area identified as having hazardous vegetation. The proposed development is for reconfiguring a lot – boundary realignment with no new lots being created. Existing access to the properties will continue to be utilised. Given the properties location, both lots are connected to Council's reticulated Water Supply Network.</p>
<p>PO11 The access is available for both firefighting and maintenance/hazard reduction works.</p>	<p>N/A – The proposed development is for reconfiguring a lot – boundary realignment affecting properties largely devoid of vegetation, not subject to bushfire hazard and located within St George township. The development site is provided with existing accesses to Klinge Lane and onsite open car parking areas located within the development site that provides fire breaks from existing built form and access for emergency vehicles if required during an emergency event.</p>
<p>PO12 Where reconfiguration is undertaken for other purposes, a formed, all weather fire trail is provided between the hazardous vegetation and either the lot boundary or building envelope, and is readily accessible at all times for the type of fire fighting vehicles servicing the area.</p> <p>However, a fire trail will not be required where it would not serve a practical fire management purpose.</p>	<p>N/A – The lots subject to the boundary realignment are not located in an area identified as having bushfire hazard. Specifically, the properties are largely devoid of vegetation and located within the township of St George. Existing access conditions onto the property are to remain and are considered sufficient for fire fighting vehicles.</p>
<p>PO13 The development design responds to the potential threat of bushfire and establishes clear evacuation routes which demonstrate an acceptable or tolerable risk to people.</p>	<p>N/A – The development site is not located in an area identified as having hazardous vegetation. Additionally, no changes to current activities occurring on both properties are proposed. Therefore, the reconfiguration will not result in any increase risk to people occupying/visiting the development site.</p>
<p>PO14 Critical infrastructure does not increase the potential bushfire hazard.</p>	<p>N/A - The proposed development is for reconfiguring a lot – boundary realignment with no additional critical infrastructure to be added onto either properties subject to the application.</p>
<p>Local heritage places</p>	

<p>PO15 Development maintains an intact context and setting that is compatible with the cultural heritage significance of the place.</p>	<p style="text-align: right;">✓</p> <p>As a result of the proposed development there will be no change to context and setting of the area and any known cultural heritage significance in the immediate area.</p>
Stock Route Network	
<p>PO16 The stock route network identified in SPP mapping – Economic Growth – Agriculture – Stock Route is protected from encroachment by incompatible land uses and allows safe passage of stock traversing the stock route. Development does not adversely impact other stock route values including recreational, environmental and heritage.</p>	<p>N/A – The development site is not located near the Stock Route Network. Furthermore, no new lots are being created as the proposal is for a boundary realignment.</p>
Petroleum Pipelines	
<p>PO17 The integrity of pipelines carrying petroleum is maintained.</p>	<p>N/A – The development site does not contain a petroleum pipeline or pipeline easement.</p>

Future Construction of St George Library – Approval Requirements

As stipulated on the proposed plans, the boundary realignment is done with the intention to facilitate the new library build to be contained within Lot 5 (as per the siting of the current library).

Under the current *Balonne Shire Planning Scheme 2019* the library is considered to fall within 'Community Use' being defined in Schule 1: Definitions as;

Premises used for providing artistic, social, or cultural facilities and community support services to the public and may include the ancillary preparation and provision of food and drink. Examples include art gallery, community centre, community hall, library, museum.

In the Centre Zone Tables of Assessment, 'Community Activities' which includes Community Use is accepted development – if provided by a public entity or BSC.

Given Balonne Shire Council is completing the redevelopment for the Library, no Development Approval for Material Change of Use is triggered.

It is importantly noted that while the proposed St George library redevelopment will not trigger development approval, building works approval will be required to be obtained for both the demolition of the existing building and new build.

Recommendation/s

A perceived conflict of interest was identified with the application given Balonne Shire Council is the applicant to the development application and the Assessment Manager. Accordingly, the assessment report and recommendations presented have been reviewed by Jessica Reiser, Town Planner at Maranoa Regional Council to ensure no bias to the grounds of decision.

That:

1. Council approves the development application RL 109 - Development Application for Reconfiguring a Lot - Boundary Realignment (two lots into two lots) located at 110 & 112-118 Victoria Street, St George QLD 4487 (described as Lot 1 on RP96467 and Lot 5 on RP96467), subject to the permit conditions listed below.

Preamble

- i. The relevant planning scheme for this development is *Balonne Shire Planning Scheme 2019*. All references to the 'Planning Scheme' and 'Planning Scheme Schedules' within these conditions refer to the above Planning Scheme.
- ii. The land use rating category may change upon commencement of any new approved use on the site. Council's current Revenue Statement, which includes the minimum general rate levy for the approved use/s, can be viewed on the Council Website: <https://www.balonne.qld.gov.au/council/rates>.

- iii. A development permit for a Material Change of Use will be required for any activity or development on the approved lot(s) that does not comply with the accepted development criteria in the *Balonne Shire Planning Scheme 2019*.
- iv. The registered proprietor is responsible for gaining the approvals of any other Authorities having jurisdiction over any part of the works required to facilitate the approved development.
- v. New development on any of the approved lots must be provided with an adequate supply of electricity. In the event that an adequate supply of electricity cannot be achieved through efficient design and alternative energy technologies, a connection to the reticulated electricity network must be made available. Prospective purchasers and/or developers of the newly created lot/s are encouraged to contact the relevant electricity provider to determine the availability and costs associated with connecting to the reticulated network.
- vi. This approval lapses if a plan for the reconfiguration is not given to the Council within four (4) years of the approval taking effect.
- vii. The plan for the reconfiguration must be duly signed by the registered proprietor of the land and the surveyor, and submitted to Council for approval in a form acceptable to Council within the relevant period.
- viii. Unless otherwise stated all conditions shall be completed prior to the Council endorsing the relevant plan of survey.
- ix. All persons involved in the development, operation or use of the site have an obligation to take all reasonable and practical measures to prevent or minimise any biosecurity risk under the *Biosecurity Act 2014*.
- x. The *Environmental Protection Act 1994* states that a person must not carry out any activity that causes, or is likely to cause, environmental harm unless the person takes all reasonable and practicable measures to prevent or minimise the harm. Environmental harm includes environmental nuisance. In this regard, persons and entities involved in the operation of the approved development are to adhere to their 'general environmental duty' to minimise the risk of causing environmental harm to adjoining premises.
- xi. It is the responsibility of the developer to obtain all necessary permits and submit all necessary plans to the relevant authorities that are associated with the approved development, including any permits/approvals required by any State Agencies.
- xii. In completing an assessment of the proposed development, Council has relied on the information submitted in support of the development application as true and correct. Any change to the approved plans and documents may require a new or changed development approval. Council should be contacted for advice in the event of any potential change in circumstances.

Approved development

1. The approved development is for a Reconfiguration of a Lot – Boundary Realignment (Two Lots into Two Lots) as shown on the approved plan.
2. The applicant shall contact Council to arrange a development compliance inspection prior to the endorsement of the survey plan.

3. Complete and maintain the approved development in accordance with:
 - (a) the development approval documents; and
 - (b) those parts of the approved development that have been specified in detail by the Council unless the Council agrees in writing that those parts will be adequately complied with by amended specifications.

General

4. The approved development is to be carried out generally in accordance with following approved plans and documents, as amended, and subject to the approval conditions. Where there is any conflict between the approval conditions and the details shown on the approved plans, the approval conditions prevail.

Drawing/report title:	Prepared by:	Date:	Reference no:	Version/issue:
Lot Reconfiguration Plan ACD-0001	Fulton Trotter Architects	25.02.21	3439SG01	—
Lot Reconfiguration Plan (Aerial View) ACD-0001	Fulton Trotter Architects	25.02.21	3439SG01	—

5. All works required to facilitate the development must be designed and constructed in accordance with:
 - (a) the development approval conditions;
 - (b) any relevant provisions of the applicable planning scheme;
 - (c) Council’s standard designs for such work where such designs exist;
 - (d) any relevant Australian Standard that applies to that type of work; and
 - (e) any alternative specifications that Council has agreed to in writing and which the developer must ensure do not conflict with any requirements imposed by any applicable laws and standards.
6. All civil and related work is to be designed and supervised by Registered Professional Engineers of Queensland (RPEQ-Civil) who are competent in the construction of the works.
7. Existing buildings, structures, infrastructure and services located on the development site are not to encroach on proposed allotment boundaries.

Provision of Services

8. Each lot is to have a water supply adequate for the intended use.
9. All services installation, including onsite sewerage and water connections, must comply with:
 - (a) the development approval conditions;
 - (b) the relevant service provider’s requirements and specifications;
 - (c) any relevant provisions in the planning scheme for the area;
 - (d) Council’s standard designs for such work where such designs exist;

- (e) any relevant Australian Standard that applies to that type of work; and
 - (f) any alternative specifications that the Council has agreed to in writing and which the developer must ensure do not conflict with any requirements imposed by any applicable laws and standards.
10. Any conflicts associated with proposed and existing services are to be forwarded by the developer to the appropriate controlling authority for approval of any proposed changes.
11. Infrastructure and services required in connection with the establishment of the approved development must be provided at no cost to Council.

Access & Roads

12. The landowner is responsible for the construction and maintenance of crossovers from the road carriageway to the property boundary and all internal vehicle access ways, and for obtaining any approvals that may be required and for complying with the applicable designs and standards.

Repair Damaged Infrastructure

13. Council and public utility services, infrastructure and assets must be located and protected at all times. Any damage to existing roads and infrastructure that is attributable to the development of the site must be immediately rectified in accordance with the asset owners' requirements and specifications and to the satisfaction of the asset owners' representative/s, and at no cost to Council.

No Cost to Council

14. All costs associated with the approved development are to be met by the developer, including costs of survey, easement preparation and registration, document lodgement, plan sealing and land transfers, unless there is specific agreement by other parties, including the Council, to meeting those costs.

Latest versions

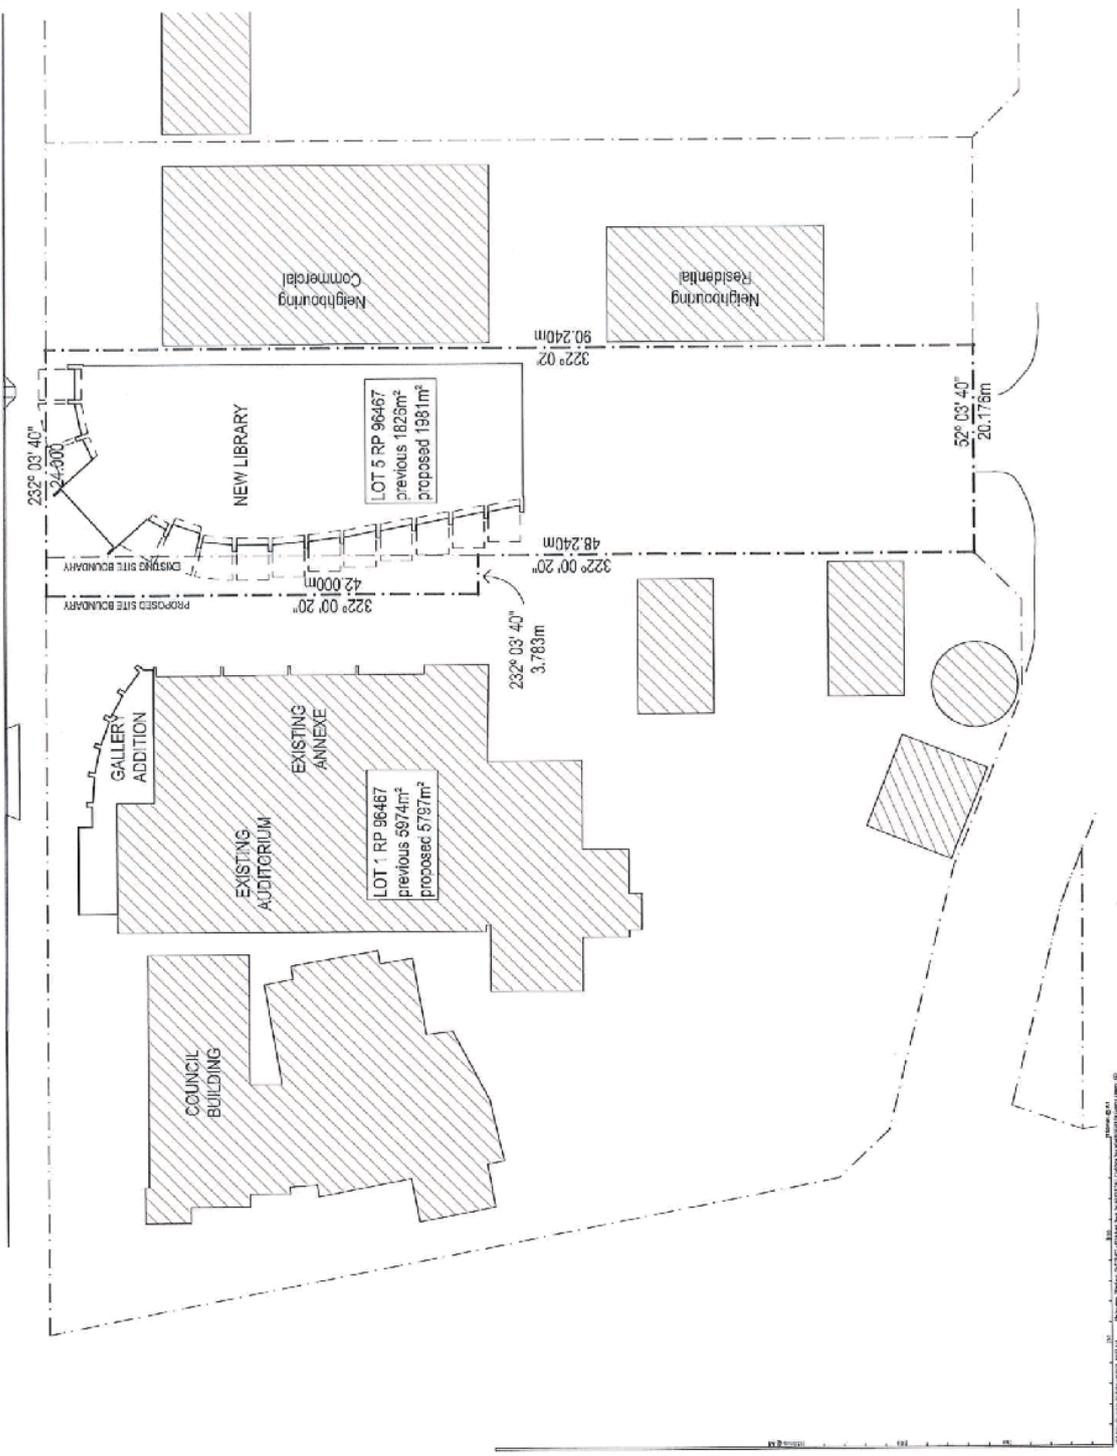

15. Where another condition refers to a specific published standard, manual or guideline, including specifications, drawings, provisions and criteria within those documents, that condition shall be deemed as referring to the latest versions of those publications that are available at the time the first operational works or compliance approval is lodged with the assessment manager or approval agency for those types of works to be performed or approved, unless a regulation or law requires otherwise.

Rates and charges

16. All rates and charges of any description and all arrears of such rates and charges, together with interest outstanding thereon, on the land, due to Council, shall be paid prior to the Council endorsing the plan of survey.

Digby Whyte
Director Environment & Regulatory Services

NOTES:
 1. THIS PLAN IS A PRELIMINARY DESIGN AND IS NOT TO BE USED FOR CONSTRUCTION.
 2. THE CLIENT IS RESPONSIBLE FOR OBTAINING ALL NECESSARY PERMITS AND APPROVALS.
 3. THE CLIENT IS RESPONSIBLE FOR OBTAINING ALL NECESSARY SERVICES AND CONSULTANTS.
 4. THE CLIENT IS RESPONSIBLE FOR OBTAINING ALL NECESSARY SERVICES AND CONSULTANTS.

Sub-Heading

The purpose of this report is for Balonne Shire Council to consider a full reimbursement of the development application fee paid for MCU 190 Development Approval issued on 23rd February 2021 for Material Change of Use – Medium Impact Industry (Container Refund Depot and Storage Facility).

Background

On 25th February 2021 Council's Chief Executive Officer, Matthew Magin received written correspondence from the Secretary, Sally Moon of the Lions Club of St George Inc. requesting a full reimbursement of the development application fee incurred to obtain Development Approval for the Container Refund Depot and Storage Facility relocation to the property located at 150 Arthur Street, St George (see **Attachment 1**).

The Lions Club of St George Inc. have funded the Container Refund Scheme (CRS) operation independently and are subsequently requesting from Council a full reimbursement of the development fee paid to Council through obtaining the development approval required to operate the use. Provided below is the Council fee attached to obtaining development approval for an 'Industry Use' subject to Code Assessment.

- **Development (Planning) Application: \$2,430**

It is considered that the current fee applied to the development approval is reasonable for this type of development and would not incur unreasonable financial burden to the applicant. While the Lions Club of St George Inc. does provide a community service it is an organisation which benefits financially from the CRS operation, therefore a full reimbursement of the above fee may result in setting a precedent for other businesses to apply for and be successful in obtaining development fee reimbursement and waivers from Council.

Based on the above, it is considered that a full reimbursement of the Council Development Application fee be declined.

It is noted that the Lions Club of St George Inc. has not requested a donation/sponsorship from Council in the past.

St George Qld 4487

25th February 2021

Mr Matthew Magin, Chief Executive Officer
Balonne Shire Council
PO Box 201
St George Qld 4487

Dear Mr Magin,

DA APPROVAL FOR LIONS CLUB ST GEORGE INC- ST GEORGE RECYCLING

With reference to the above matter, as a not-for-profit service club, we respectfully ask if we could have a refund of the DA application fee of \$2,430. The return of these funds would be much valued by the Lions Club St George and with our many community charity projects will find its way back into the local community.

Thank you for your consideration of this matter.

Kind regards

Sally Moon

Secretary
Lions Club St George Inc

OFFICER REPORT

TO: Council

SUBJECT: **MCU 191 - Development Application for Material Change of Use - "Community Use" located at 72-76 Saint Georges Terrace, St George QLD 4487 (described as Lot 6 on RP98584, Lot 7 on RP98584 and Lot 8 on RP98584)**

DATE: 05.03.21

AGENDA REF: ERS5

AUTHOR: Fiona Macleod - Planning & Development Officer

Sub-Heading

MCU 191 Development Application for Material Change of Use – Community Use at 72-76 Saint Georges Terrace, St George (Lot 6 on RP98584, Lot 7 on RP98584 and Lot 8 on RP98584) by Council's planner.

Overview

Council has received a properly made development application from South West Indigenous Corporation C/- Precinct Urban Planning for MCU 191 - Development Application for Material Change of Use - "Community Use" located at 72-76 Saint Georges Terrace, St George QLD 4487 (described as Lot 6 on RP98584, Lot 7 on RP98584 and Lot 8 on RP98584).

The development application is subject to Code assessment and must be assessed against the assessment benchmarks (to the extent relevant) provided by Section 45 of the *Planning Act 2016* and any matters prescribed by regulation. The *Development Assessment Rules* set out the procedural requirements that Council must follow in the development assessment process.

The application is generally consistent with the assessment benchmarks provided by the *Planning Act 2016* and any perceived conflict with the assessment benchmarks can be addressed by way of conditions of development approval.

Background

Applicant:	South West Indigenous Corporation C/- Paul Kelly, Precinct Urban Planning
Owner of Land:	South West Indigenous Corporation
Land description:	Lot 6 on RP98584 Lot 7 on RP98584 Lot 8 on RP98584
Lot area:	Lot 6 on RP98584 911sqm Lot 7 on RP98584 754sqm

	Lot 8 on RP98584 875sqm
Zone/Precinct:	Centre Zone
Overlays/State Interests:	Nil
Proposal:	Material Change of Use – Community Use
Proposal Assessment category:	Code Assessment
Referral/Concurrency Agencies:	Nil
Properly made date:	05 February 2021

PROPOSAL

The application seeks approval for MCU 191 - Development Application for Material Change of Use - "Community Use" located at 72-76 Saint Georges Terrace, St George QLD 4487 (described as Lot 6 on RP98584, Lot 7 on RP98584 and Lot 8 on RP98584).

The proposal involves the development of a Community Use intended to support communities within Balonne Shire and beyond which will be operated by South West Indigenous Corporation.

Specifically, the new facility will be accommodated in a single storey building on the property and comprise of the following:

- Gallery
- Studio/Meeting Room
- Four (4) Offices
- Staff Kitchen
- Staff and Public Amenities
- Store Room
- 6 x onsite carparking spaces including one (1) person with disability (PWD) carpark.
- Landscaping along the primary frontage (Saint Georges Terrace) as well as along the north-eastern side of the building and forward of the rear carpark adjacent to the Beardmore Place frontage.

(Refer to Attachment 1: Development Application - Proposal Plans)

The subject property has dual road frontages being Saint Georges Terrace and Beardmore Place. The proposed built form is to front Saint Georges Terrace with pedestrian access from this frontage only. Vehicle access and onsite carparking to the development will be from Beardmore Place. The facility will require connection to Council infrastructure services (namely water and sewerage) with electricity connection also required.

Characteristics of the site:

The development site is located in the Centre Zone of the *Balonne Shire Planning Scheme 2019*, within the township of St George. Access to the site is proposed from two crossovers which will require upgrades, both from Beardmore Place with one crossover to be a designated entry point and one crossover to be a designated exit point.

The subject site is made up of three (3) rectangular-shaped blocks that comprises a total area of 2,540 square metres. The lots subject to the development are vacant with no existing built form and limited vegetation.

The proposed community use activities will be located towards the frontage of the lot with Saint Georges Terrace and will be setback off all boundaries (**Refer to figure 1 – Site Plan**).

Surrounding land uses are as follows:

- North:
 - o 68 Saint Georges Terrace (Commercial Use – Office)
 - o 6-8 Henry Street (Commercial Use (Office))
 - o 10 Henry Street (Residential (Home Based Business))
- South:
 - o 78 Saint Georges Terrace (Commercial Use – Office)
 - o 11-13 Beardmore Place (Commercial Use – Food and Drink Premises)
- East: Beardmore Place (Local Government Road Reserve)
- West: Saint Georges Terrace (Local Government Road Reserve)

Figure 1: Development site

Source: QLD Globe

The site is currently vacant and devoid of built form. The site is adjoined by other centre zoned land (to the north and south) with a road reserve separating the property from further centre zoned land (to the east, Beardmore Place) and the Balonne River being on the western side of Saint Georges Terrace (opposite the premises).

The proposed community use building is to be situated in the front western setback of the property with the building fronting Saint Georges Terrace as the primary frontage. The balance of the property is made up of carparking and landscaping with vehicle access from Beardmore Place. (**Refer to figure 2 – Site Plan**).

ASSESSMENT

The proposal constitutes a *material change of use* as defined in the *Planning Act 2016* (being *the start of a new use of the premises*).

The proposed use is defined as “Community Use” in the *Balonne Shire Planning Scheme 2019* (the Planning Scheme):

Community Use means:

Premises used for providing artistic, social or cultural facilities and community support services to the public and may include the ancillary preparation and provision of food and drink.

Examples include: *Art gallery, community centre, community hall, library, museum.*

Pursuant to Section 45 of the *Planning Act 2016*, a Code Assessable application is an assessment that must be carried out only -

- (a) *against the assessment benchmarks in a categorising instrument for the development; and*
- (b) *having regard to any matters prescribed by regulation.*

The Assessment Benchmarks applicable to the development assessment are:

- the Regional Plan (i.e. *Maranoa-Balonne Regional Plan* and *Darling Downs Regional Plan*);
- the *State Planning Policy*; and
- the *Balonne Shire Planning Scheme*.

After completing an assessment of the proposal against the Assessment Benchmarks, Council must make a decision about whether to approve or refuse this development application in accordance with Section 60 of the *Planning Act 2016*.

Assessment Benchmarks

Regional Plans

The *Maranoa Balonne Regional Plan 2009* is a statutory planning instrument intended to assist in managing change and shaping the prospects of rural communities in the Maranoa and Balonne regional council areas. The regional plan sets out desired regional outcomes, which identify aspirations for ecological sustainability for the region.

The *Darling Downs Regional Plan 2013* was adopted in October 2013, and covers the local government areas of Balonne, Goondiwindi, Maranoa, Southern Downs, Toowoomba and Western Downs.

The intent of the Darling Downs Regional Plan is to provide direction to resolve competing state interests relating to the agricultural and resources sectors, and to enable the growth potential of the region’s towns. It seeks to maximise opportunities for co-existence of resources and agricultural land uses.

The *Balonne Shire Planning Scheme*, and specifically the strategic framework, appropriately advances the *Maranoa–Balonne Regional Plan 2009* and the *Darling Downs Regional Plan 2013* as they apply in the planning scheme area, and therefore an independent assessment of the proposal against these planning instruments is not required. Although this is the case, the regional planning outcomes sought to be achieved by these regional

plans have been considered as part of the development assessment. The development proposal is consistent with both regional plans.

State Planning Policy

The development assessment must consider the State Planning Policies to the extent they have not been appropriately integrated within or are inconsistent with the Balonne Shire Planning Scheme. As the Balonne Shire Planning Scheme appropriately integrates all relevant aspects of the State Planning Policy a separate assessment of the application against this planning instrument is not required.

Balonne Shire Planning Scheme 2019

The relevant sections of the *Balonne Shire Planning Scheme 2019* are:

- Part 4 Local Government Infrastructure Plan
- Part 5 Tables of assessment
- Part 6 Zones
 - Part 6.2.1 Centre zone code
- Part 7 Development Codes
 - Part 7.3.1 General development code

Part 4 - Local Government Infrastructure Plan

The Balonne Shire Council does not have a Local Government Infrastructure Plan for infrastructure charging.

Part 5 - Tables of assessment

The Tables of Assessment identify the category of development, the category of assessment and the assessment benchmarks for assessable development in the planning scheme area. The Tables of Assessment identify the level of assessment for the proposed land use in the proposed location as “Code Assessment.”

Part 6 - Zones

Zones organise the planning scheme area in a way that facilitates the location of preferred or acceptable land uses. The subject site is located in the Centre Zone.

Part 6.2.1 Centre zone code

The purpose of the centre zone code is to:

Provide for the urban development of the towns of St George and Dirranbandi as community and service centres. Development located in this zone provides for a mix of uses which support the needs of the local community. The zone provisions aim to:

- (a) maintain the character and amenity of St George and Dirranbandi.
- (b) provide for the continuation of existing infrastructure such as community schools, halls and recreation facilities
- (c) allow for tourist uses where these can be successfully integrated into the character and fabric of the towns.
- (d) ensure that development provides an appropriate level of infrastructure; and
- (e) facilitate economic development and vibrant main streets by:
 - (i) promoting re-use of existing buildings
 - (ii) providing for a wide range of commercial uses where it does not conflict with sensitive uses.

The purpose of the code will be achieved through the following outcomes:

- (a) a range of uses including retail, business and education are supported in the zone where they do not impact on neighbouring uses.
- (b) development is serviced with BSC infrastructure where BSC infrastructure exists.
- (c) development is located in areas that are flood protected and where bushfire hazard risk is low.

The purpose of the zone will also be achieved through the following additional overall outcomes for particular zones:

- (a) this zone promotes the commercial, professional, government and retail uses that service the Shire and south-west Queensland, and that are consolidated in the St George and Dirranbandi town centres.
- (b) new developments create a highly attractive and pedestrian-based built form that achieves a high standard of design and blends with the existing town character and streetscape.
- (c) new commercial buildings make provision for on-site handling of goods, car parking for staff and clients, landscaping and shade areas in keeping with the existing streetscape.
- (d) new businesses are encouraged to use existing buildings to help keep the Centre zone vibrant. Development provides a high level of amenity through a compatible mixing of land uses, activities and building forms, access to services and facilities, cohesive streetscapes and quality urban design.

The proposed development complies with the Purpose and Outcomes of the Centre zone because:

- The proposed development makes provision for on-site handling of goods and carparking for staff and visitors with landscaping and design of the building to keep with the existing streetscape.
- The development will positively contribute to the Centre Zone character of St George and will diversify community services on offer to the Balonne Shire Council area adding to a vibrant central business centre area.
- The proposed development has considered in its design to implement appropriate setbacks from abutting residences (specifically 10 Henry Street) and furthermore implements landscaping and open space areas around the building from all interfaces.
- The development site is not located within an area subject to flooding (i.e. within the St George town levee) and has low bushfire risk given its central location within town and devoid of native vegetation – fire load.
- An adequate amount of car parking spaces will be provided for both staff and customers to the site; and
- The proposed development will be connected to electricity supply and Council’s infrastructure including reticulated water and sewerage supplies and has direct access to the road network with dual frontage to both Saint Georges Terrace and Beardmore Place.

The Code’s relevant Performance Criteria are shown below, in order to more easily view structured and detailed consideration of relevant issues —

Performance outcomes	Response
For assessable development	
PO1 Development is consistent with the existing built form in terms of size, design, siting and physical characteristics. The appearance and siting of buildings, other structures, car parking areas or signage is compatible with the local streetscape character, the style and design of nearby buildings, and is respectful and sympathetic to any heritage	✓ The proposed development has considered the existing character and the streetscape of both Saint Georges Terrace (which will be the primary frontage of the built form) and Beardmore Place. Importantly, the Harmony Centre will be single storey in height and has incorporated a small setback from the street inline with adjoining properties. The architectural design of

<p>place identified in the SPP mapping – Environment, Cultural heritage.</p>	<p>the building is modern however incorporates a colour schedule of neutral colours which are consistent with existing buildings and the natural environment along Saint Georges Terrace. Like other properties with dual frontages to both Saint Georges Terrace and Beardmore Place, the siting of the development has nominated its primary frontage to be the Terrace given the direct interface with the Balonne River therefore vehicle access and car parking for the property will be from Beardmore Place which is consistent with the local character.</p> <p>The development is not located in close proximity of a heritage place, and given site coverage, height and building location on the property, will not detract from any heritage place in the wider area.</p>
<p>PO2 Development with frontage to a highway must have safe access points that do not adversely impact on the safety and efficiency of the road.</p>	<p>N/A – The subject site does not adjoin a highway.</p>
<p>PO3 Development adjacent to the highway corridor is setback from the corridor to avoid adverse impacts to the operation of the road corridor.</p>	<p>N/A – The subject site does not adjoin a highway.</p>
<p>PO4 All uses are located, designed, orientated and constructed to minimise the impacts from the noise, vibration and dust emissions from the State-controlled road and/or rail network.</p>	<p>N/A – The subject site does not adjoin a highway or rail network.</p>
<p>PO5 Tourist accommodation, in the form of a caravan park or motel is provided in a location where it can be serviced with infrastructure, where it:</p> <ul style="list-style-type: none"> (a) is complementary to the existing character of the area (b) does not have an adverse impact on residential amenity in terms of privacy, safety, noise, odour and fumes, lighting and traffic generation <p>does not lead to a reduced quality of accommodation experiences available within the location.</p>	<p>N/A – The proposed development is not for tourist accommodation.</p>
<p>PO6 Commercial uses that support and service the residential areas are centrally located where they can be conveniently and safely accessed without having an adverse impact on residential amenity including privacy, safety, noise, odour and fumes, lighting and traffic generation.</p>	<p style="text-align: center;">✓</p> <p>The proposed development, for 'Community' purposes will positively support and service the St George township being located centrally and adjoining land uses being non-residential activities i.e. sensitive land uses. Given the sites location within the 'Centre' zone, directing a cluster of Commercial activities and nature of the use it is not considered that adverse impacts will occur to residential amenity.</p>

	However, to ensure existing sensitive land uses are protected, conditions on any approval regarding lighting, air and noise will be imposed to ensure these areas are protected.
<p>PO7</p> <p>The character of the Centre zone is enhanced by the design of new buildings that are sympathetic to traditional streetscapes, in terms of scale, siting, architectural elements such as awnings and building features.</p>	<p style="text-align: center;">✓</p> <p>The development is consistent with the type and scale of development in this area of the Centre Zone. The height of the proposed built form is single storey in nature with a maximum building height of 5.62m above natural ground level.</p> <p>Total site coverage of the building is 14.53% which is well below the maximum site cover of 85% which is permitted in the Centre Zone.</p>
<p>PO8</p> <p>New buildings maintain and enhance the existing streetscape and relationship with adjoining buildings.</p>	<p style="text-align: center;">✓</p> <p>The proposed built form has been sited to have a similar setback to adjoining properties on either side (setback 5 metres). Given the existing character of the streetscape with limited awnings and buildings fronting the street will no setback it is considered that the proposed building will appropriately integrate with existing buildings. Importantly, the height, materials, colour schedule and landscaping at the front of the premises will blend the architectural style with the character of the area.</p>
<p>PO9</p> <p>New uses developed in the zone do not detract from the zone's predominant commercial nature.</p>	<p style="text-align: center;">✓</p> <p>The proposed use for 'Community' purpose is a common feature within the Centre Zone. The use will not detract from the commercial nature of the St George centre and will positively contribute to the diversity of businesses available to residents and visitors to Balonne Shire.</p>

Part 7.3.1 General development code

The purpose of the General development code is to ensure that development in the Shire is located, designed and managed in a safe and efficient manner.

The purpose of the code will be achieved through the following overall outcomes:

- (a) *Development is located to protect and enhance matters of national, state and local environmental significance, landscape values and ecological connectivity.*
- (b) *Development has a safe and efficient site layout.*
- (c) *Development does not detract from the Shire's unique building design, is complementary to the scale of neighbouring uses, and contributes to the character of the street and the locality.*
- (d) *Development on local heritage places:*
 - i. does not result in the demolition or removal of a local heritage place, unless there is no practical reason and feasible alternative.*

- ii. *conserves the physical features, fabric and contents that contribute to the cultural heritage significance of the local heritage place.*
- iii. *safeguards archaeology and archaeological potential, and ensures they are appropriately investigated and artefacts appropriately managed.*
- (e) *An appropriate level of servicing and infrastructure is provided to new development and is connected to BSC's infrastructure where available.*
- (f) *The site layout protects adjoining amenity, allows access around the building, allows sufficient areas for parking and manoeuvring on the site and safe and efficient access and egress.*
- (g) *Assets of the BSC are protected.*
- (h) *Any planned earthworks ensure that existing drainage regimes are maintained.*
- (i) *Development does not conflict with the ongoing efficient and safe use of the stock route network by travelling stock.*
- (j) *Development does not inhibit the safe and efficient operation of pipelines.*

The proposed development complies with the Purpose and Outcomes of the General Development Code because:

- The proposed development is located on a property that is identified as not having matters of national, state and local environmental significance, landscape values and ecological connectivity. Specifically, the subject property is located within the centre of St George and is vacant land devoid of any regulated vegetation;
- The proposed development does not involve the demolition or removal of a local heritage place;
- The proposed development will not detract from the shire's unique building design and is consistent with the existing character of St George township being that the proposed built form is of size, scale and materials/colour scheme to surrounding buildings. Furthermore, the proposed use is setback from Saint Georges Terrace and provides for landscaping to reduce visual impact and offsets from the use to adjoining properties.
- Given the proposed developments location within St George township BSC infrastructure connections are available and will be utilised.
- The proposed development will allow for adequate manoeuvring onsite to allow for safe and efficient access and egress from the site with two crossovers to be upgraded off Beardmore Place. Onsite carparking is also provided for the proposed use visitors and employees;
- The proposed development will not conflict with the ongoing efficient and safe use of the stock route network given it is not adjacent to an identified stock route; and
- The development is appropriately separated from pipelines and will not impact on pipeline operations.

The Code's relevant Performance Criteria are shown below, in order to more easily view structured and detailed consideration of relevant issues—

Performance outcomes	Response
Site Layout	
PO1 The size and bulk of new buildings associated with development maintains and enhances the intended local character of the zone by avoiding over-development of the site, and allowing for	✓ The proposed developments footprint is to incorporate a new single storey building with a footprint of 369.47m ² of which gross floor area accounts for 220.25m ² . Accordingly, the site coverage of the proposed community

development at a consistent scale, siting, and intensity to nearby development.	use over the site will result in being 14.53% with the balance of the site occupied by carparking and landscaping. The site coverage is well below, and therefore meets the maximum allowable amount stipulated (being 90%) for the Centre zone.
<p>PO2</p> <p>Landscaping is provided to enhance the visual appeal of the development and soften the appearance of the built form. The majority of landscaping is to be undertaken on the principal street frontage of the development.</p>	<p style="text-align: center;">✓</p> <p>The development incorporates some proposed landscaping on the property specifically, to be located along the primary frontage (Saint Georges Terrace) as well as along the north-eastern side of the building and forward of the rear carpark adjacent to the Beardmore Place frontage. This will total around 10% of the subject property being landscaped. Given the zoning of the land, Centre, and immediate surrounding properties existing conditions it is considered proposed landscaping is adequate.</p>
Building Design	
<p>PO3</p> <p>New development maintains the low-rise scale and character of the Shire.</p>	<p style="text-align: center;">✓</p> <p>The built form proposed on the property for the development will be single storey with the building height being 5.624m² metres above ground level. It is considered the scale will remain consistent with the low-rise scale character of the immediate area.</p>
<p>PO4</p> <p>New buildings or structures present a traditional façade to the street.</p>	<p>N/A – the proposed development is located within the Centre Zone and therefore requirements pertaining to façade elements are not applicable.</p> <p>It is noted however that the building is consistent with the character of existing built form in the immediate area fronting Saint Georges Terrace, aligning setback and colour scheme and building materials with buildings.</p>
<p>PO5</p> <p>Development is generally in accordance with existing setbacks within the locality.</p>	<p style="text-align: center;">✓</p> <p>The proposed development complies with applicable Queensland Development Code requirements in regard to setbacks. Furthermore, the proposed setback generally accords with the existing setbacks character of buildings sited on properties in the immediate area.</p>
Access, manoeuvring and parking	
<p>PO10</p> <p>The proposed development accommodates sufficient car parking on site.</p>	<p style="text-align: center;">✓</p> <p>The statutory car parking requirements as stipulated for uses in table 7.3.1.2 in the planning scheme do not list requirements for Community Use. Accordingly, the required amount is at the discretion of Council. The proposed development states provision of 6 car parking spaces to accommodate the use including 1 person with disability (PWD) space. It is considered that the proposed car parking configuration will adequately cater for the use to occur on the property. Importantly, recognised, if the use proposed was commercial, statutory car parking requirements would be exceeded.</p>

<p>PO11 The proposed driveway is clear of all impediments.</p>	<p style="text-align: center;">✓</p> <p>The access point locations to be utilised are clear of street furniture, gully pits, manholes, power poles and street trees. A condition on any approval issued will ensure BSC assets and infrastructure are protected by any upgrades required to these access points.</p>
<p>PO12 The location of driveways does not create a danger to the safety and efficiency of existing intersections.</p>	<p style="text-align: center;">✓</p> <p>The proposed access points to be utilised off Beardmore Place by the development are setback more than 6 metres from the nearest intersecting road, being Henry Street.</p>
<p>PO13 Access to, from and within the site:</p> <ul style="list-style-type: none"> • is adequate for the type and volume of traffic generated by the use. • does not adversely impact on the traffic network external to the site. • caters for safe pedestrian access. • provides for disabled access. 	<p style="text-align: center;">✓</p> <p>The access to and from the property is to continue to utilise the access points from Beardmore Place with onsite carparking and manoeuvring areas identified to be bitumen surface. Council's Infrastructure Department was referred the application and cited no concerns regarding adverse impacts to the traffic network external to the site. Regarding the crossovers to be utilised, it was requested a condition on any approval issued be enforced requiring that the access points of Beardmore Place are upgraded to a sealed surface and maintenance of the access points is by the developer. The access will also require to continue to be in accordance with <i>Balonne Shire Council's Private Property Entrance Policy</i> dated 15 January 2010. One carparking space has been identified as designated for disabled access.</p>
Infrastructure and Services	
<p>PO14 The development is supplied with an appropriate level of infrastructure to support the intended use.</p>	<p style="text-align: center;">✓</p> <p>The proposed development will be connected to telecommunications and electricity supplies. A condition on any approval issued with require that this occur to appropriate standards.</p>
<p>PO15 All development has an adequate supply of potable water and can provide for appropriate treatment and disposal of effluent and other wastewater. Note: If the development is not connected to a reticulated water supply network, there is no guarantee of reliability or availability of water from watercourses, overland flow or underground water for new non-stock and domestic development across the Balonne Shire. This is because access to water is subject to the limitations and appropriate authorisation under the <i>Water Act 2000</i>.</p>	<p style="text-align: center;">✓</p> <p>The proposed development will be connected to BSC reticulated water supply network given its location within St George township. The application was referred to Council's Infrastructure Department who sited no water connection issues or supply from the proposed use on the property.</p>
<p>PO16 Stormwater is collected and discharged to ensure no impacts on adjoining landowners, BSC or State infrastructure while also ensuring</p>	<p style="text-align: center;">✓</p> <p>The proposed development will be discharged to a lawful point of discharge which is available from Saint Georges Terrace. To ensure stormwater is managed appropriately</p>

<p>environmental values of waters in the Shire are maintained.</p>	<p>a condition will be included on any approval issued that stormwater drainage is provided in accordance with:</p> <ul style="list-style-type: none"> • Queensland urban drainage manual, 3rd Edition, Queensland Department of Energy and Water Supply, 2013 • Pilgrim, DH, (ed)., Australian Rainfall & Runoff – A Guide to Flood Estimation, Institution of Engineers, Australia, Barton, ACT, 1987 • Class 1 and Class 10 buildings – National Construction Code, Volume 2. <p>Additionally, Council’s Manager of Water, Sewerage and Towns was referred the application and cited no concerns regarding the proposed engineering drawings provided to support stormwater collection and discharge from the premises.</p>
<p>PO17 Wastewater discharge to a waterway is avoided or managed in a way that maintains ecological processes, riparian vegetation, waterway integrity, and downstream ecosystem health.</p>	<p style="text-align: center;">✓</p> <p>The proposed development will not discharge wastewater into a waterway.</p>
<p>BSC assets</p>	
<p>PO18 Structures and buildings do not adversely impact on BSC infrastructure.</p>	<p style="text-align: center;">✓</p> <p>The proposed development was referred to Council’s Infrastructure Development for comment. A response was generated by Council’s Manager of Water, Sewerage and Towns who indicated that the plans identify a future building to be located over the top of an existing gravity sewer main. Accordingly, conditions on any approval issued will require that the proposed building must be constructed in accordance with Queensland Development Code MP1.4 – Building Over or Near Relevant Infrastructure. Additionally, clarification was sought from the applicant regarding this future building who confirmed it would be subject to future approval and is not part of this development application. Accordingly, consent has been given to provide a notation on approval plans with words to this effect.</p> <p>All other BSC infrastructure assets will remain unaffected by the proposed development.</p>
<p>Electricity infrastructure</p>	
<p>PO29 Development is separated from major electricity infrastructure or substations and incorporates buffers to maintain public health and safety, residential amenity and allow access to infrastructure for maintenance.</p>	<p>N/A - The subject site is not located near major electricity infrastructure or substations.</p>
<p>Local heritage places</p>	

<p>PO30 Development contributes to the retention of a local heritage place, facilitates their adaptive reuse, but does not result in a change that is incompatible with conserving the cultural heritage significance of the place.</p>	<p>N/A - The subject site is not located on or near an identified local heritage place.</p>
Biodiversity	
<p>PO31 Development: (a) is located to avoid significant adverse impacts on matters of state environmental significance (b) facilitates the protection and enhancement of matters of state environmental significance (c) protects and enhances ecological connectivity.</p>	<p>N/A - The subject site is not located on or near an area identified a matters of state environmental significance.</p>
Aviation facilities

Legal Implications

The *Planning Act 2016* and Council’s planning scheme apply.

Policy Implications

Council’s planning policies apply

Financial and Resource Implications

Nil. Recommended conditions of approval must be completed at no cost to Council.

Attachments

1. Attachment 1 - MCU 191 Proposal Plans.pdf 

Recommendation/s

That:

1. Council approves the development application MCU 191 for a Material Change of Use – “Community Use” on land located at 72-76 Saint Georges Terrace, St George, described as Lot 6 on RP98584, Lot 7 on RP98584 and Lot 8 on RP98584 subject to the permit conditions listed below.

DEVELOPMENT PERMIT CONDITIONS

Preamble

- i. The relevant planning scheme for this development is *Balonne Shire Planning Scheme 2019*. All references to the ‘Planning Scheme’ and ‘Planning Scheme Schedules’ within these conditions refer to the above Planning Scheme.
- ii. Under the Balonne Shire Planning Scheme 2019 a “**Community Use**” means premises used for providing artistic, social or cultural facilities and community support services to the public and may include the ancillary preparation and provision of food and drink.
- iii. The *Environmental Protection Act 1994* states that a person must not carry out any activity that causes, or is likely to cause, environmental harm unless the person takes all reasonable and practicable measures to prevent or minimise the harm. Environmental harm includes environmental nuisance. In this regard, persons and entities involved in the operation of the approved development are to adhere to their ‘general environmental duty’ to minimise the risk of causing environmental harm to adjoining premises.
- iv. All Aboriginal Cultural Heritage in Queensland is protected under the *Aboriginal Cultural Heritage Act 2003* and penalty provisions apply for any unauthorised harm. Under the legislation a person carrying out an activity must take all reasonable and practicable measures to ensure the activity does not harm Aboriginal Cultural Heritage. This applies whether or not such places are recorded in an official register and whether or not they are located in, on or under private land. The developer is responsible for implementing reasonable and practical measures to ensure the Cultural Heritage Duty of Care Guidelines are met and for obtaining any clearances required from the responsible entity.
- v. It is the responsibility of the developer to obtain all necessary permits and submit all necessary plans and policies to the relevant authorities for the approved use.
- vi. An operational works application will be required to be submitted to and approved by Council where there would be a change 1m or more in the level of any part of the land or where any drainage path is affected; or for urban purposes that involve disturbing more than 2,500m² of land.

- vii. In completing an assessment of the proposed development, Council has relied on the information submitted in support of the development application as true and correct. Any change to the approved plans and documents may require a new or changed development approval. It is recommended to contact Council for advice in the event of any potential change in circumstances.

Use

2. The approved development is a Material Change of Use - "Community Use" as defined in the Planning Scheme and as shown on the approved plans.
3. A development permit for building and plumbing works must be obtained prior to commencing construction of the community use.
4. The approved development is to be carried out generally in accordance with the following approved plans/documents and subject to approval conditions. Where there is any conflict between the approval conditions and the details shown on the approved plans, the approval conditions prevail.

Plan/Document Number	Plan/Document Name	Date

5. During the course of constructing the works, the developer shall ensure that all works are carried out by appropriately qualified persons and the developer and the persons carrying out and supervising the work shall be responsible for all aspects of the works, including public and worker safety, and shall ensure adequate barricades, signage and other warning devices are in place at all times.

Compliance inspection

6. All conditions relating to the establishment of the approved development must be fulfilled prior to the approved use commencing, unless otherwise noted in these conditions.
7. Prior to the commencement of the use, the applicant shall contact Council to arrange a development compliance inspection.

Applicable Standards

8. All works must comply with:
 - a. the development approval conditions;
 - b. any relevant provisions in the Planning Scheme;
 - c. Balonne Shire Council Private Property Entrance Policy 2010;
 - d. any relevant Australian Standard that applies to that type of work; and
 - e. any alternative specifications that Council has agreed to in writing and which the developer must ensure do not conflict with any requirements imposed by any applicable laws and standards.

Development works

9. The developer shall ensure that all approved works are carried out by appropriately qualified persons and the developer and the persons carrying out and supervising the work shall be responsible for all aspects of the works, including public and worker safety, and shall ensure adequate barricades, signage and other warning devices are in place at all times.
10. The developer is responsible for locating and protecting any Council and public utility services, infrastructure and assets that may be impacted on during construction of the development. Any damage to existing infrastructure (kerb, road pavement, existing underground assets, etc.) that is attributable to the progress of works on the site or vehicles associated with the development of the site shall be immediately rectified in accordance with the asset owners' requirements and specifications and to the satisfaction of the asset owners' representative(s).

Amalgamation of Lots

11. The lots comprising the development site (Lot: 6 RP98584, Lot 7: RP98584 and Lot 8: RP98584) must be amalgamated prior to the commencement of the use.

Waste Management

12. All waste generated from construction of the premises must be effectively controlled on-site before disposal. All waste must be disposed of in accordance with the *Environmental Protection (Waste Management) Regulation 2000*.

13. All waste generated on-site must be managed in accordance with the waste management hierarchy as detailed in the *Waste Reduction & Recycling Act 2011*.

Stormwater Drainage

14. Stormwater drainage is to be provided in accordance with:
 - a. Queensland urban drainage manual, 3rd Edition, Queensland Department of Energy and Water Supply, 2013;
 - b. Pilgrim, DH, (ed)., Australian Rainfall & Runoff – A Guide to Flood Estimation, Institution of Engineers, Australia, Barton, ACT, 1987; and
 - c. Class 1 and Class 10 buildings – National Construction Code, Volume 2.

Earthworks and Construction

15. During construction, erosion controls and silt collection measures are to be put in place to protect environmental values and mitigate potential impacts to adjoining properties and roadway/s.

Avoiding Nuisance

16. No nuisance is to be caused to adjoining properties and occupiers by the way of noise smoke, dust, rubbish, contaminant, stormwater discharge or siltation at any time during or after the establishment of the approved development.
17. Dust emanating as result of activities carried out onsite must be continually monitored and suppressed in order to prevent any dust drifting onto road networks and nearby properties and sensitive land uses.
18. Lighting of the site, including any security lighting, shall be such that the lighting intensity does not exceed 8.0 lux at a distance of 1.5 metres from the site at any property boundary.
19. All lighting shall be directed or shielded so as to ensure that no glare directly affects nearby properties.
20. The area and its surrounds shall be kept in an orderly fashion, free of rubbish and clear of weeds and long grasses. The approved development and the premises are to be maintained in a clean and tidy condition and not to pose any health and safety risks to the community.
21. Noise emissions from the development shall not cause environmental harm of nuisance to adjoining properties or “Sensitive Land Uses” in accordance with the *Environmental Protection (Noise) Policy 2008*.
22. Air emissions from the development shall not cause environmental harm of nuisance to adjoining properties or “Sensitive Land Uses” in accordance with the *Environmental Protection (Air) Policy 2008*.
23. Unless otherwise approved in writing by the Council, approved hours of construction are restricted to Monday – Saturday 6.30am to 6.30pm – noise permitted. Work or business which causes audible noise must not be conducted from or on the subject land outside the above times or on Sundays or Public Holidays.

Provision of Services

24. The development must be connected to Council's reticulated water supply network in accordance with the applicable standards and policies.
25. The development must be connected to Council's reticulated sewerage supply network the applicable standards and policies.
26. Proposed buildings located over or near the existing sewer main within the property must be constructed in accordance with '*Queensland Development MP1.4 – Building Over or Near Relevant Infrastructure*'.
27. The development must be connected to an electricity reticulation service in accordance with the relevant service provider's requirements and specifications along with relevant building standards, requirements and specifications (as relevant).
28. If the premises is connected to a telecommunications service, then such works shall be undertaken in accordance with the relevant service provider's requirements and specifications along with relevant building standards, requirements and specifications (as relevant).

Access

29. The landowner shall be responsible for construction and maintenance of vehicle crossovers from the road carriageway to the property boundary. Should any damage be caused at the approved access location, it is the landowner's responsibility to ensure this is reinstated. Any repair works are to be undertaken in consultation with Council and at the landowner's expense.
30. The existing vehicle access points to the development from Beardmore Place shall be upgraded to a concrete standard. The developer will be responsible for the access to be maintained generally in accordance with *Balonne Shire Council's Private Property Entrance Policy* dated 15 January 2010. The design of the vehicle crossovers must cater for the maximum vehicle size accessing the site ensuring no damage to the kerb and channel and roadway.
31. Vehicles entering and exiting the development site must be able to enter and leave in forward direction. Reversing out of the development site is not permitted. Vehicle manoeuvres in this regard are to be totally contained within the development site boundaries.
32. Vehicle movements within the site are to be clear of proposed parking areas, buildings. Vehicle access, parking and manoeuvring areas are to be clearly delineated from pedestrian access ways within the site through the use of line marking, signage, bollards or similar.

Car Parking

33. Car parking and manoeuvring areas are designed in accordance with:
 - a. AS2890.1 – Parking Facilities
 - b. Austroads AP-34/95 - Design Vehicles and Turning Path Templates
 - c. The Access to Premises Standard' (Vol 1 of the National Construction Code).
34. A minimum of six (6) car parking spaces, including one (1) car parking space for persons with disabilities, are to be provided within the development site area generally in accordance with the approved development plans. Car parking areas must be clearly delineated and/or signposted.

No Cost to Council

35. The developer is responsible for meeting all costs associated with the approved development unless there is specific agreement by other parties, including the Council, to meeting those costs. This includes the costs of any services and infrastructure required in connection with the establishment of the development.

Latest versions

36. Where another condition refers to a specific published standard, manual or guideline, including specifications, drawings, provisions and criteria within those documents, that condition shall be deemed as referring to the latest versions of those publications that are publicly available at the commencement of the development works, unless a regulation or law requires otherwise.

Application Documentation

37. It is the developer's responsibility to ensure that all entities associated with this Development Approval have a legible copy of the Decision Notice, Approved Plans and Approved Documents bearing 'Council Approval'.

APPENDIX D – LANDSCAPE PLANS

J Amos Landscape Architect

LEGEND

- site boundary
- grass/turf (not part of works, to be completed by client)
- option 1 - steel garden edge (not part of works. To be completed by client)
- option 2 - plastic garden edge (not part of works. To be completed by client)
- shrub planting
- groundcover planting
- Note: Planting works are not part of the works. These will be completed by the client)
- gravel surround to trees/planting (not part of works, to be completed by client)
- water connection for irrigation
- proposed GPO location for irrigation automatic controller
- Drip/line irrigation to be provided to all garden areas. Water to be piped via subsurface pipe between gardens & trees.
- Note: Irrigation works are not part of the works. These will be completed by the client)

- 1 groves of tree planting *Acacia harpophylla* (Brigalow)/ *Acacia aneura* (Mulga wattle) with gravel surrounds
- 2 shade tree planting with *Eucalyptus argopholia* (Chinchilla White gum)
- 3 mass planting of low shrubs & groundcovers at front entry
- 4 mass planting with groundcover *Atriplex nummularia* (Saltbush)
- 5 mass planting of groundcovers to front facade
- 6 clumps of shrub planting with gravel between to provide screen to adjacent property
- 7 shade tree planting with *Eucalyptus argopholia* (Chinchilla White gum) with groundcover *Eremophila 'Kalbarri Carpet'*
- 8 mass planting with groundcover *Atriplex nummularia* (Saltbush)

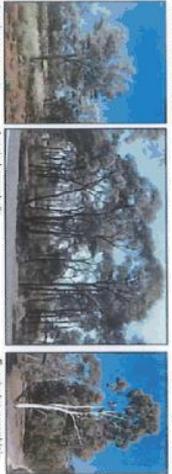

NOTE: Garden beds, gravel mulch, planting, turf and irrigation are not part of the works. These items will be completed by the client.

St George's Harmony Centre 64 The Strand, St George's QLD	St George's Harmony Centre 64 The Strand, St George's QLD	2009-01	January 2021	C

PROPOSED TREES

Acacia aneura
Mujga wattle (10m x 8m)

Acacia haemaphysalis
Bigelow (10m x 8m)

Eucalyptus argophloia
Chinchilla white gum (12m x 8m)

PROPOSED SHRUBS

Acrocalymma
Broom bush (2m x 3m)

Cassinia
Wild orange (3m x 3m)

Citrus ovata
Current bush (4m x 3m)

Citrus glauca
Lime bush (3m x 3m)

Eriogonum
Eriogonum poison bush (2m x 2m)

PROPOSED GROUNDCOVERS

Anemone
Sailbush

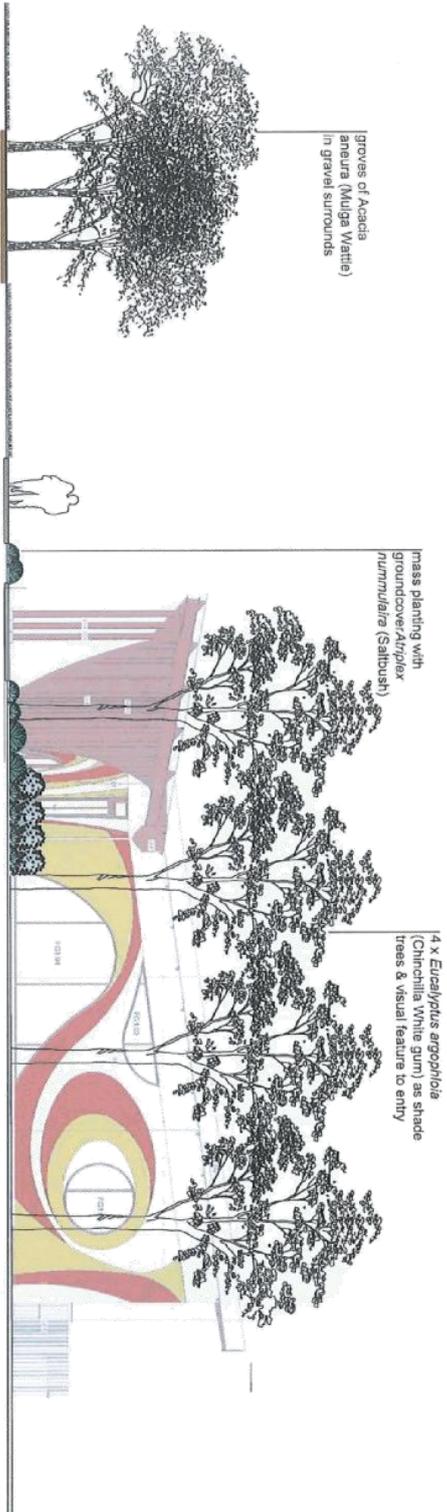

Erodium
Climbing sailbush

Eriogonum
Robby Sailbush

Eriogonum
Eru bush prostrate

Pteris
Picky Sailbush

NOTE: Garden beds, gravel mulch, planting, turf and irrigation are not part of the works. These items will be completed by the client.

STORMWATER DRAINAGE LAYOUT
SCALE: 1:100 @ A1: 1500 @ A3

- STORMWATER DRAINAGE NOTES**
1. DN10, DN150 AND DN225 PIPES SHALL BE UPVC.
 2. CONTRACTOR TO OBTAIN AND SUBMIT SPECIFICATION FOR RETAIN WALL.
 3. ALL PIPES SHALL BE Laid AT AN ANGLE OF 1 IN 100 UNLESS OTHERWISE SPECIFIED.
 4. PIPES SHALL BE JOINTED USING RUBBER RINGS JOINTED.
 5. ALL PIPES SHALL BE PROTECTED BY A 150mm MINIMUM COVER AND INSPECTED AND APPROVED BY THE ENGINEER PRIOR TO ACCEPTANCE.
 6. PARALLEL PIPES SHALL BE CLEAN EXCAVATED W/ATER COMPACTED AS PER SPECIFICATION.
 7. ALL FITS SHALL BE BONDED AFTER INSTALLATION OF PIPESWORK TO PREVENT LEAKAGE.
 8. ALL FITS AND MANHOLE LIDS TO BE ADJUSTED TO MATCH GROUND/FALL OF SITE.
 9. THE CONTRACTOR SHALL USE MINIMAL SERVICE AUTHORITIES TO OBTAIN THE LOCATION OF ALL EXISTING SERVICES. THE COST TO OBTAIN THIS INFORMATION SHALL BE PAID BY THE CONTRACTOR.
 10. CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS AND APPROVALS PRIOR TO UPGRADE PIPE MANHOLE CASES TO AS SPECIFIED. ALL WORK SHALL BE COMPLETED WITHIN THE SPECIFIED TIME FRAME.
 11. CONTRACTOR SHALL BE IN ACCORDANCE WITH ALL RELEVANT REGULATIONS AND STANDARDS.
 12. THE BUILDING PLATFORM CONTRIBUTION TO INSTALLED PIPESWORK SHALL BE PAID BY THE CONTRACTOR.
 13. ALL WORKING SHALL BE COMPLETED WITHIN THE SPECIFIED TIME FRAME. ALL WORK SHALL BE COMPLETED WITHIN THE SPECIFIED TIME FRAME.
 14. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 15. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 16. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 17. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 18. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 19. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.
 20. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SERVICES AND UTILITIES.

NOTE
SHOW SERVICES ARE FROM THE VERTICAL INFORMATION ON THE VERTICAL INFORMATION SHEET. CONTRACTOR TO CONFIRM THE LOCATION OF ALL SERVICES AND UTILITIES PRIOR TO ANY EXCAVATION.

GENERAL NOTES

1. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH ALL APPLICABLE CODES AND REGULATIONS.
2. ALL SET OUT DIMENSIONS SHALL BE CONFIRMED ON SITE PRIOR TO COMMENCEMENT OF WORK. DIMENSIONS SHALL NOT BE OBTAINED BY MEASUREMENT FROM THE DRAWING. REFER TO BENCH MARK FOR DESIGN POINT.
3. WORK IS TO BE COMPLETED WITHIN THE SPECIFIED TIME FRAME. THE PROJECT WILL BE SUBJECT TO A RISK REGISTER AND THE CONTRACTOR SHALL MAINTAIN THE STRUCTURE IN A STABLE CONDITION DURING CONSTRUCTION. NO STRUCTURAL ELEMENT SHALL BE OVERSTRESSED BY CONSTRUCTION LOADINGS.
4. THE STRUCTURE SHALL MAINTAIN THE FOLLOWING LOADS IN ALL DIRECTIONS:

DEAD LOAD	25
LIVE LOAD	5
WIND LOAD	AS PER DULAC 1911
FLOOR FINISH	AS PER DULAC 1911
5. THE CONTRACTOR SHALL MAINTAIN THE STRUCTURE IN A STABLE CONDITION DURING CONSTRUCTION. NO STRUCTURAL ELEMENT SHALL BE OVERSTRESSED BY CONSTRUCTION LOADINGS.
6. THE STRUCTURE SHALL MAINTAIN THE FOLLOWING LOADS IN ALL DIRECTIONS:

DEAD LOAD	25
LIVE LOAD	5
WIND LOAD	AS PER DULAC 1911
FLOOR FINISH	AS PER DULAC 1911

FOUNDATION NOTES

1. FOOTINGS HAVE BEEN DESIGNED FOR AN ALLOWABLE BEARING CAPACITY OF 100 KPa. THE CONTRACTOR SHALL VERIFY THE BEARING CAPACITY OF THE SOILS PRIOR TO CONSTRUCTION. REFER TO GEOTECHNICAL REPORT NO. 14890 BY WMA SOILS FOR MORE INFORMATION.
2. FOOTINGS SHALL BE LOCATED CENTRALLY UNDER WALLS AND COLUMNS UNLESS OTHERWISE SPECIFIED.
3. FOOTINGS TO BE CONSTRUCTED AND HAVE CONCRETE PLACED AS SOON AS POSSIBLE FOLLOWING EXCAVATION TO AVOID SOFTENING OR DRAINING BY EXPOSURE.
4. EXCAVATION SHALL BE KEPT FREE OF PONDING WATER BEFORE CONCRETE IS PLACED.
5. TO MAINTAIN THE REQUIRED COVER OF THE REINFORCEMENT, REBAR SHALL BE PLACED ON CHAIRS OR SPACERS. THE REINFORCEMENT SHALL BE PLACED AT LEAST 50MM FROM THE EXCAVATION WALLS AND 25MM FROM THE EXCAVATION FLOOR.
6. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
7. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
8. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
9. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
10. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
11. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
12. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
13. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
14. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
15. ALL REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.

PRECAST PANEL NOTES

1. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
2. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
3. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
4. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
5. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.
6. ALL PANELS TO BE REINFORCED WITH RIB FABRIC PLACED CENTRALLY UNDER THE PANELS. THE REINFORCEMENT SHALL BE PLACED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DESIGN. REFER TO THE REINFORCEMENT SCHEDULE FOR MORE INFORMATION.

OFFICER REPORT

TO: Council

SUBJECT: **South West Indigenous Corporation - Request for Reimbursement of Development Application Fee**

DATE: 05.03.21

AGENDA REF: ERS6

AUTHOR: Fiona Macleod - Planning & Development Officer

Sub-Heading

The purpose of this report is for Balonne Shire Council to consider a full reimbursement of the development application fee paid for MCU 191 Development Application for Material Change of Use – Community Use (Harmony Centre).

Background

On 1st February 2021 Council's Planning and Development Officer, Fiona Macleod received written correspondence from South West Indigenous Corporation (SWIC) as part of the development application documents lodged requesting a full reimbursement of the application fee incurred to apply for Development Approval for the Community Use 'Harmony Centre' at the property located at 72-76 Saint Georges Terrace, St George (see **Attachment 1**).

SWIC have requested the reimbursement based on the Harmony Centre being a community driven project which will provide a significant contribution to the Balonne community. The development triggers a Material Change of Use Approval from Council prior to commencing. Development Application MCU 191 has been lodged and is currently at the decision part. Provided below is the Council fee attached to obtaining development approval for a 'Community Use' subject to Code Assessment.

- **Development (Planning) Application: \$1,625.00**

It is considered that the current fee applied to the development approval is reasonable for this type of development and would not incur unreasonable financial burden to the applicant. Importantly, while it is recognised SWIC does provide a vital community service to the Balonne region, funding was obtained for the Harmony Centre Project which, when applied for, should have accounted for the regulatory approvals (and associated fees).

Accordingly, a full reimbursement of the above fee may result in setting a precedent for other community organisations to apply for and be successful in obtaining development fee reimbursement and waivers from Council even though the grant application costings should incorporate the cost/s of obtaining approvals.

Based on the above, it is considered that a full reimbursement of the Council Development Application fee be declined.

Link to Corporate Plan

Key Foundation Area	Key Program Area
<u>Community</u>	Strong community organisations

Consultation (internal/external)

Director of Corporate & Financial Services – Michelle Clarke
Chief Executive Officer – Matthew Magin

Legal Implications

Nil

Risk Implications

Community Service - Inability to achieve Council's vision and mission to deliver community services and meet current and future needs.

Policy Implications

Nil

Financial and Resource Implications

The Development Application Fees taken from Councils Fees and Charges 2020/21 for the Development Application are found under Material Change of Use – Code Assessment – Minor and Community uses, and the prescribed fee is \$1,625.00.

The Development Application Fee set by Council is cost recovery and covers the wage of the Planning and Development Officer.

Options or Alternatives

Nil

Recommendation/s

That Council:

1. Decline to reimburse the development application lodgement fee based on the South West Indigenous Corporation obtaining funding for the establishment of the Harmony Centre project as well as the development fee being on a cost-recovery basis.

Digby Whyte

Director Environment & Regulatory Services

The Chief Executive Officer
Balonne Shire Council
PO Box 620
ST GEORGE QLD 4487

Dear Sir,

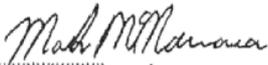

REQUEST FOR REIMBURSEMENT OF DEVELOPMENT APPLICATION FEES – MATERIAL CHANGE OF USE – “COMMUNITY USE” (HARMONY CENTRE) – 72-76 SAINT GEORGES TERRACE, ST GEORGE

On behalf of the South West Indigenous Corporation, we respectfully seek reimbursement of development application fees of \$1,625.00 paid for a development application for Material Change of Use for a “Community Use” (Harmony Centre) on land at 72-76 Saint Georges Terrace, St George.

The proposed Harmony Centre is a community-driven project underpinned by corporate governance that will showcase this region’s diverse indigenous culture and will reflect pride of place in both Indigenous and non-Indigenous community members recognising past, present and future. The facility will provide a gateway to the Cultural Trail and will support the Indigenous enterprise incubator program to engage youth and other community members into vocational education and training (VET) related programs.

The proposed Harmony Centre will provide a significant contribution to the Balonne community in terms of Indigenous culture, tourism and vocational education and training. For these reasons, South West Indigenous Corporation is seeking reimbursement of Council’s development application fees for the Material Change of Use application referred to above.

Your sincerely,

14/1/2021

AGENDA REF: IOCEO1

AUTHOR: Kim Wildman - Tourism Manager

Balonne Shire Tourism Report – February 2021

Balonne Shire Tourism Report for February 2021 as supplied by the Manager Tourism.

Tourism Projects & Activities

- *St George Heritage Trail*: Work has continued on this trail. The World War 1 Memorial located at the St George Hospital will not be included as the South West Hospital & Health Service have decided a marker at this site may increase traffic flow and impact on service delivery needs and therefore have declined to have listed as part of the trail. The initial design concept has been received and in process of being reviewed.
- *St George Region Travellers Guide*: The first draft of the Guide has been received and round 1 of changes undertaken. Launch of the new guide is set for March 2021.
- *Historical Pub Trail*: content has now been completed and quotes received for publishing of brochure.
- *Grey Nomad Awards*: Two of Balonne Shire's campgrounds were named a finalist in the Grey Nomad Awards, further cementing the St George region's reputation as a bucket list destination for mature age tourists. The Dirranbandi Retreat & Caravan Park has been shortlisted in the 2020 Best Grey Nomad Small Caravan Park category, while the Nindigully Tourist and Visitor Area has been shortlisted in the Best Grey Nomad Council Free-Stay category. The winners will be announced on Tuesday 2 March at a celebratory event on the Sunshine Coast, QLD.
- *Tourism Services Team Planning Day*: The Tourism Services Team had a team planning day focusing on project planning for 2021 as well as pulling together and finalising the details of the new St George Region Travellers' Guide, Website and new 2.0 Welcome Mate campaign all set to be launched in mid-March.
- *Mungindi*: The Manager Tourism along with the Director Environment and Regulatory Services conducted a reconnaissance trip to the One Ton Post in Mungindi to investigate opportunities for revitalisation of the site.
- *Event Organiser Bootcamp Webinar*: The first of the series of six free webinars aimed at supporting the Shire's event organisers to increase their skills took place with 10 participants learning about the benefits of strategic planning for their events. The final workshop is scheduled for Tuesday 9 March.
- *Tourism Events Grant*: Promotions have begun for the Round 2 of the Shire's Tourism Events Grant. Applications open on 1 February 2021 for events held between 1 July 2021 and 30 December 2021. Funding is available across three categories – Regional Events (up to \$2000), Destination Events (up to \$3000) and Major Events (up to \$6000) – for pre-existing Shire events with one-off funding of up to

\$2000 for the development of new tourism events. Applications close 1 March 2021. See Council's website for further information.

TOURISM
EVENTS GRANT

APPLICATIONS FOR TOURISM EVENTS OPEN:
MONDAY, 1 FEBRUARY
FOR EVENTS HELD BETWEEN 1 JULY - 31 DECEMBER 2021

FUNDING IS AVAILABLE ACROSS 3 CATEGORIES:

REGIONAL EVENTS	Up to: \$2,000
DESTINATION EVENTS	Up to: \$3,000
MAJOR EVENTS	Up to: \$6,000

*In addition, ONE-OFF funding for:
DEVELOPMENT OF NEW TOURISM EVENTS Up to: \$2,000

St George Region

Published by Kim Wildman [?] · February 2 · 🌐

Have you started making plans for your 2021 adventures? Why not make this year, the year you awake to a new day the Outback way in St George Region?

There's no better place to start your St George Region adventure than Nindigully. Days can be filled taking a stroll along The Gully Walk – a purpose-built historical river walkway – perching upon the provided picnic tables and chairs with a good book, throwing a line in the Moonie or heading up to the famous [Nindigully Pub](#) for happy hour for a couple of beers and some dinner with new found friends. Then as evening closes in, you can enjoy a nightcap by a campfire before bedding down under an endless blanket of stars.

Ahh the serenity .. we can feel it now... 🌄🔥🚗

Tourism Organisation Representation

South West Queensland Regional Organisation of Council – Tourism Committee (SWQROC)

- The Manager Tourism travelled to Quilpie for a meeting with her regional counterparts of South West Region of Outback Queensland. All six shires were in attendance along with representatives of Outback Queensland Tourism Association. Updates were presented on each region with plans made to present the region as a united front at the OQTA Muster in Brisbane on 22 and 23 February.

Outback Queensland Tourism Association (OQTA)

- The Manager Tourism attended the OQTA Muster as part of the SWQROC contingent on Monday 22 February along with David Blacket from Riversands Wines. The tradeshow part of the event was a first for the Balonne Shire in that it put us in direct contact with travel agents and media who were all keen to sell holiday packages to the Outback, particularly given COVID border restrictions. The SWQROC's new branding concept – Be Our Guest in the South West – as well as working together as a united team worked wonders for the region's six Shires, notably standing out due to the collaborative approach taken.

Adventure Way Promotions Group

- The next Adventure Way meeting is scheduled for 9 March 2021.

The Great Inland Way

- The next meeting is to be scheduled for early 2021.

Meetings & Training

- LGMA Tourism & Economic Development Meeting – 2 February
- Monthly Tourism Catchup Meeting – 2 February
- Council Staff Meeting – 4 February
- Tourism Team Planning Day – 11 February
- Social Media Workshop – 13 February
- QLD VIC Network Meeting – 15 February
- Tourism Network Meeting – 16 February
- Thallon Community Day for Tourism Strategy Draft – 21 February
- St George Region Website Training – 24 February
- RV Strategy Review Meeting – 25 February

Volunteer Projects & Activities

- Volunteer hours have totalled 11.5 hours for February. Due to the current low season, some volunteers have taken this time to take a break and plan to return as visitor numbers increase.

- A meeting was held with Communications Officer to discuss ideas on how to recruit new volunteers. Awaiting promotional material for this.

Shire Tourism Statistics – October 2020

St George Visitor Information Centre

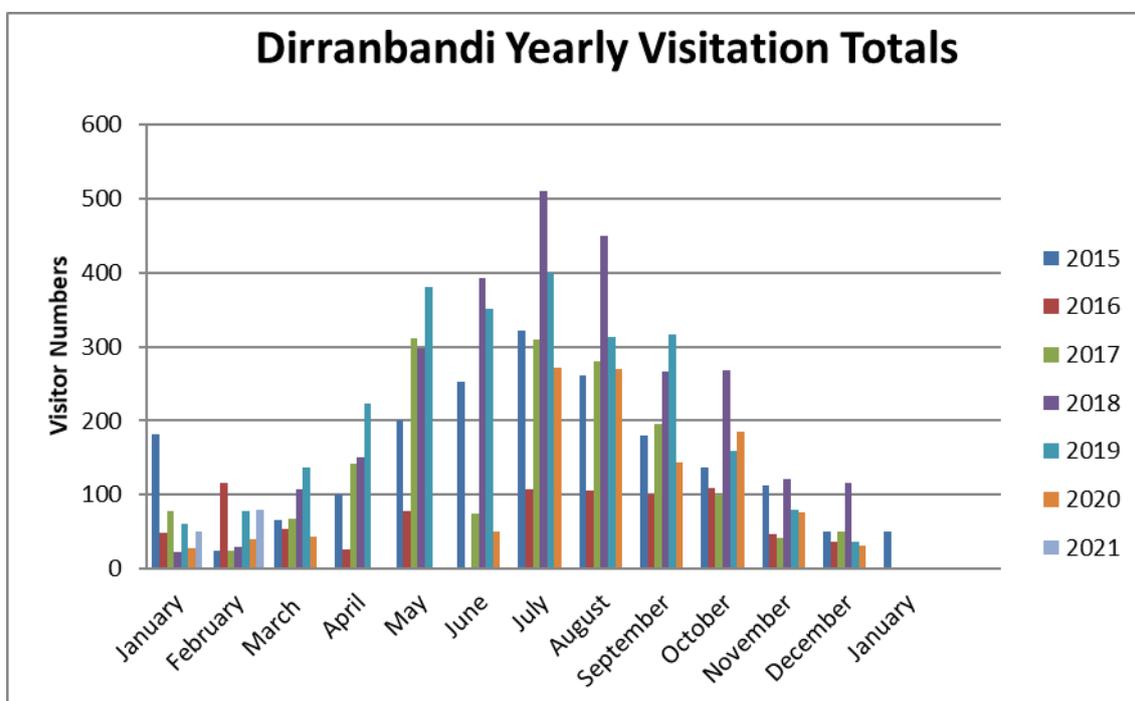

There were 396 visitors recorded for February through the Visitor Information Centre (VIC) in St George. This is an increase of 135 visitors compared to February 2020 where the total was 261 visitors.

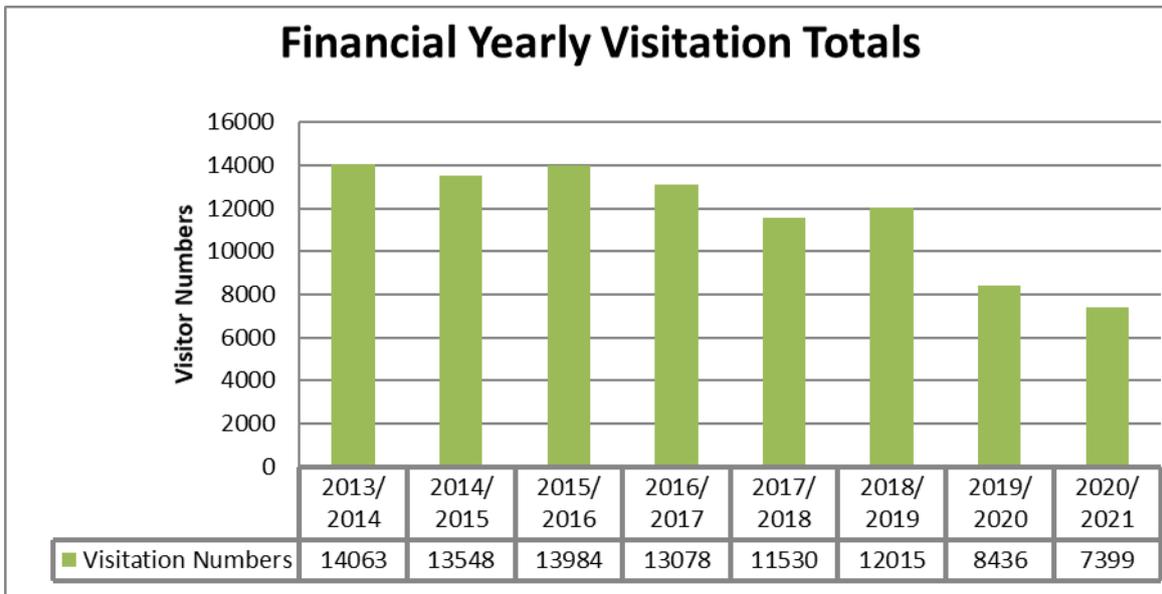

- Local Shire 96
- New South Wales 52
- Victoria 15
- Queensland 218
- South Australia 7
- Northern Territory 1
- Australian Capital Territory 2
- Western Australia 3
- Tasmania 0
- Overseas/International 2

The VIC also received 57 tourism related phone enquiries, 5 Information Packs were sent out and 8 email/internet tourism related enquiries were made during February.

Dirranbandi RTC

There were 79 visitors recorded for February 2021 through the Dirranbandi Rural Transaction Centre (RTC). This is an increase of 40 visitors compared to February 2020 where the total was 39 visitors.

Monthly information report

Injury Summary

There were only 2 minor work incidents reported during the month of February 2021 in a total of 12,683.24 hours worked.

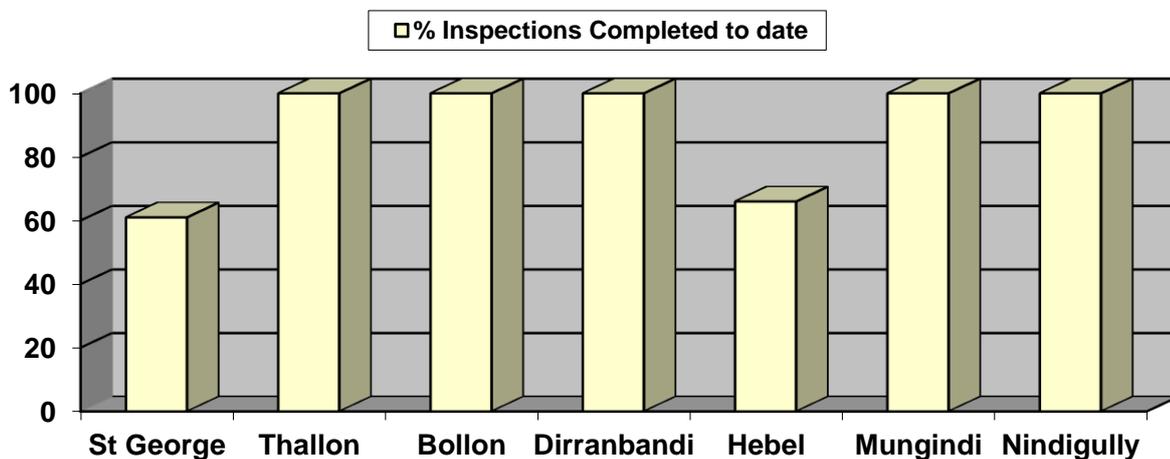

These injuries included a strained muscle and someone falling from a piece of plant. Our current LTIFR (Lost Time Injury Frequency Rate) is 9.41 Lost Time Injuries per million hours worked.

Injury	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21
Strain/sprain	7	1	3	2	7	13	6
Foreign body			6		2	1	
Bruise	1		3	1	4	4	
Cuts / Laceration	1	1	2	2		3	2
Burns/scalds	2		1				1
Skin irritation			1				1
Weld flash		1					
Puncture	1				1	1	
Poisoning							
Fracture							

Worksite Hazard Inspections

The new Hazard Inspection Matrix for 2021- 2022 Financial Year is in the process of being developed, along with the Quarterly Action Plans. Council is in the process of recruiting an external party to undertake all Hazard Inspection across the Shire to give an indication of time and cost.

The last inspection period that finishing at the end of December 2020 has a several inspections to be undertaken in St George and Hebel before being finalised.

Take 5 and Toolbox Talks

Managers and Supervisors have been following progress of their staff and following up outstanding items.

Safety Inductions, Training & Information Sessions

Several staff have failed to complete their Traffic Management training as the extension has expired and have not completed the competency. There have been several issues identified with the training provider and will be considered with future procurement processes.

Supervisors and Managers have also started to document that their staff are inducted into the plant & vehicles that are operated.

Calibrations, Inspections and Testing

Electrical Test & Tag is review as part of the hazard inspections completed for work areas.

All Fire Equipment have been tested along with our Heights Safety Equipment, Oxygen Meters & Anchor Points. Council's winches have been returned from servicing, lifting Equipment will be inspected in early March.

Plant Inductions

Several staff are not inducted into their day-to-day vehicles. Supervisors have been advised and are to complete these inductions soon as practical. A review is also being undertaken on other plant items.

Safety Audit Documents that have been reviewed

Council have received revised Incident Report Forms from Feddersen Consulting that have been reviewed. These will now be sent to SLG for review along with the Incident and Injury Management Workflow.

ENVIRONMENTAL SERVICES

Natural Environment:

- General health inspections were carried out.
- There were no notifiable diseases reported during February 2021
- There were five food recalls actioned in February 2021.
- Mosquito Management

Dirranbandi

- Mosquito larvicide has been carried out throughout the township of Dirranbandi. This was completed on Thursday 4 March 2021

Hebel

- Mosquito larvicide has been carried out throughout the township of Hebel. This was completed on Thursday 4 March 2021.

Thallon

- Currently all water has evaporated, however should any more rainfall occur, the town supervisor will advise and mosquito larvicide will occur throughout the township

Bollon

- The river is currently receding, and blackfly will become a problem over the coming days. A Public Health Alert has been actioned and pushed out through social media. This will ask the community to take extra precautions during this period.

Mungindi

- No action required

St George

- No action required

Local Laws:

- Registration forms and the completion of QR codes at RV friendly parks continue.

Public Health:

- Council continues to promote community awareness on safe practices during COVID-19 when running events, weddings, workshops and other community gatherings
- Several local organisations are currently pre-planning for events in 2021. Battle of the Balonne, Yellowbelly, and Rally 399
- Queensland Health alerts have been shared with the Balonne community – New app “Check in Qld”
- COVID-19 safe responses continue, especially hiring of Council facilities. These responses are sent prior to the approval of the facility. This process allows for all organisations to undertake COVID-19-safe practices.

Wastewater Services:

- Wastewater analysis continues each month.

Urban Water Supplies:

- Weekly microbiological samples of St George's bore water supply were taken and tested.
- Samples were taken and tested from all other towns during the period.

Waste Management:

- All waste practices continue at a high standard at the St George Landfill.
- The illegal dumping of tyres project, funded by the Department of Environment, reached it's 300 tonne quota at the end of the month. The hotspot project is well underway with compliance notices being issued. This project continues to gain strength. Refer to attachment.

- MOU signed for Harrisia Cactus on Private Property grant with Goondiwindi Regional Council
- Workplace Health and Safety Representative Training
- QMDCL Rangers herbicide spraying, town common, TMR Element 5 Herbicide Spraying on Castlereagh Highway.
- Pest weed inspections at Thallon Reserve
- Clean up of Johnson Road trees due to safety concerns.
- Baits delivered to “Narline” “Glencoe” and “Dunwold”.
- Assisting Environmental Health with Vector Spraying Dirranbandi
- Wild Dog Baiting Corflutes ordered for the May 2021 Baiting Program.
- Traditional cool burning tests at Thallon Reserve and Munya Lake to remove weeds and restore pasture condition (photo). Fires have proved to be efficient and easily controlled. Video produced.

- Fire Breaks done for Traditional Burn in Thallon.
- St George Stock Pound thinning works for hazards.
- Rural Fire Brigade Meeting to propose the formation of a Rural Fire Brigade in St George.
- Destroyed 31 Wild Dog Scalps.
- Scalps 5-year review to date (table). 2020-2021 total to date is 198.

Wild Dog Exclusion Fencing (WDEF)

- Jenny Hatch commenced as WDEF Administrator on a casual basis
- Grant EOI's collated with expressions totalling 559km of WDEF (approx. grant value \$4.5m).
- Preparations for \$2m MDEDP grant
- 5m Vegetation Clearance Permit drafted by the solicitors. Permits finalised and issued to landholders
- Vegetation Clearing inspections at Whyenbah, Eurobadalla, Neabul Downs, Honeymah Lane, and Toorumbie (including resolution of fence alignment).
- WDEF materials deliveries to: Warroo, Wirraninna North, Wodonga, Tralee, Ballandool (photo), Neabul Downs, Oakey Park, Openbah, Moorenbah, Brookdale, Kendal, Lakeside

- Working with some of the Murray Darling Landholders to provide a variation of time as their materials have been waiting 6-7 months for delivery outside of their control.
- Sign-ups for Special Rate Scheme Round 2
- WDEF Site Induction or Progress Inspections for Mooramanna, Toorumbbee, Nulky, Riverston, and Moolabah
- Wing Permits are currently being issued and pegged out from the original inspections in June 2020 now that landholders are coming to construction of the wings.
- Deed of Assignments to East Thomby Cluster for the Sale of 2 properties
- Guidance from SQ Landscapes funding provider on the maintenance schedule for the Fernlee Cluster.

Stock Routes

- Stock Route and Water facility patrols conducted.
- Stock Route compliance inspections for four properties
- 2021-2022 Capital Works Expression of Interest Projects funded by DNRME submitted
- Stock Route Capital Works for 2020-2021 submitted for reimbursement from DNRME.
- Facility Inspections submitted to DNRME through the Stock Route Management System for approval.
- Quotes outsourced for Mungindi Town Common (Tanks, Troughs)
- Commenced Thuraggi Reserve Fence Renewal to reduce illegal dumping of car bodies and rubbish. On-site consultation with Kamilaroi Land Trust representative.
- Stock route water tanks inspected along Balonne highway (photo)

Compliance/Local Laws

- Rolled out desexing & microchipping program with St George Vets
- After hours patrols of St George for wandering dogs (1 5.30am, 1 6am, 1 finishing 7pm)
- Early morning patrols due to aggressive dog Balonne and Church street end of river walk
- Patrols done of Dirranbandi, Mungindi, and Bollon
- Pound mural led by Gordon nearing 90 percent completion (photo)

- Regular Pound maintenance
- 21 dogs impounded (8 pups – photo)
- 10 dogs returned
- 4 dogs rehomed
- 2 cats impounded
- 1 cat returned
- 1 cat rehomed
- 1 dog and 1 kitten euthanised (severe condition)
- Assisted DAF with 8 dog welfare inspections
- 13 compliance notices, to take action, issued for wandering dogs
- Inspections for compliance with notices and
- 7 fines issued, after inspections for compliance with notices (not registered, not microchipped, no enclosure)

Financial and Resource Implications

Activity achieved within existing operational and capital budgets.
